

	PAGE
Peat manufacturing machinery.....	123
Moisture content of peat as fired.....	124
Effective heating value of the gas.....	124
Consumption of fuel per brake horse power hour.....	126
Production of ammonium sulphate.....	127
Permissible moisture content of the peat fuel.....	128
Coal burning by-product recovery power gas plants.....	135
The South Staffordshire Mond Gas Company.....	135
Producer-gas, and by-product recovery plant.....	137
Recovery plant.....	137
Steam boilers.....	137
Blowers.....	138
Producers.....	140
Superheater.....	140
Rotary meters.....	141
Gas-compressors.....	142
Pumps.....	142
Electric power.....	142
Cleaning of the plant.....	143
Tar plant.....	144
Analyses and calorific value of coal used, and gas produced..	145
Ammonia recovery.....	145
Labour employed for operating plant.....	146
Quantity of fuel used and by-products obtained.....	147
Gas produced and sold.....	147
Financial results.....	148
Cost per 1000 cubic feet of producer gas.....	148
Cost per 1000 cubic feet of gas manufactured.....	149
Selling cost of the gas.....	150
Schedule of charges for Mond producer gas.....	150
For gas used in annealing ovens, and galvanizing—baths or furnaces.....	150
Purposes for which Mond producer gas is used.....	151
Use of Mond gas for gas engines.....	152
Producer gas for steam raising.....	153
The Langwith By-Product Recovery Company, Ltd.....	154
Producer plant.....	154
Circulating pumps.....	154
Boilers.....	155
Tar and pitch recovery.....	155
Analyses of fuel used and of gas produced.....	155
Coal supplied during the first two weeks in November, 1912	156
Coal supplied during the last two weeks in November, 1912.	156
Quantity of ammonium sulphate produced.....	157
Production of pitch.....	158
