

SEASON OF 1920
The Standard Bred Trotting Stallion
JOHN WHITLEY
1813 (6279)

Will stand for mares at his own stable, Watford, all week.

PEDIGREE

Sire—The Clansman 40942, record 2.13 1/2. Sire of King Clansman 2.06 1/4, Archie Clansman 2.12 1/4, Doctor Ike 2.13 1/4, Elsie 2.16 1/4, Celestine (3) 2.19 1/4 and 3 others in 2.30.
Grand sire—The Bondsman 37641. Sire of Colorado B. (3) 2.04 1/4, The Plunger 2.07 1/4, Creighton 2.08 1/4 and 55 others in 2.30.
G-Dam—ALABAMA 215, dam of Fair Margaret 2.07 1/4, Bel Espirit 2.12 1/4 and 4 others in 2.30.
Baron Wilkes 4753, record 2.18. Sorrento (g.b.m.) by Grand Sentinel 280, Hambletonian 1644 (McCurdy's) Emeine (g.b.m.) by Almont Jr. 1764. Bon Bells 13073, 2.19 1/4, sire of 61, dams of 72. Rosie Morn, by Alcantara 629, Dam of 6.
Dam—Borealice 2.11 1/4, Dam of Addition 2.07 1/4, Boreal 2.10 3/4, 2.15 1/4, sire of 73, including Boralma 2.07, Fan Michael 2.03, and 4 others in 2.10, sired dams of 9, including dam of Addition 2.07 1/4, Lizzie Barrett, dam of Garrard 2.19 1/4, Wilkes Boy 3803, record 2.24 1/4, sire of 107, dams of 128. Annie Almont, by Almont Jr. 1764. Dam of Gratton 2.13, Kentucky Lew 2.17 1/4 and Wharburton 2.18 1/4.
4th dam, Bandella, by Brown Dick.
5th dam, Double Out, by Jack Malone.

DESCRIPTION

JOHN WHITLEY, half-brother to Addition, 2.07 1/4, bred at Piedmont Farm, Huntsville, Alabama, foaled 1914, is a handsome trotting stallion, a rich golden chestnut color, stands 15 3/4 hands high and weighs 1100 lbs., has lots of bone and substance, with the best of legs and feet, good strong back and fine head and neck. It can be seen by his pedigree that his breeding is hard to beat. Parties having mares to breed should see this fine young stallion before going elsewhere.
TERMS—To insure, \$15.00, payable February 1st, 1921. All accidents to mares at risk of owners, but special care taken to avoid accidents. Mares must be returned regularly to the horse, or the owners will be charged full insurance. Persons disposing of their mares before foaling time will be charged full insurance. Any mare tried to the horse will be considered insured and the owner held liable to return her regularly throughout the season.

SEASON OF 1920
The Highly-Bred Stallion
Peter V. Dillon
(63080—1895)

2-year-old record 2.28 1/2
3-year-old trial 2.15
Foaled in 1912, bred by Vimont Bros., Millersburg, Ky.

Sired by Peter the Great, by Pilot Medium, Dam, Little Wonder, by Baron Dillon.
ENROLLMENT No. 4324. Form II.

Will stand at his own stable, lot 21, con. 10, Plympton, one mile east of Aberarder, except Saturday afternoon when he will be at C. Anderson's Sales Stables, Forest.
TERMS—\$15.00 payable February 1st, 1921. Accident to mares at owner's risk, but the best of care will be taken of mares sent to us.
Peter the Great's fame as a sire is of such an international character that nothing need be said of it. His sale for \$50,000 at the age of 21 years forms the strongest possible argument that could be made. Peter the Great's services are in such demand that his books were full and overflowing three months ago for 1920 at \$1,000 service fee. Every man wants the blood of Peter the Great and as it is impossible to secure it from the fountain head, breeders must look to one of his sons to procure it. There are no foals of Peter the Great in existence that are not up to the highest standing as regards maternal ancestry. This means everything in the race for success by his sons as sires for today only horses of the strongest breeding can win. Peter the Great has nearly four hundred performers with records from 2.02 to 2.30, of which seventy-five per cent. are trotters. The Greatest Sire of all time.

