**WANT INVESTIGATE ORIGIN OF ICEBERGS**

**Danish Expedition Will Seek to Learn of Disintegration of Glaciers**  
Latest Budget of Continental European News—Taft Becomes Honorary President of Danish American Society.

Copenhagen, Denmark, April 19.—President Taft has consented to act as honorary president of the Danish Society, which will present Denmark with a heather park in Jutland on August 5. Maurice Egan, American minister to Denmark, and Count Stolte, Danish minister to the United States, have consented to act as vice-presidents of the society. The presentation of the park will take place in the City Hall of Copenhagen probably in the presence of the royal family, the Danish-American committee and many high officials.

An interesting Danish expedition headed by the well-known Arctic explorer, Captain Koch, and patronized by the King, has started for Greenland. The party includes a number of prominent scientists. The expedition will go first to Denmark's Fjord on the east coast of Greenland, then inland for about 200 miles to Queen Louise's Land, which is a vast territory of unmapped seas, rivers, mountains and plains known only to Captain Koch, who spent a few hours there while engaged on the Denmark polar expedition.

The party will investigate the melting of the enormous icebergs and glaciers of the country before striking across Greenland's inland sea to the coast of Greenland. This portion of the trip will be made on skis.

Nansen is the only explorer who has ever crossed this icy sea, but he made the passage in southern Greenland, where the distance is one-third of the distance which Captain Koch expects to cover in crossing.

On arriving at Proven, the western coast will be explored. The expedition will be accompanied by four sledges drawn by Iceland ponies. The scientists accompanying the party will have made a meteorological and other observations, which are expected to form a valuable addition to the natural history data of the Arctic regions.

The American minister has paid over to the foreign office, representing the king, \$25,000 for the Carnegie hero fund. The committee in charge of the fund consists of the foreign minister, the minister of the interior, the secretary of the Arctic minister and others to be added later.

Christiania, Norway, April 19.—An offer to equip the Fram, Captain Rued's ship, for the Carnegie hero fund expedition with a complete wireless station has been made by a German wireless company on condition that the expedition be organized in conjunction with the Spitzbergen station.

The proposal to vote \$40,000 toward the Amundsen expedition into the Arctic has been favorably reported by the Storting.

**Muscles Useless Without Nerve Force**  
Perhaps you are not quite clear on the relation of the nerves to the rest of the body. Through the nerve fibres which extend through countless branches to every nook and corner of the human system is conveyed the motive power which operates the various organs.

There could be no breathing, no beating of the heart, no flow of the digestive fluids, no action of any muscle or organ of the body without nerve force. Consequently when the nervous system becomes exhausted there is complete collapse of the body, the different stages of which are described as nervous prostration, locomotor ataxia and paralysis.

The time to use such restorative treatment as Dr. Chase's Nerve Food is when the headaches, sleeplessness, indigestion and other warning symptoms first appear. The most efficient treatment is then sufficient to revitalize the wasted nerve cells and restore health and vigor.
