**DR. ARTHUR B. COBB**  
 Dentist

The most REMARKABLE thing  
 about this modern Dental estab-  
 lishment is that every Dental op-  
 eration is performed by a Dentist  
 who has specialized in just that  
 particular branch of Dentistry.

Dr. Cobb personally supervises the  
 extractions; and his method, per-  
 fected by twenty-three years of  
 experience renders the operation  
 painless in normal cases.

There are also Specialists here  
 who devote their entire attention  
 to Crown and Bridge work with  
 the natural result that their work  
 gives complete satisfaction and  
 gratification.

The most ASTONISHING thing  
 about this exceedingly modern  
 Dental establishment is that the  
 patient has all the benefits of  
 Specialized treatments at such ex-  
 tremely moderate charges.

There is no charge for examination  
 and the patient is told at that time  
 just what the completed work  
 will cost him.

The residents of the Western Hill  
 are looking forward to a rare treat  
 Thursday night when the Cantata  
 "Madam Jarley's wax works" will be  
 produced at the Parish Hall of Christ  
 Church under the auspices of the  
 Ladies Aid. Every person who possi-  
 bly can should attend as the proceeds  
 go for a specially good cause.

The Trade Commission is taking up  
 a policy which may be stated as fol-  
 lows: First, to encourage consump-  
 tion in Canada of Canadian produce  
 and products; to a much greater ex-  
 tent; second, to increase the exports  
 particularly of manufactured articles.

**Contagious Abortion Makes Necess-**  
**ary the Sale of Valuable Animals**  
**at a Sacrifice.—The Disease,**

**ment as Explained.**

**A PULLET** requires more feed  
 than a hen. If it is intended  
 that the pullet produce eggs  
 A bird-to-lay well must have  
 a surplus of feed over and above  
 body maintenance. The excess of  
 feed above body maintenance goes  
 either towards growth, fat, or egg  
 production.

Poultry feeds are divided into two  
 classes: one, whole or cracked grains,  
 commonly called scratch feed, and  
 the other, ground grains, commonly  
 called mash.

Scratch feeds are generally fed  
 night and morning and are scattered  
 in straw in order to induce the birds  
 to scratch or take exercise. A mix-  
 ture of two or more kinds of grain  
 usually gives better results than one  
 single grain, largely because indi-  
 vidual birds' appetites vary from day  
 to day. A good mixture for the win-  
 ter months might contain as much  
 as fifty per cent. good corn, either  
 whole or cracked; if corn should not  
 be had, and the birds were accus-  
 tomed to eating buckwheat, the  
 buckwheat would answer nearly as  
 well, or one could use twenty-five per  
 cent. whole or cracked corn and  
 twenty-five per cent. corn. To the corn or buckwheat  
 could be added twenty-five per cent.  
 of barley, ten per cent. of wheat  
 screenings, and fifteen per cent. of  
 good oats. If one was obliged to do  
 so, almost any of the grains could  
 be fed alone with the exception of  
 oats. There is too much hull or husk  
 on oats to use entirely as a single  
 feed.

At present for a mash feed, if  
 we are using the standard hog feed, if  
 the ground grains are to be fed,  
 shorts, barley meal, and ground oats.  
 Corn meal could be used in the place  
 of the barley or with it. If one is  
 short of green feed or roots, it would  
 be well to add a part of bran. Per-  
 haps the simplest mash to feed from  
 an open hopper is rolled or crushed  
 oats. We have used this when the  
 birds had milk to drink, for a num-  
 ber of years with excellent results.

Laying hens require plenty of  
 green feed. Cabbage is one of the  
 best green feeds. Roots are very  
 excellent, but clover leaves should be  
 within reach as well as the roots.  
 Sprouted oats are used to a large  
 extent on poultry farms. When the  
 birds get accustomed to a green and  
 succulent food it is generally wise  
 to give them all they will eat. A pen  
 of fifteen pullets will eat a fair-sized  
 head of cabbage almost every day  
 or one hundred hens will eat a peck  
 of sprouted oats day after day.  
 Grit and shell should always be  
 within easy access.—Prof. W. R.  
 Graham, O. A. College, Guelph.

**Abortion Should Not Be Neglected.**

Some cases of abortion are the re-  
 sult of injury to the dam due to a  
 fall or bad kick. In such cases the  
 trouble is not likely to spread to  
 other members of the herd. With  
 the majority of abortion cases, however,  
 the trouble is due to an infectious  
 disease which is very readily spread  
 to other members of the herd.  
 The disease apparently is localized  
 almost entirely to the uterus. Here  
 an inflammation is produced which  
 may result in the expulsion of the  
 foetus, dead or alive, at any period  
 of gestation. In most cases of infec-  
 tious abortion, however, the foetus is  
 expelled dead. A frequent complica-  
 tion of such a case is the retention  
 of the foetal membranes by the dam.  
 If these are not removed after a few  
 hours, death from blood poisoning is  
 almost sure to occur.