GEORGE KILMER, Owner,

ANOTHER VICTIM OF RHEUMATISM

Entirely Well After Six Weeks' Treatment With "FRUIT-A-TIVES"

MR. AMEDEO GARCEAU

82 Hickory St., Ottawa, Ont.
"I was for many years a victim of that terrible disease, Rheumatism. In 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.
I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again.
I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in the cure of Rheumatism, and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial."
AMEDEO GARCEAU.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Chopped Corn.
The lesson taught to potato-growers last year was to plant early, spray early, and lift early.
A more liberal use of corn in the poultry ration can be made as the weather turns colder.

Laying hens must not be stinted in their feed, neither must they be allowed to become fat.
Do not sacrifice the proven sire. Exchange him with another breeder rather than send him to the block.

In getting out your wood this winter plan the cutting so that there is plenty of young growth to replace the trees cut down.
Overfeeding ruins more horses than underfeeding, but the worst thing of all is overfeeding with the wrong sort of food.

Grass can be utilized with profit in pork production. Arrange for a small pig pasture near the home-stead in planning this year's rotation.
A good rule in pig feeding is to give just what the pigs will eat, and no more, of whatever food is given. Its neglect is a source of endless trouble.

Breeders of all classes of stock look for size and capacity in the mature stock. To get size in the mature animal the calf and yearling must be well fed.
In order that a farmer may use commercial fertilizers intelligently and economically to produce profitable crops, he should know what his soil lacks.

Two Centuries as a Meadow.
In England there is a park at the famous Rothamsted Experiment Station which has been used as a meadow for more than two and one-half centuries. It was used as a hay field at the time of the conquest of Canada, and was in sod even when the Constitutional Act was passed.

This park has been top-dressed with fertilizers annually for the last sixty years. At the beginning of this period it was producing about 1 1/2 tons of hay per acre. Where fertilizers have been used the average yield per acre for 50 years has been, in one case, 2.7 tons, in another 3.3 tons, and in a third case 4.1 tons—depending upon the amount of top-dressing applied. This is really a wonderful result, and should make farmers who are harvesting their meadows year after year and paying no attention to the upkeep of plant food in the soil—"mining" instead of farming—feel that possibly they are not using to the fullest the opportunities given them.
It is possible, by top-dressing alone, to bring back the rundown meadows and pasture in this country, and this without one dollar of cost for labor, excepting for spreading the fertilizer. The results obtained at the Rothamsted Station can be duplicated in this country wherever equally favorable soil and moisture conditions prevail.—Prof. H. G. Bell.

Feed the Runt Separately.
In many litters there are one or more runts. A little extra feed and care will bring these along profitably. If left to take pot luck with their bigger brothers and sisters they fare badly, and prove an unprofitable proposition.

LAY ALL UNDER CONTRIBUTION

Persian Dervishes Demand Aims as a Right, and Simple People Readily Give Up.

A feature of Persian life which illustrates the simple and superstitious nature of the people of the mid-east is their tolerance of the dervishes. These weird, gypsylike beggars infest the cities and annoy the village folk in passing from one place to another, according to their vows of itinerancy.
These are not the whirling dervishes of circus fame. Whirling would be too energetic a form of worship for the members of this most ancient leisure class. Their greatest exertion consists of walking slowly and blowing a horn to announce their presence.

The dervish of Persia is known by his begging bowl, conical cap, animal skin cape and club. The weapon, which is usually a stick driven through with nails, is carried conspicuously. It fact, it seems unpleasantly ready for use when its owner calmly demands tribute. It is true that there is small danger of its use, even if aims are refused, but a refusal however polite and apologetic, is sure to arouse the wrath of the dervish. His vocabulary may be unintelligible, but the meaning of his threats and prophecies is usually understood. Fellow citizens of the dervish tribe prefer to make a gift at any cost in order to avoid having the wrath of heaven called down upon them in the masterly language of an experienced heaven-invoker.

The dervish makes himself useful to the community honored by his presence by telling fortunes and stories, reciting prayers, selling charms and even curing the sick by blowing his sacred breath on them—all in return for which he turns over to his chief after deducting a living wage.

GIVEN NAMES OF PRESIDENTS

Historical Appellations Bestowed on Summits of Mountain Range in Old Vermont.

Heretofore when one spoke of the presidential range everyone—every New Englander, at least—knew, without further particularizing, that Mount Washington and its attendant summits was the subject, writes Allen Chamberlain in the Boston Evening Transcript.

Henceforth one must needs be more specific, since during the last year a rival presidential range has appeared on the map in Vermont. That region, hitherto generally spoken of as the Bread Loaf Mountain section, lying between Middlebury gap and the Lincoln-Warren pass, was but little known, except in its southerly portion, until the Green Mountain club men ran their Skyline trail through. They found there a maze of unnamed summits grouped as in council, and seemingly worthy of being recognized as individuals of distinction.

