**IMPORTANT NOTICE.**  
THE Subscriber in returning thanks to the in-  
habitants of Saint John and vicinity for the  
very liberal patronage bestowed on him during  
the last seven years, takes this opportunity of notifying  
the public that he has removed to the Old Post  
Office Building, Prince Street, which he has  
fitted up with new and improved Machinery for the  
manufacture of Brass work in general, and hopes  
by strict attention to business, and moderate  
charges to receive a large share of patronage.  
CHARLES PEARCE.

**CHARLES PEARCE,**  
PLUMBER, GAS FITTER AND  
BRASS FOUNDRY,  
No. 2, (Old Post Office Building),  
PRINCESS STREET.

HOUSE and Ship Water Closets, Force, Deck  
and Lift Pumps; Warm and Cold Show-  
ers, Bath Boilers, Ship's Stoppers, Lead Pipe  
and Sheet Lead, Hydrants and every description of  
Water and Gas Fittings for Public Buildings, Ho-  
tels and Private Residences.  
ALSO—MANUFACTURER OF  
Gas, Steam and Water Cylinders, Hose Pipes and Cup-  
plings, Oil Cylinders, &c., &c. Gas Solder and Brack-  
ets, Snow Rods for Drop Windows, and all work  
usually done in a Brass Foundry and Finishing  
Establishment.  
N. B.—An inspection of my Brass Castings and  
finished work is respectfully solicited, as they are  
superior to anything in this city. oct 22 de y

**JOSEPH DITTO & CO'S  
PATENT MICA AND FIBROUS  
CEMENT ROOFING.**  
THE Subscriber has been appointed Agent for the  
sale of the above Roofing in this City and Pro-  
vince. This Cement Roofing has been thoroughly  
tested in New York City, and various parts of the  
United States, the Canadas and the Island of Cuba,  
by Architects, Builders, and others, and is pronounced  
a most valuable improvement on any Cement  
yet invented. It is a perfectly reliable Fire and  
Water Proof material, and has demonstrated the  
fact that a Composition Roofing can be made, which  
will successfully resist the action of the Weather  
and Elements. It is adapted to every climate, and  
for its beauty, firmness, durability, fire and water-  
proof qualities, and cheapness, it is UNRIVALLED.  
It is adapted to every sort of Roof, and is put in  
want of constant repairs, as is the case with  
metal or other roofs.  
It is adapted for Railroad Gas, Bridges, Depots,  
Station Houses, Steamboat Decks, Factories, work-  
shops, Saw Mills, &c., &c. The subscriber has  
used it on his own house, King-street, and  
is prepared to send certificates from numerous  
parties in the States and elsewhere who have used  
it.

**CLASSES** 40 puns bright Cienfuegos as Just  
received by  
nov 16 ELKTON DRUGS.

### Poetry.

**THE PICKET-GUARD.**  
[The unutilized practice of shooting pickets  
which has been largely practised on both sides  
during the present civil war,—it is, however, and  
now to be abandoned,—is placed in a strong light  
by the following lines, which we take from an  
American paper.]  
"All quiet along the Potomac," they say,  
"Except now and then a stray picket,  
Is shot as he walks on his beat and to fro,  
By a rifleman hid in the thick."  
"By nothing—private or two, now and then,  
Will not count in the news of the battle;  
Not an officer lost—only one of the men,  
Mousing out all alone, the death rattle."  
All quiet along the Potomac to-night,  
Where the soldiers lie peacefully dreaming;  
The rays of the clear autumn moon,  
Or the light of the watch-fire glowing,  
A tremulous sigh, as the gentle night wind  
Thrusts the forest leaves softly in creeping,  
While stars up above, with their glittering eyes,  
Keep guard for the army is sleeping.  
There's only the sound of the lone sentry's tread,  
As he paces from the rock to the fountain;  
And thinks of the two in the low trundle bed,  
For away in the cot on the mountain,  
His mother falls sleep—his face, dark and grim,  
And he mutters a prayer for the children asleep—  
For their mother—may Heaven defend her.  
The moon seems to shine just as brightly as then,  
That night when the love yet unspoken  
Leaped up to his lips, when love-illumined words,  
Hair Mattresses, in good order;  
Then drawing his sleeves roughly over his eyes,  
He dashes off tears that are welling,  
As if he would not so wondrously forsaking,  
As if to keep down the heart-swelling."  
He passes the fountain, the blasted pine-tree,  
The footstep is lagging and weary;  
As he onward goes through the forest belt of light,  
Toward the shade of the forest so dreary,  
"Hark! was it the night-wind that rustled the leaves,  
Was it moonlight so wondrously flashing?  
It looked like a rifle—'Ha! Mary, good bye!'  
And the life-blood is ebbing and pulsing.  
All quiet along the Potomac to-night,  
While some save the rest of the river,  
The night-fall falls the dew on the face of the dead—  
The night-fall falls the dew on the face of the dead—

