

A Simple Proposition

Here is the McClary Sunshine Furnace proposition.

McClary's heating engineers will give you advice and estimates of cost of correct heating plant free. When you purchase a Sunshine Furnace, McClary's engineers will provide you proper plans for installing it the McClary way by which they will guarantee satisfactory results.

MILK FLOW DECREASING

Flies, Drought and Heat Cause of Trouble.

Suggestions for Most Profitable Care of Dairy Cows and Calves—August Ploughing and September Cross Ploughing Kills Grubs and Worms in Old Sod.

(Contributed by Ontario Department of Agriculture, Toronto.)

DURING the extremely hot weather, cows and calves frequently suffer, sometimes needlessly, from three things—effects of high temperature, lack of water, and from torment by flies. A great mistake was made in the older parts of Ontario, when practically all the trees were cut down, thus leaving no shade for cattle and other live stock. When the late Prof.

tween the dates of harvesting and seeding. Those growers who have old wheat of good quality should save it carefully for seed purposes. Special efforts should be made to thresh as much of the good wheat of this year's growing at as early a date as possible. Farmers having more seed than is required for home use or for sale to neighbors would undoubtedly receive a good demand by advertising in either the local or the agricultural papers. Tests should be made of the germination of both the old and the new wheat. Strict economy of winter wheat for seed purposes this autumn is essential.—Dr. C. A. Zavitz, Ontario Agricultural College, Guelph.

Young Officers Honored.

Fifteen Canadian officers received Military Crosses recently, and when their names were gazetted, it was discovered that their average age was 25 years. Eight of the officers had previously served in the ranks and received their commissions after seeing service as privates in France.

A Museum for Horses.

A Fight for Life

It has been fight or die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's, called "An-u-r-i-c." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as diabetes or stone in bladder.

To overcome these distressing conditions take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal take Anuric (double strength). You will, in a short time, find that you are one of the firm indorsers of Anuric.

Hamilton, Ont.—"For kidney ailments I have never known any medicine to equal Anuric. When I started to take it I was very miserable with lame back, pains in the cords of my neck and shoulders and all over my body. The water was high colored and offensive. All of these conditions left me after one week's use of Anuric and I consider it to be the greatest of all kidney medicines."—MRS. JENNIE CLARK, 79 Queen St. So.

Toronto, Ont.—"My husband suffered severely with pains in his back for three or four weeks. He commenced to take Anuric and in three or four days he not only looked better, but remarked that his back felt much better, and now he says that his pain has all gone. It is with pleasure that we recommend Anuric."—MRS. MARY RYAN, 54 Seaton St.

Fish is the only food which has not risen in price, and the wise house keeper will take advantage of this fact.

When Winter Comes

A "Snowmobile" used in the Maritime Provinces

DOWN in the Maritime Provinces the Canadian Fords wear snow shoes. Here is a Ford "Snowmobile" all set for a hard winter. Proof that it will get over the roads no matter how high the drifts may be is furnished by Captain Donald McMillan, the famous Arctic explorer, who was first to use a "snowmobile" in the Far North. With his Ford thus equipped he travelled nearly two thousand miles over ice on one expedition, at the rate of twenty-five miles an hour. This, of course, is far better than dogs can do in ordinary circumstances. The McMillan "snowmobile" has a tractor tread and runners.

A Model A Ford such as that

shown in the accompanying illustration, is used by a lumber concern in the Maritime Provinces. It travels regularly over a rough wood road at ten miles an hour. Another used by a large hotel, has accomplished a speed of twenty-five to thirty miles an hour with ease on well built roads on which, however, three or four feet of snow has accumulated.

The "snowmobile" has skis where the front wheels ordinarily would be. Heavy chains furnish traction for the rear wheels no matter how deep the snow may be. A Ford dealer has just reported that one such car regularly carries five passengers over a wood road to a lumber camp.

Fall Term from Sept. 3rd

CENTRAL
Business College
WATFORD, ONT.

The call for trained help is greater now than ever before in the history of Canada. Our graduates are securing splendid positions. We have Commercial Shorthand and Telegraphy Departments.

If you purpose taking a business college course during fall or winter months, write now for our free catalogue.

W. J. Elliott, President.
D. A. McLachlan, Principal.

twenty-five cows and may be appraised with a brush or cloth. If there is no rain it will keep the flies off for several days. Milkmen must be careful not to get this on the hands, nor allow hairs to drop into the milk pail, as it will taint the milk. It is safer to apply after milking.—Prof. H. H. Dean, Ontario Agricultural College, Guelph.

What About Seed Wheat This Year?

Good seed of the most desirable varieties of fall wheat is sure to be scarce this autumn. The most of the winter wheat in Canada is grown in Ontario, and the acreage sown in this province last autumn was less than usual. Over fifty per cent. of the crop was winter killed. In numerous instances the wheat which was not ploughed was re-sown with other grains either over the whole areas or in patches. Owing to the scarcity of labor it may be difficult to thresh the grain from the good fields be-