Just north of these heights is the rugged mass whose summits have been known for more than half a century as Mounts Abraham and Lincoln. Quite naturally the idea of a new presidential range arose and, with great partisan restraint, four of the neighboring mountains were therefore named Mount Grant, Mount Grover Cleveland, Mount Roosevelt and Mount Woodrow Wilson.

Poisoned by Ink.
Behind the scenes at the Globe theater, where, to the delight of all playgoers, Miss Violet Vanbrugh has secured another wonderful success in "Trimmed in Scarlet," the famous actress told me this amusing story of her early days.
"We were playing 'Romeo and Juliet' on tour," she said, "and one night in the poison scene, Juliet found herself without a phial. The audience was waiting, and in despair she snatched an ink-bottle from the stage carpenter, and gasping 'Is it empty?' rushed on.
"But when the hapless lady raised the bottle to her lips and tipped it downwards, a stream of ink descended over her chin and down her white dress. The house yelled at the comical sight."—London "Pit-Bits."

No More Shiny Domes.
After the wonders which we have seen worked for the soldiers who suffered disfigurement during the war, it is not surprising that plastic surgeons are turning their attention to improving civilians also. Ugly noses, projecting ears, harelips and all sorts of other obstacles to good looks will probably be easily corrected in the not-far-away future. The most interesting thing along this line which has been recently discovered is that no one need suffer from baldness any more. By grafting a piece of skin from some part of the head where hair is still growing onto the bald patch, a new covering is said to be insured.

Dairy Hints.

Cooling milk and cream is very important during this month and next month. Have plenty of cold water so that the milk and cream may be rapidly cooled to 50 degrees F., at which temperature there is very little danger of sour milk.
Fly-time is here. Protect the milk cows by using a home or commercial mixture, as a fly-repellent. Try one-half gallon fish oil, one-half pint kerosene and about four tablespoonfuls of carbolic acid, or cresol, etc. Be careful not to get this on the teats, or hands before milking as it will taint the milk.

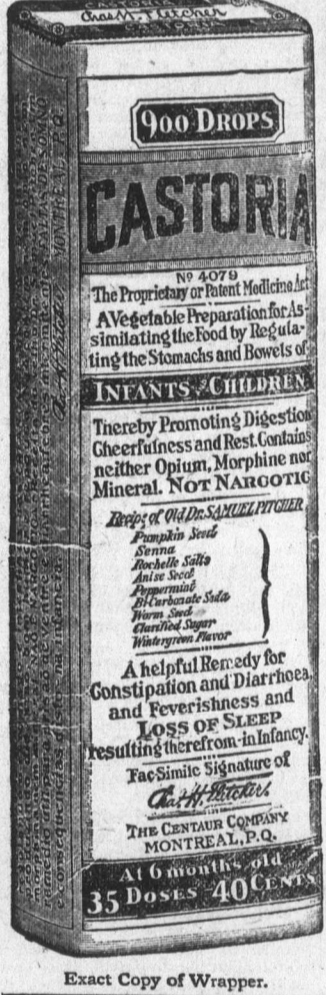

Grading Up a Flock.
In looking for quack grass it would be well to watch also for other noxious weeds, making sure that none go to seed and that the root stalks of perennials are prevented from spreading as much as possible.

Watch for Noxious Grass.
In looking for quack grass it would be well to watch also for other noxious weeds, making sure that none go to seed and that the root stalks of perennials are prevented from spreading as much as possible.

Wrested Fortune From World.

Sir Marcus Samuel, who has purchased from the earl of Berkeley for the sum of \$25,000,000 a parcel of the fashionable residential section of London, known as Berkeley square, started in business life keeping a little shop in one of the poorest quarters of the British metropolis, where he made and sold for a shilling or two, ornamental boxes made of shells from the seashore. Later he invested his savings in oil, made money and started a company called the "Shell," thus identifying his big new venture with his original struggling business.

Those investigations! Congressman (conducting an investigation of the cost of living)—Come in here and sit down! I want to ask you some questions. Now don't try to evade, 'cause you can't get away. Is it true that you have been profiteering in food products?
Profiteer—Yes, it's true. What're you goin' to do about it?
Congressman—Well, well, now, don't get excited. I just wanted to know if it was true.
And thus another stirring investigation is recorded.—Kansas City Star.
