

The Farmers' Market

Farmers' Market Letter

Office of the United Grain Growers Limited, Winnipeg, August 5, 1918.
There is very little change in wheat prices since the July delivery period. The market is still very quiet, and there is no sign of a recovery in the price of wheat. The market is still very quiet, and there is no sign of a recovery in the price of wheat. The market is still very quiet, and there is no sign of a recovery in the price of wheat.

Breeders' Notes

Manitoba Breeder Buys Head Header

Shorthorn breeders of Western Canada will be interested to know that John Barron, of Carberry, Man., has recently purchased a head header at a sale of Robert Miller of St. Bonville, Ont., the bill, Lancaster Lord.

Prof. G. E. Day, of Guelph, Ont., sold representative of the Dominion Shorthorn Breeders' Association, has been in Western Canada during the past few weeks attending the shows and doing publicity work in Canada.

Peritonitis in Colt

Q.—A mare with six-day-old foal was in a band of horses that were being corralled and in the chase became excited and fell on her side. The next morning the foal had died. The mare was killed and the foal was autopsied. The result was peritonitis. We gave it a dose of castor oil and bled the night. A post mortem revealed a congested condition of the lining of the stomach. Kindly give probable cause of death.—A.T.B.

A.—Your description of the manner in which this colt became sick and the symptoms is manifested and its appearance on being opened after death are all very characteristic of Peritonitis. This consists of an extensive inflammation of the surface of the bowels and the lining membrane of the belly. When this occurs there is an exudate formed which fills up the abdomen with a quantity of fluid. The cause of the colt becoming affected would very likely be the result of it being over-exerted and possibly over-heated. Treatment of a case of this kind is, as a rule, not very successful. The usual remedy being small doses of sweet Nitre and the application of hot cloths to the belly.—Dr. C. D. McMillan.

Enough Coal Coming

John T. Stirling, fuel administrator for Alberta, has written H. Higginbotham, secretary of the U.F.A., as follows:—

"With reference to fuel situation, have to inform you that the mines have increased their output very considerably during the last few months, but, of course, you will realize that it is impossible for them to take care of all the orders which they are receiving at one time. If people will be a little more patient I am quite satisfied that there will be more coal available than is required within the next two months."

"We started in May advising people to put in fuel, but it would appear that it is only within the last three or four weeks that they have realized the necessity of doing so. I am quite satisfied that before the end of this year the mines will be working slack time for lack of orders."

Pork Restriction Removed

The Canada Food Board has removed, temporarily, the restriction on the consumption of pork. Such action has been made possible by the pork production and conservation efforts in Canada and the United States, and the Food Board's Order, passed today, provides that pork, including bacon and any part of the carcass, may be served at any time in public eating places operating under Canada Food Board license.

In making this announcement the Food Board stated that, as a result of conservation measures and increased production, net exports of pork from the Dominion have been increased by 125,000,000 pounds per annum, which is an increase of 571 per cent., over a five-year pre-war average.

The farmer has jumped to the front as the largest owner of automobiles in Ontario. Of the 78,861 cars in the province, 25,406 are owned by farmers, while 14,825 are owned by manufacturers and merchants. Of the total ownership in the province, 47,337 cars are owned by people in the rural communities, while 31,998 cars are owned by city people.
