

By Telegraph.

Canadian, British and Foreign.

[To the Associated Press.]

New York, Aug. 30.—p.m.
Gold 115 1/4; silver 108 3/4; money 5 per cent.
Late Havana advices state that the Cubans are not ready to abolish slavery. They continually agree for more time. Socialism is gradually, but surely, obtaining a foothold.
The Treasury Department decided today that British Columbia is not entitled to the benefits of the Treaty of Washington so far as free importation of fish and oil is concerned, if not having been part of the Dominion of Canada at the time of signing the Treaty, and also that part of the said Dominion embraced in the Treaty is that portion on the Atlantic side. The State Department has also expressed the same opinion.

LONDON, Aug. 31.
A BREAK IN THE NEW CURE.
The cable being laid between Lisbon and Brazil is broken 180 miles from Madeira.

DEPORTING OF REFUGEES.
The Government of Portugal has sent Pizarro and 20 other Spanish Intriguants who sought refuge in that country to Southampton.

CELEBRATING.
The Spanish Cortes, by a very decided majority, refused amnesty to Intriguants.

A GENERAL CONSPIRACY.
A bill has been presented by Government calling into the army all males between the ages of twenty and thirty-five.

THE CARMENES
have resumed the siege of Bilbao.

THE LAST OF THE PRUSSIAN.
It is reported that the French Government will pay to Germany the last instalment of the war indemnity on the 15th of October.

CABINET CHANGES.
It is said to be probable that the Marquis of Hartington will succeed the Right Hon. William Russell in the British Cabinet, as Postmaster General, and that Right Hon. William E. Forster will become Secretary for Ireland in the place of the Marquis of Hartington.

NEW YORK, Sept. 1.
THE DOMINION COMMISSIONER to inquire into the Gordon abduction case in Manitoba and see if prisoners may not be released on bail.

DROWNED.
A boat containing two men and a woman went over the falls at Reading, Pa., yesterday, and the woman and one of the men drowned. The survivor says the boat was intentionally rowed over by the other man, who was bent on suicide.

FINES.
Wm. Duffy and Hugh Hutchinson were reported at Freeport, Pa.—loss \$75,000; at Patoka, Ind.—loss \$80,000, and at Sharon Springs, N.Y., where the Elbridge House was burned.

Portland Police Court.
There were four drunks to be disposed of this morning.

Wm. Duffy and Hugh Hutchinson were arrested on Saturday in Maine street. They were fined \$4 each.

Andrew McIntyre and Robert Clark who were drunk on Sunday were fined the full penalty \$5.

David Walker, a colored man, was charged with allowing three geese to run at large on the streets. It was proved and he was fined 25 cents for each goose, and the costs amounted to \$1.50.

Abraham Hector was also charged with allowing four geese to be on the streets. This was withdrawn without coming to trial.

Georgiana Wise, a young colored girl, was found wandering round the streets at a very late hour. She was taken to the Station but allowed to depart in the morning.

Merchants' Exchange.
No Markets to-day.
New York, Sept. 1.—Gold opened at 115 1/4.

Savings Bank Fund.
The Commissioners of the Savings Bank Fund have decided to hand it over to the Commissioners of the General Public Health, who are to invest it in 6 per cent. debentures, the interest accruing to go towards the support of additional patients, and for the improvement of the Hospital generally. The amount thus added to the annual revenues of the Hospital will be about twenty-five hundred dollars.

Rescued from Drowning.
Geo. W. Smith, Esq., of the Dominion Savings Bank, was rescued from drowning by a sailor who jumped in and saved him.

An Incident of the Storm.
While the storm was raging at its worst at Point du Chene, about 1 or 2 a.m. Monday last, and the sea was washing the very foundations of some of the houses away, two young ladies (of that class who have a great taste for the awfully grand, and who would even look on the scene presented with admiring eyes)—so the story goes—got up to watch the big waves, and while so engaged the sea was busy washing the inside out of their party—for their dwelling was adjacent to the sea—and all the preserves they had so treasured over and rolled over to get ready for winter were upset, and the butter and the lard, and all the other little ceteras of a well-stocked pantry likewise. Their ideas of the grandness of big storms have undergone a change.

Fairville.
Any one passing through this little town must be struck with its uninitiated. The houses as a general rule are neat and tasty, but the surroundings are so nasty that all the beauty is taken from them. The sides of the principal streets are covered with carts, wood, boards, and

all sorts of movable rubbish that should be in the back yards. Even in front of the church, boards and refuse lumber are scattered over the sidewalk, so that it is almost dangerous to walk over it. A few hours labor would make the place look neat and clean. The town officers should see that the streets are not blocked with so much rubbish, and the people themselves should take a pride in having the place look neat. There is a great deal of driving through the village this summer, and the impression left on strangers is anything but favorable. There is no place near St. John that presents such a forlorn appearance, and all because the street through it is so disgracefully littered up with rubbish.

FALL GOODS.

Ayer's Sarsaparilla.
FOR PURIFYING THE BLOOD, nothing has ever been offered which can compare with Ayer's Sarsaparilla. It is a blood purifier, and it is the only one that can be taken without danger to the system. It is the only one that can be taken without danger to the system. It is the only one that can be taken without danger to the system.

It is the only one that can be taken without danger to the system. It is the only one that can be taken without danger to the system.

FOR PURIFYING THE BLOOD, nothing has ever been offered which can compare with Ayer's Sarsaparilla. It is a blood purifier, and it is the only one that can be taken without danger to the system. It is the only one that can be taken without danger to the system. It is the only one that can be taken without danger to the system.