The bacilli which cause the disease  
 are present in large numbers in the  
 fluids, foetal membranes and foetus.  
 Consequently, every care is necessary  
 to prevent these from contaminating  
 anything with which other stock is  
 likely to come in contact, either di-  
 rectly or indirectly. All should be  
 gathered up carefully and burned or  
 else buried deeply in quick lime.  
 Then the hands and clothes of those  
 in attendance should be thoroughly  
 washed with a disinfectant, and a  
 strong disinfectant used freely all  
 around the stall, particularly on the  
 floor.  
 The dam should be kept in a stall  
 by herself, as there will be a fluid  
 discharge from the vulva which may  
 last for weeks. Disinfectants  
 should be freely used in the  
 stalls, and the external genitals,  
 thighs, tail and back of udder  
 should be washed daily with a satis-  
 factory disinfectant solution. For  
 this purpose a two-per cent. solution  
 of lysol is strongly recommended.  
 Strict attention should be paid by  
 the attendant to the thorough dis-  
 infection of his hands or other parts  
 of his person or clothes after han-  
 dling the patient.

The dam should not be bred again  
 until some weeks after all discharges  
 from the vulva has stopped.—Prof.  
 D. H. Jones, Ontario Agricultural  
 College, Guelph.

The Coroner's inquest to enquire  
 into the death of the infant girl who  
 was drowned in the old canal near  
 Merriton will be resumed at the Pol-  
 ice Station to-night.

**DUTCH PRESS SHOWS**  
**GERMAN TENDENCIES**

Amsterdam, May 13.—The comment  
 of Dutch newspapers on the Peace  
 Treaty is generally unfavorable. The  
 Handelsblad calling it "a crime  
 against Germany and a blow all  
 against humanity." The Nieuw Rot-  
 terdamsche Courant says: "The  
 treaty does not end the war; it con-  
 tinues it forever." The Telegraaf, on  
 the other hand, has this comment:  
 "Germany is treated with terrible se-  
 verity, but really did not deserve a  
 better fate."

**PREDICTS BUSY SUMMER**

Following the unprecedented rush  
 for the winter resorts in the south,  
 summer resort hotel people in Onta-  
 rio are looking forward to a big  
 summer business. Proprietors and  
 Managers of hotels throughout the  
 Lake of Bays District, express the  
 opinion that the summer of 1919  
 will mark a record in the popularity  
 of this north section. Many are al-  
 ready making extensive improvements  
 in anticipation of unprecedented  
 trade. They point out that the war is  
 now over and the beauties and soli-  
 tudes of nature so vividly exemplified  
 among these lakes will offer a tremen-  
 dous appeal to those in search of quiet  
 and rest. The Waves Hotel at Norway  
 Point, will open its season on June  
 28th. Mr. A. P. Thompson of Bermuda,

 and novel ideas all for the comfort and  
 care of his guests. Illustrated descrip-

**A Reo Owner Says It**  
**Better Than We Could**

**ASKED HIS OPINION** as to the relative merits of various competing  
 makes of automobiles, a Reo owner after a moments thought said:—  
 "THERE ARE MANY good automobiles—but the man who owns  
 a Reo is lucky!"

**YOU KNOW THAT WORD** "lucky" has come to have a new  
 significance of late—since our boys over there used it.

**TO BE "OUT OF LUCK"** was their way of expressing any tragic  
 or difficult or aggravating condition. It might be the result of bad  
 judgment or bad conduct or just chance, but they covered it all by  
 the one expressive term "out of luck."

**THIS AUTHORITY WAS RIGHT**—used in that sense the owner  
 of a Reo is always lucky.

**HE ALWAYS GETS THERE**, though his friend in some other car  
 stop by the whyside.

**NEXT TIME YOU HEAR** a motorist in trouble exclaim, "just my  
 luck"—repeat to him what that Reo owner said.

**GOOD LUCK** in the ownership of a good automobile is the result of  
 good judgment in selecting the right one when buying.

**IT IS EASY TOO** to determine which is the best car in any size or  
 price class. Just ask owners. And ask garage men—ask anyone  
 who knows, to name the two best, and, as one of them he will  
 name Reo.

**THEN NOTE** how much oftener Reos are mentioned than any other  
 comparable car—follow the suggestion, and you can be lucky too!