### Prose.

represented, or if the admirable fire-clay of the  
same district, and the bricks made from it, are  
among the articles sent for exhibition.  
Of course we must not expect to compete with  
Nova Scotia in the matter of gold, as that Pro-  
vince sends \$10,000 worth, in bars, and nuggets;  
but instead of mere specimens in show cases, we  
should like to see good blocks of our Magnetose  
—our labaster—our gypsum—our nodules of cop-  
per ore—our rich deposits of iron ore, found all  
over the country—our marble—and a variety of  
other specimens of our mineral wealth.  
It is much to be regretted that a Geological  
Survey of New Brunswick had not been con-  
menced long since, that we might now be in a  
position to have exhibited a Geological Map of  
the country, on the present important occasion.  
The Geological Map of Canada, by Sir Wm. Logan,  
and the interesting sections which accompanied it,  
effected much good for Canada, at the Exhi-  
bitions of London and Paris, and had their effect  
in inducing persons to emigrate to that Province.  
At present, we must do the best we can; but we  
sincerely hope that a Geological Survey will not  
be much longer neglected.  
Although not a complete collection, we trust  
and believe that the articles sent will not dis-  
credit New Brunswick so far as they go.  
**God and Hake Fishing in the River Ken-  
nebecook.**  
For some years past it has been known, that  
small Cod and Hake enter the River Kennebec-  
kiss at this season, and continue in it for several  
weeks. They have done so this winter, and  
last Saturday the fishing appeared to be fully  
established at McCoskey's Cove, judging from  
the eagerness of the sportsmen.  
There appeared to be two principal fishing sta-  
tions, the one off a rocky point on the East  
side of McCoskey's Cove, and the other off the  
point of the fishing party at the rocky point,  
it was found that they were fishing through  
ice nearly two feet thick, in fifty feet  
water, and that they were using fresh herrings  
as bait. They were taking a few red rock Cod,  
(*Merluccius rugeus* of Mitchell) and an abundance of  
young Hake (*Phycis Americana*) which were  
biting very rapidly. Some of the boys appeared  
to be fishing for sport only, while some of the  
growth were going on steadily. As if desirous of  
making up a good bag; at 4 P. M. one man had  
carried as much as he could carry. None of the  
caught on Saturday were more than 3 lbs. weight,  
but they were in fair condition, apparently not  
long from the sea. As the season advances,  
they will deteriorate rapidly, for although the  
water in this part of the Kennebec is brackish  
(more so than in summer) yet it is not suffi-  
ciently salt to keep the fish in condition. They  
are supposed to have passed through this lar-  
ge, and entered the river, in pursuit of the  
spawning grounds.  
The other fishermen had screens of white  
spruce trees and bushes to break off the wind,  
and the party at the upper end of the Island  
had also a ere, and seemed very jolly. Some  
boys who had several holes to manage, fastened  
their lines on a spring pole set in the ice along-  
side each hole, and when a fish was hooked, it  
was instantly known by the vibration of the  
pole.  
The distance from the City is but little more  
than three miles, by the winter road to Freder-  
icton, and the scene is a lively one on a fine win-  
ter day.  
The Colonial Presbyterian and the Morning  
News.  
These two great powers having gone to war,  
the "Colonial Empire" declares them belliger-  
ents, and desires to maintain a perfect neu-  
trality.  
After describing the entertainment of the  
troops, in an article marked with three stars,  
the *Colonial Presbyterian* has the following  
with reference to an article which appeared in  
the News—  
"But let us see, have we done any more  
than we should? Has our generosity gone  
one step further than prudence and discretion  
would sanction? We venture to say No! and  
if anything further could be done to cheer  
them amidst the cold and snow of winter, to  
rouse them from sad thoughts of those whom  
they left behind, there are men, ay, and wo-  
men, who would cheerfully do something yet  
for them, and at the same time, by no means  
close their ears or hearts against the cries of  
the needy, despite the worthless and uncalled  
comments of some of the press of this city;  
whose liberality is by no means proverbial,  
and whose remarks were collected by the  
most narrow, sordid spirit; written by a man  
who gave nothing to either of these entertain-  
ments, which he has so unjustly criticised."  
"We can assure those Officers who have offered  
all of that, or other fish-olies, including the superior  
Pollock oil of Campobello and Grand Manan,  
there appears nothing. As a branch of Provin-  
cial Industry, the fisheries are ignored alto-  
gether; and it may be supposed in England that  
we have no fishes in New Brunswick—not even  
shell fish, while our lobsters and oysters are of  
the finest quality.  
We cannot gather from the official list whether  
the bituminous coal of the Grand Lake is well

