**MARKET REPORTS**

indicate that there is no surplus of Anthracite Coal in the U.S. The shortage caused by the strike of Anthracite Miners last year has not been made up, and American hard coal will, in all probability, be hard to get and high priced. Coke is an excellent substitute for hard coal, and we have on hand a stock of same that will soon be disposed of, because a shortage of hard coal invariably creates an increased demand for our product.

We advise our customers to book their requirements as soon as possible.
