Warehouses Legal Liquor Dealers Say

Claim Made That They Will Not Interfere at All With Provincial Commission. What promises to be a large industry is now being opened up in this city by four firms who are now creating new establishments, or recreating old ones for the purpose of exporting and importing liquor. These liquor exporting houses do not come under the jurisdiction of the Prohibitory Act of this province, nor of any other province, but they find their legality, it is said, in the British North America Act, which allows exporting and importing of this article. They have been established in all the Provinces of Canada as was pointed out by the local representative of one of the firms, one western province having as many as sixty houses dealing in the export of liquor, and even in Prince Edward Island, where a very stringent prohibitory act is in force there are two such establishments operating.

Warehouses Leased. The premises now occupied by these firms are warehouses that have not been used for some time, and a considerable amount of money is being expended to fit them for the new use. The attitude of those who are conducting these enterprises, and the effect their inauguration will have on the business of the city is summed up in the following statement given by W. G. McIntyre, of the firm of W. E. McIntyre, Ltd. He stated:—

"The import houses that come down here from Montreal will employ, directly or indirectly, in the vicinity of 600 men, whose wages will, of course, run into large figures. Carters, boxes, mails and numerous other articles will have to be obtained in large quantities. Warehouses have been obtained and expensive alterations made on them costing an appreciable sum of money which has hitherto all been spent in the Province of Quebec.

Financial Increases. "The customs receipts will be larger, as also will the bank clearings. Express companies have already promised to increase their staffs to take care of the business they anticipate. The matter of the exporting of liquor is not undergoing any new phase. A like business has been carried on for several years in this city, and the firm has not been interfered with. We have acquired and opened up four like houses that were hitherto vacant and have spent on the electric fixtures of one of them alone the sum of \$2,500. In no way can this business impede or distribute liquor."

Solos were rendered by Samuel Holdren and the evening was most pleasantly spent.

Brussels Street Paying To The Fore

Delegation Will Once More Approach Common Council on This Matter. Brussels street like Banquo's ghost will not down and the city fathers are going to hear from the property owners and residents of that street again on Monday morning in regard to the long promised paving work. Commissioner Frink when asked yesterday about the paving of the street said he hardly knew what was going to happen. He had taken the matter of rails up with the Power Co. and from what was said by them the prospects did not look any too good. He had had the road engineer make an examination of the steel now in place, and that official had reported that it was not in as bad shape as was expected, but some renewals would have to be made. The commissioner further stated that he understood a delegation of property owners and residents would appear at the council meeting on Monday morning to urge their claims for proceeding with this very necessary work.

Daylight Time Will Start This Midnight

Mails Arrive An Hour Later, Regular Trains on Old Time But Many People Happy. Tonight the people of the city are requested to set their time pieces ahead one hour before going to bed for when they awake the city will be operating on what is familiarly known as daylight saving time. This scheme has been in vogue in this city for several years during the summer months, and in spite of the outcry against it from several sections, and particularly on the part of the labor unions, its introduction is being strenuously opposed by anyone in the years that it has been used previous to the last season it ran for the six months of the year, and it is being introduced again this year will be from tonight until midnight on the third of September.

The most disturbing features of the operation of the earlier time will be that mails will arrive one hour later by the city watches, and that it will be necessary to arise earlier to catch the regular trains leaving the city accepting the trains running to and from the city. That is illustrated by the case of the regular train that leaves the city at 7.15 a.m. and connects with the Ocean Limited for Montreal. A person residing in the city, if he wishes to leave on that train, must figure on being at the station at 6.10 by his watch. To offset that there will be an extra hour of twilight in which the people can be in a better position to take advantage of any evening entertainment, and especially the baseball games to be held in the city. Not only will the spectators be benefited by being able to witness the games, but it will react on sport itself.

The city schools will be affected by the change of time on Monday when they will open on daylight saving. Daylight Favored. For many years there has been an alleged opposition to the scheme for longer evenings, and in response to a demand from the various labor councils of the city the matter was submitted to the people in order that they might reject or re-introduce it by their vote on February the 28th. The result of that plebiscite was a two to one verdict in favor of the scheme, the number of votes being cast in its favor being 2,568, and against the scheme 1,258. The exceedingly small vote polled disclosed the fact that daylight saving as it operated last year, and as it is proposed that it will operate this year, is not an item of special concern to the city, and that the majority of the voters are in favor of starting the day a little earlier in the summer months in order to have more time to enjoy the evenings that are peculiarly pleasant in this country.

The Bungstarters' Union In Session

Opposed to Open Shop—Vote Loving Cup to Inspector—To Wear Badges. The Bungstarters' Union was in session last night. This is one of the latest unions to hit the town, has a large membership, and is prospering. It is comprised of that great body of "the bunch" members voted that they dispense liquors from the hip pocket, or from some hole in a dark alley, and are vulgarly called "bunk loggers." Opposed to Open Shop. They are unalterably opposed to the "open shop" and have appointed a committee to intercede with the Government for the purpose of curtailing beer license and street trading and to demand the repeal of the law that allows the sale of liquor from the hip pocket, or from some hole in a dark alley, and are vulgarly called "bunk loggers."

There was considerable discussion over the new Federal tax on alcohol. Some thought an extra charge of five cents on the bottle of home-brew would answer requirements. Others thought they should take advantage of the situation and make greater profits, others trades were doing it, and charge one dollar extra. Latter idea carried. Before adjournment the union voted to present a "loving cup" to the inspector who was tipping them off when the "prohib" sleuths were coming. All took a drink of ice water and the meeting adjourned to meet on call.

Liquor Raid

Liquor Inspectors Journey, Henderson and Thompson paid a visit to a lodging house in Market street yesterday morning, and in a room there found two jugs of a liquid believed to be alcohol and four empty cans. The lodging house mistress claimed ignorance of the presence and said that her lodger had forbidden her to make his bed, which, in view of the find, she considered a clear case of "grape-juice."