### Prose.

"We would advise that 'man' who had to do  
with the article in the *Presbyterian* of yesterday,  
marked with three stars, to keep his insinua-  
tions to himself. If he possessed one half  
as much common sense as he does egotism and  
vanity, he would keep a little more in the back  
ground. But we would not think that if he is de-  
termined upon a tilt with the publisher of this  
paper, he shall have it to his heart's content. If  
the attack must be torn aside, then here's for it!"  
Thus we give both sides, and can only say—  
"PUT THAT AND THAT TOGETHER!"  
**Temperance Meeting.**  
On Thursday last, the Military were address-  
ed by the Rev. Dr. Clay at the Institute in the  
afternoon on the effects of Alcohol on the hu-  
man system. Some disappointment was ex-  
pressed at the absence of the Scots Fusilier  
Guards, who were invited by the deputation  
from the Sons of Temperance, that waited  
upon Col. Dalrymple for that purpose. A  
large number of the Royal Artillery were in  
the room, and a representation from the 15th  
Regiment, Mr. Wetmore, Grand Worthy  
Patriarch, was in the chair, and upon intro-  
ducing the lecturer referred to the absence of the  
Guards, as having occurred from misunder-  
standing as to the hour of meeting. Colonel  
Dalrymple having met the deputation in the  
most cordial manner, and stated his intention  
of informing him how many of his men would  
attend.  
Dr. Clay's lecture was listened to with mark-  
ed attention, and possessed additional interest  
from its being illustrated by diagrams, a good  
many of which and Indies were present, and  
upon the conclusion of the lecture three hearty  
cheers and one cheer more were given for  
the Queen.  
W. P. in the chair. The speeches were of an  
entertaining and instructive character, and the  
meeting passed off pleasantly. The Rev. J.  
R. Narraway of the Methodist, the Rev. B.  
Smith of the Congregational, and the Rev.  
Neil Mackay of the Free Presbyterian Church-  
es, and Mr. Skinner, Mr. P. P., being the  
speakers. There was some good congrega-  
tional singing, led by Mr. Marshall. (Mr.  
Aitken presided at the organ.) and the meet-  
ing broke up shortly after 10 o'clock.  
Upwards of 1000 people attended these  
meetings, and the manner in which they were  
conducted throughout has given general satis-  
faction.  
**Natural History Society.**  
A meeting took place in the Director's Room  
at the Mechanics' Institute, last Wednesday  
evening, of an unusually interesting character.  
The names of the gentlemen present were taken  
down, and they amounted to forty three in all.  
Among them were clergymen, barristers, medi-  
cal men, merchants, several intelligent mechan-  
ics, and a number of young men who have of late  
turned their attention to the study of the natural  
sciences. Dr. Eastford was called to the chair,  
and Mr. Matthews was requested to act as Sec-  
retary.  
The meeting was first addressed by the talent-  
ed and worthy Chairman, who stated that it had  
been called together for the purpose of forming  
a Society of Natural History, as well to pro-  
mote that particular branch of science, as other  
of the Natural Sciences. He pointed out clearly  
the necessity for such an institution in various  
points of view, and in what manner it would tend  
to advance the general interests of the Province.  
The meeting was subsequently addressed by  
the members and followers of the several resolu-  
tions, which are as follows—  
Moved by William Jack, Esq.; seconded by J.  
W. Lawrence, Esq.—  
1. Whereas: In the opinion of this meeting it  
is highly desirable that greater efforts should be  
made for the promotion of science in the Pro-  
vince, and for the development of our Natural  
resources—and that for the furtherance of these  
objects, as well as to provide a medium of com-  
munication with scientific associations in other  
places, and to derive greater benefit from the  
labours of individuals in the Province, it is impor-  
tant that a Scientific Association should be or-  
ganized in this City—  
Resolved—That such an Association be formed,  
and that it be called "The Natural History So-  
ciety of New Brunswick."  
Moved by W. P. Dole, Esq.; seconded by W.  
M. Morris, Esq.—  
2. Whereas: There is not in this City any Pub-  
lic Library of standard Scientific works, and to  
carry out the object in view, such a Library is  
required—It is further  
Resolved—That it shall be one of the efforts of  
this Society to form a collection of Books of a sci-  
entific character for the use of the members.  
Moved by H. W. Perley, Esq.; seconded by R.  
P. Starr, Esq.—  
3. Resolved—That it is in the opinion of this  
meeting desirable to afford to residents, and also  
to strangers visiting the Province, facilities for  
seeing and studying its natural objects and pro-  
ductions. It should be another special aim of  
the Society to form in connection with it, such a  
collection of specimens in the different branches  
of scientific research as shall fully illustrate the  
Natural History of our Province, and, as far as  
possible, of other countries.  
Moved by H. W. Firth, Esq.; seconded by Ed-  
ward Allison, Esq.—  
4. Resolved—That in order to carry these views  
into effect, a committee be now appointed to pre-
