

Was So Bad With Heart and Nerves Could Not Sleep At Night.

Many men and women toss night after night upon a sleepless bed. Some constitutional disturbance, worry or disease has so debilitated and irritated the heart and nervous system that they cannot enjoy the refreshing sleep which comes to those whose heart and nerves are right.

Mrs. John Gray, Lime Lake, Ont., writes: "Last summer I was so bad with my heart and nerves that I couldn't sleep at night. There was such a pain and heavy feeling in my chest that I could not stoop, and at times I would become dizzy and have to grasp something to keep from falling. I tried different things but never got anything to do me any good until I tried Milburn's Heart and Nerve Pills and I can now recommend them to all troubled as I was."

Milburn's Heart & Nerve Pills are 50 cents per box, or three boxes for \$1.25, at all dealers, or mailed direct by T. A. T. Milburn Co., Limited, Toronto, Ont.

Alloway Lodge Stock Farm

SOUTHDOWNS.—Do you want a fine-fitted Southdown to win out with at the shows, and to put some good new blood into your flock? I am now taking orders, and you will advantage in ordering early. I guarantee to please you, and at reasonable prices.

AUGUS.—The first offering since founding the herd. Bulls and heifers for sale of showyard quality, and the choicest breeding.

COLLIES.—That win at the shows and make excellent workers.

Shropshires and Cotswolds

I am now offering for sale 25 shearing Shropshire rams and 15 shearing ewes, nearly all from imported ewes and ram. Also the best lot of lambs I ever raised. Am fitting some of all ages for showing. Prices very reasonable.

JOHN MILLER, Brougham, Ont.
Claremont Stn., C. P. R.

Oxford Down Sheep, Shorthorn Calves, Yorkshire Hogs.—Present offering: Lambs of either sex. For prices, etc., write to John Cousins & Sons, Harriston, Ont.

Travelling Inspector (after severely cross-questioning the terrified class)—"And now, boys, who wrote 'Hamlet'?"

Timid Boy—"P-p-please, sir, it wasn't me."

Travelling Inspector (the same evening to his host, the squire of the village)—"Most amusing thing happened to-day. I was questioning the class, and asked a boy 'Who wrote Hamlet?' and he answered tearfully, 'P-p-please, sir, it wasn't me.'"

Squire (after loud and prolonged laughter)—"Ha! Ha! That's good; and I suppose the little scamp had done it all the time."

QUESTIONS AND ANSWERS. Miscellaneous.

LIGHTNING-ROD MANUFACTURERS.

Can you tell me how many manufacturers of lightning-rods there are in Ontario, and their addresses? J. D.

Ans.—No.

HANDLING A VICIOUS BULL.

What is the best way to handle a bull that is disposed to be vicious? J. C.

Ans.—Generally, the wisest way is to hand him over to the butcher, as an animal of this class is never safe to trust, but if he be one that has proved an extra good sire, and it is considered desirable to retain him in the herd, the simplest and safest way is to blindfold him, which certainly takes all the conceit out of a blusterer, and renders him as meek as Moses. A broad bandage of double sacking securely fastened over his eyes, and to his horns, if he has any, may serve the purpose in ordinary circumstances. The same device also answers admirably in handling a nervous or excitable cow or heifer.

LUMPS IN COW'S TEATS.

A cow does not give milk from two of her teats. She is young, and in good, healthy condition. She calved one week ago. I tried allowing the calf to suck, but had no effect. In one of the teats there is a lump about the middle of the teat, between the point and the udder. The other teat is natural, but has an obstruction like a cord or growth where the teat joins the udder. The udder does not appear swollen nor hard. H. M.

Ans.—The careful use of a milking tube, which you can obtain for 10 or 15 cents from a druggist, might prove useful in getting the milk away, but operations for such troubles are not often of permanent nature. In the end, such cows generally have to be fattened. See "The Farmer's Advocate" of April 27th, page 738, for a peculiar case of this kind, "Obstructed Milk Flow."

TWITCH GRASS.

Find inclosed a weed which I want to exterminate. A. W.

