INTERESTING STATISTICS PREPAR-ED BY LABOR DEPARTMENT.

engineer, who is consulting engineer for NOTABLE INCREASE IN WAGES DUthe Domin on Copper company was in the city yesterday on his way to Banff where he will spend a week or so at a summer were thirty trade disputes in Canada reported to the department of labor, an hotel with Mrs. Johnson.

Speaking of the copper situation Mr. Johnson said that the depression in copper just now was due to a variety of causes, but in his opinion that depression was merely transient. He explains that there had been considerable stocks of copper accumulated at the end of May fast by the principal American buyers, such as theh General Electric company. That stock of copper was sufficient to last the companies holding it for about four months. When this stock is all used up the open market must be sought once more. In the meantime the United Metals company, a company which means much to the American copper market, was not buying to any extent ..

Now, the United Metals company is reported throughout Canada as having merely an intermediary, notwithstanding gone into effect during the second its stading on the copper market. They buy and sell on commission. Intimately associated with the United Metals com- The upward tendency in wages as pany is H. Rogers, who is intimately associated with the Standard Oil. There is no vis.ble connection, sa'd Mr .Johnson, between the two companies, laying an emphasis on the word "visible," but there ada, with the single exception of that is a great similar ty in the personnel of of 1903 when the number of increases the people handling their affairs. If the was greater, although the number United Metals company is not buying naturally the fellow who wants to sell and cannot wait to sell at high prices, is good changes reported during April, May and ing to let his copper go at less. He sees | June last were 117 in number; of these that the copper is going out of the country and that there is little demand at the wages, and two were in the nature of present moment and therefore he is willing to sell a lesser f gure. He knows there is a stringency in the money market which is, however, more appreciated in the west than in the east, and he is more witing ance of way employees of the C. P. R. to let his copper go at the smaller f gure | G. T. R. and C. N. R. systems alone

than would otherwise be the case.

The whole matter of the depression, Mr. Johnson considers to be merely manipulation. The manipulation is being cleverly done but that it is manipulation Mr. Johnson apparently has no doubt. He thinks led to coal miners in Alberta and Britthat when the copper stocks come to an lish Columbia effected 4,000 men, while end the owners will come into the market in the lumbering industry in Ontario and buy again at a low figure, profiting and the eastern provinces over 10,000 thereby, and when their buying is done river drivers and millmen obtained adcopper will have gone up to as high a figure as before. As the stocks cannot hold out beyond the end of next month a circular to the police departments and Mr. Johnson thinks that with the beginning of the fall the copper situation will be as good as ever.

Asked if the present demand for copper had not fallen off, Mr. Johnson admitted that it certainly had within the last 30 days, for the causes named but that if the demand of last year was taken against the demand of this, it would be seen it had increased on the whole. Certain business propositions in the way of open-ing up new undertakings have not gone through but if they had their realization would only have meant a greater demand. Because they have not gone through there had been no decrease in the dmand of the consumers of copper. That is as g eat as ever. Nothing has arisen that can take the place of copper. Why the new deals have not gone through Mr. Johnson is not prepared to state, but he is not at all inclined to admit that this has anything to do with the stringency in the market. As far as copper properties are concerned that stringency can hardly be said to exist in the east. Mr. Johnson

has just arrived from New York and may, therefore, be c edited with knowing the sit-Asked as to the reason of the doop in the values of copper properties, Mr. Johnson said this was probably due to two causes, one the depression in copper which he maintains is merely artificial, and the second the series of investigations which are taking place all over the states into the affairs of certain prominent companies.

The bears are having it all their own way in the eastern market and many shares But the intrinsic value of the properties concerned have not been altered thereby and Mr. Johnson is optimistic enough to believe that the investigations will do ous ness far more good in the long run than any small harm that is now being effected by ill advised action. It is curl-ous to note in this connection that the opin on of Mr. Johnson is that the end of the investigations in one direction will be the government control, not government ownership, of railways; something after the Ines of the Canadian Railway Com-mission. This Mr. Johnson thinks will work for the ultimate good of the public. How far Mr. Johnson is prepared to endorse his own views with regard to the evanescent nature of the present copper depression may be gathered by what is peing done and what is being attempted in the Dominion Copper smelter at Boundary Falls. There last year there were but two furnaces capable of handling together about 650 tons of ore daily. Then was built an entirely new plant around these furnaces and a thi d furnace added, the third having a capacity of 750 tons

daily. From this on Mr. Johnson expects to be able to treat something like 1200 tons of ore daily, allowing for the occasional close down of a furnace for repairs, In addition to this huge expend ture, which is running into a half million dolfars at smelter and mine, Mr. Johnson now proposes to put in a blister copper converor, which will cost something like \$125,000. Mr. Johnson admits that the Dominion company's copper is now being converted at the plant of the B. C. Copper company at a favorable rate, but with the largely increased production he is of the opinion that it will pay his company to put in an expensive plant of their own. Of course with any prospect of a permanent drop in

copper, such an expenditure would hardly
be justifiable.

Asked as to the l'kelihood of an amaiand other structures gamation of the interests of the Dominion Copper and B. C. Copper companies, Mr. Johnson said that there had been some newspaper talk but that as a matter of fact the subject has not so far reached fact the subject has not so far reached such a stage that it could be broached at MANITOBA a directors' meeting.
