

Mix Your Own Fertilizers

Don't waste money on imported mixtures. You have no guarantee of their strength—and besides, you must pay heavy duty. We are the only house in Canada selling straight fertilizing chemicals, of guaranteed analysis.

Vanco

- MURIATE OF POTASH —guaranteed 50% actual Potash
- SULPHATE OF POTASH —guaranteed 48% actual Potash
- NITRATE OF SODA —guaranteed 15% Nitrogen
- ACID PHOSPHATE —guaranteed 14 to 16%

The "Vanco" Book will help you a lot in mixing your own Fertilizers. Write for a copy.

148-158 Van Horne St., TORONTO.

"Baker" Wind Engines

Are built for hard, steady work, and keep at it year in and year out.

It is the reputation which "BAKER" Wind Engines have fairly won and steadily held ever since their first appearance on the market, 30 years ago, that should be considered. They are famous for their durability, simplicity of construction and easy running. "BAKER" Wind Engines are so designed that the gears cannot wear out of mesh. The wheel is built on a hub revolved on a long stationary steel spindle, requiring no babbitting. It has a large number of small sails which develop the full power of the wind and enable them to pump in the lightest breezes. Has ball-bearing turn-table and self-regulating device, and all the working parts are covered with a cast shield, protecting same from ice and sleet. The above is only a few of the many features that have placed "BAKER" Mills in the lead. Let the H.-A. Co. agent give you complete information, or write direct for booklet.

We make a full line of Steel Towers, Galvanized Steel Tanks, Pumps, Pneumatic Water Systems, Spray Pumps and Gas and Gasoline Engines.

Light Draft Deering Drills Sow Seed Evenly at the Right Depth

PLANT wheat, rye, flax seed or any other small grain with the Deering Drill. Ten minutes after you are through with the small grain you can change to plant corn, peas, beans or other large seeds, with the same Deering. The Double Run Force Feed makes this possible—one run with large opening and one with a smaller opening. There are other Deering features. For example, the disk bearings on Deering Drills are practically dust proof. The oil comes in contact with the inner edge of the bearing surface first, oiling from the inside toward the outside. Instead of allowing dust or dirt to work in, the outward path of the oil and constant supply tend to force out any grit or dirt which may have worked into disks when not needed, saving wear and draft. Deering Drills are made with 11 or 13 disks. On the 13-disk drills, the feed is divided into two parts so only one side need be used at the end of the field, saving seed. On special order, a complete Deering tillage line, including disk, spring scufflers, seeders and land rollers, merits your attention. See the Deering agent in your town, or, write to the nearest branch you desire.
