the last Monday of every month

TEMPERANCE IN ITALY

A very lengthy and interesting report is published in the "Contro L'Alcoholismo" of Milan, detailing the first year's work of the Italian National League Against Alcoholism. A provisional Committee with Ing Domenico Pastorello as Secretary, was formed in August, 1921. An appeal was issued to friends of the movement throughout Italy, in response to which large numbers of adherents were obtained, including Senators, Deputies, Lord Mayors of some of the great towns, University Professors, Lawyers, Doctors, Schoolmasters and others. The League was then formally established. The list of subscribers includes seven Provincial Governments, 14 Municipalities, and a large number of scientific and other so-cieties. Nearly 9,000 lires having been subscribed. The report sets out the programme of the League, which includes the absolute Prohibition of all distilled liquors and adulterated wines, a rigorous application of the restrictive law of 1913, power to be given to local authorities to frame and enforce restrictions against located at Point Tupper could be utilized the sale of alcoholic liquors, protection of the new industry to utilise non-alco-holic products of the vine, and anti-

ODE TO A PIG

As near as I remember, It was late in last September I was strolling down the street maudlin pride, With my heart all in a flutter, lay down in the gutter, And a pig came up and lay down by, my side.

While I lay there in the gutter, A lady passing by was heard to say: "You can tell a man that boozes By the company he chooses,' And the pig got up and slowly walked

MERRY MAY

Merry, rollicking, frollicking May Into the woods came skipping one day: She teased the brook till he laughed outright.

And gurgled and scolded with all his

She chirped to the birds and bade them sing

A Chorus of welcome to Lady Spring; And the bees and butterflies she set set To waking the flowers that were sleep

ing yet.
She shook the trees till the buds looked To see what the trouble was all about,

And nothing in nature escaped that day The touch of that life-giving, bright

CORRUPTION AND JOBBERY IN EVERY DEPARTMENT OF THE PUBLIC SERVICE

tant purpose of helping to swell the dividens of the Harris Abattoir people.

Dr. LeBlanc also stated that the whole EVERY DEPARTMENT OF THE PUBLIC SERVICE

(From our Special Correspondent) Echoes from recent session of House Assembly, Halifax, May 10th, 1923.— The growing arrogance with which the Provincial Government treats matters generally and particularly the interests of constituences which happen to have elected opposition members, is becoming more glaring year by year. This is due to a growing sense of perpetual proprietorship acquired from nearly half a century of continuous office holding by a govern-

ment of one political stripe.

On learning that a liberal government had been in power for nearly 40 years in Nova Scotia, a British Statesman ex-claimed "Is there no public sentiment in ly this is not the case. It is due to a lamentable indifference to the political interests of our own Province and too large a reservoir experiment of the whole people Not so with a machine administration—party expediency stands before every thing else. arge a response to graft and political

atronage.

The ballet box opens up the vital interests of our Province for practical considerations, and these interests should be considered before everything else. Our great need is the enthusiasm of our great need is the enthusiasin of practical living moving men to cope with the great problems of industrial commercial and social progress in a practical enemy. He should be their greatest promercial and social progress in a practical living moving world. The sane sober minded men and women of Nova Scotia cannot go on allowing the interests of this Province to be sold and resold for

Provincial Political Machine for any-thing but party advantage was brought to the attention of the House of Assem-bly by Dr. LeBlanc of Richmond.

On the announcement sometime ago that the Government was going to establish a ferry service from Mulgrave to Port Hawkesbury a petition was sent from the people from Richmond County asking that this ferry should make a landing at Point Tupper for the accomodation of Richmond County travellers. This would meet a much felt need and be a great source of convenience and a saving in time and money to many in-habitants of Richmond County. But this county was evidently black listed by the government for the unpardonable sin of having elected two opposition members. (

This would have been an easy and

comparatively inexpensive request to have granted as the old Dominion Wharf and could be put in repair at very little

of the new industry to utilise non-alcoholic products of the vine, and antial alcoholic education to be given in all public schools, colleges and universities.

Professor Dr. Amaldi of Florence dealing with the wine consumption in Italy, states:—"The alcoholism which threatens Italy is alcoholism provoked by wine consumption. The action of wine on the husman organism is, on the whole, just as harmful as spirits, its social effects are ment Creamery there which was built at human organism is, on the whole, just as bit of political patronage. The Govern-harmful as spirits, its social effects are ment Creamery there which was built at a cost of some \$50,000 serves the impor-

Dr. LeBlanc also stated that the whole ferry system of Nova Scotia should be reviewed. This service had become a glaring system of graft. He knew of individuals paid for operating ferries who did not even have a vote and had not ferried a single passenger for years. He said that the Highways Board had undertaken the direct supervision of some ferries, not from motives of efficiency and economy but to get more some terries, not from motives of efficiency and economy but to get more direct control over the patronage. Men were being kept on where bitter complaints had been lodged against the operators by the public.

The first enquiry of the poli ical machine is not what useful purposes to the

chine is not, what useful purpose to the public can be served, but what party advantage can be gained. When the Nova Scotia?" If this were the result of elections are over a real governmen well placed confidence it would be a looks upon itself as representative of the material interests of the whole people.

A PLEA FOR BIRDS

Ere long we shall have the return of us in Winter and it is therefore in order to put in a plea for their better protec tector and friend-because he is their greatest beneficiary. For both aestheti mere mess of pottage.

One of the many illustrations that might be cited, of the disregard of the Provincial Political Machine for any their preservation. Over a half billion that might be cited to the disregard of the provincial Political Machine for any their preservation. Over a half billion to the provincial provincial political machine for any their preservation. dollars' worth of farm and forest pro-ducts is destroyed each year by insect pests. Timber interests lose a hundre million; cotton planters sixty millions and the grain crop suffers a loss of two hundred million dollars. These are Government figures and demand consideration! Birds can prevent this huge loss if given a chance. One insect-eating of these pests daily. A chickadee aver ages more than 300 insects a day, a tanager destroys large numbers of gypsy