Ans.—So far as we can tell from the small, dried specimen sent, the plant appears to be twitch grass, that common perennial whose shallow, but wide-spreading, fleshy rootstocks fill the upper surface of the soil with a matted mass, sending up new plants every little distance and forming a growth that chokes out more desirable plants. Perhaps the best method of eradication is to let the rootstock exhaust its substance in the production of a hay crop, which should be cut and removed before it comes into bloom. Then plow shallow and cultivate. It is a common practice to rake up and burn the roots after they have been brought to the surface with a cultivator, but another and probably a better way, is to cultivate repeatedly with some implement that will prevent the plants appearing above the surface. Such cultivation must be prolonged and thorough. Buckwheat is a good smothering crop to finish the work.

A HORSE DEAL.

1. Suppose two horse-buyers drive into your yard, take a notion to a horse, ask how old he is and how he is bred, and how much money for him, and we agree on \$180, and they pay the money and lead him away. He turns out balky, is a cribber, and subject to colic. I knew that before he went away, but they asked no questions along that line. Can these men return the horse in the course of two weeks and demand their money?

2. What good will the June bugs do, and what blessing will they bring; or, perchance they are not the farmer's friend, what bad results might we expect?

3. When would be a good time to sweep down spiderwebs to give the best results? Give us a short description of the way they breed and bring forth their young, and so on. W. M. J.

Ans.—1. Yes, of course, they can demand their money back, but on this statement of the case, getting it would be another story.

2 and 3. We pass these questions on to Dr. Chas. Gordon Hewitt, the Dominion Entomologist.

Rupture Cured Without Operation

No Hospital or Doctors' Bills; No loss of Time from Work, and Not a Single Penny to Pay if You Don't Get Better.

No longer any need to drag through life in the clutches of rupture.

No operation, no big expense to stand in your way. And not a single cent's worth of risk. Think of that!—you who have spent dollar after dollar without finding a thing that has done any good. You who have been afraid that some day you'd have to risk the dangers of operation—you who dread the surgeon's knife because you know it results in permanent weakness or death about as often as in recovery.

In the last 24 years more ruptured people have been cured without operation than by all the operations ever performed.

Cured without being in bed a single day—without losing a single hour from work.

Cured by the wonder-working Cluthe Truss (Cluthe Automatic Massager)—something so remarkably beneficial that in 99 cases out of every 100 relief is immediate, and in most cases, cure begins at once. For this is far more than a truss—far more than merely a device for holding the rupture in place.

Try It at Our Risk.

We have so much faith in the Cluthe Truss that we are willing to let you prove, by trying it at our risk, just what it will do for you.

If it fails to hold your rupture securely in place, when working and at all other times—if it doesn't do you a world of good—then it won't cost you a single cent. All guaranteed in writing.

Cure Takes Place While You Work.

A Cluthe Truss—right from the first day—will put an end to all danger of your rupture coming out.

Trusses Like These Are a Crime.

And, in addition—while you go on working, remember—it soon overcomes the weakness which is the real cause of rupture.

Does it by massaging the weak ruptured parts—All entirely automatically.

And this stimulating massage strengthens just as exercise strengthens a weak arm—in most cases soon makes the ruptured parts so strong that no sign of the rupture is left.

That is how the Cluthe Truss has cured some of the worst cases of rupture on record—cured many of them after everything else, including operation, had proven utterly useless.

Free Book Tells All About It.

So that you can judge for yourself, we want to send you—free—our cloth-bound book of advice.

It sums up all we have learned in 40 years of day-after-day experience. It deals with rupture in all its forms and stages; explains the dangers of operations; puts you on guard against throwing money away.

And it tells all about the Cluthe Truss—how little it costs—how it ends all expense—how it is water-proof—how it has no springs, band, belt or elastic around your waist, no leg-straps, nothing to pinch, chafe, squeeze or bind. And how you can try a Cluthe Truss entirely at our risk.

Write for the book to-day—don't put it off—this book may be the means of adding many years to your life and of restoring you to full strength and usefulness.

Simply say in a letter or postal: "Send me your book." In writing us, please give our box number.

Box 109 — CLUTHE INSTITUTE

125 East 23rd St. New York City

The minute it takes to write for this book may free you from suffering for the rest of your life.

STOP! LOOK!! READ!!! FAIRVIEW SHROPSHIRE!!!!
