

OUR LATEST HEAVY MOULDER ON BASE

Built in 3 sizes 10, 12 and 13 in.

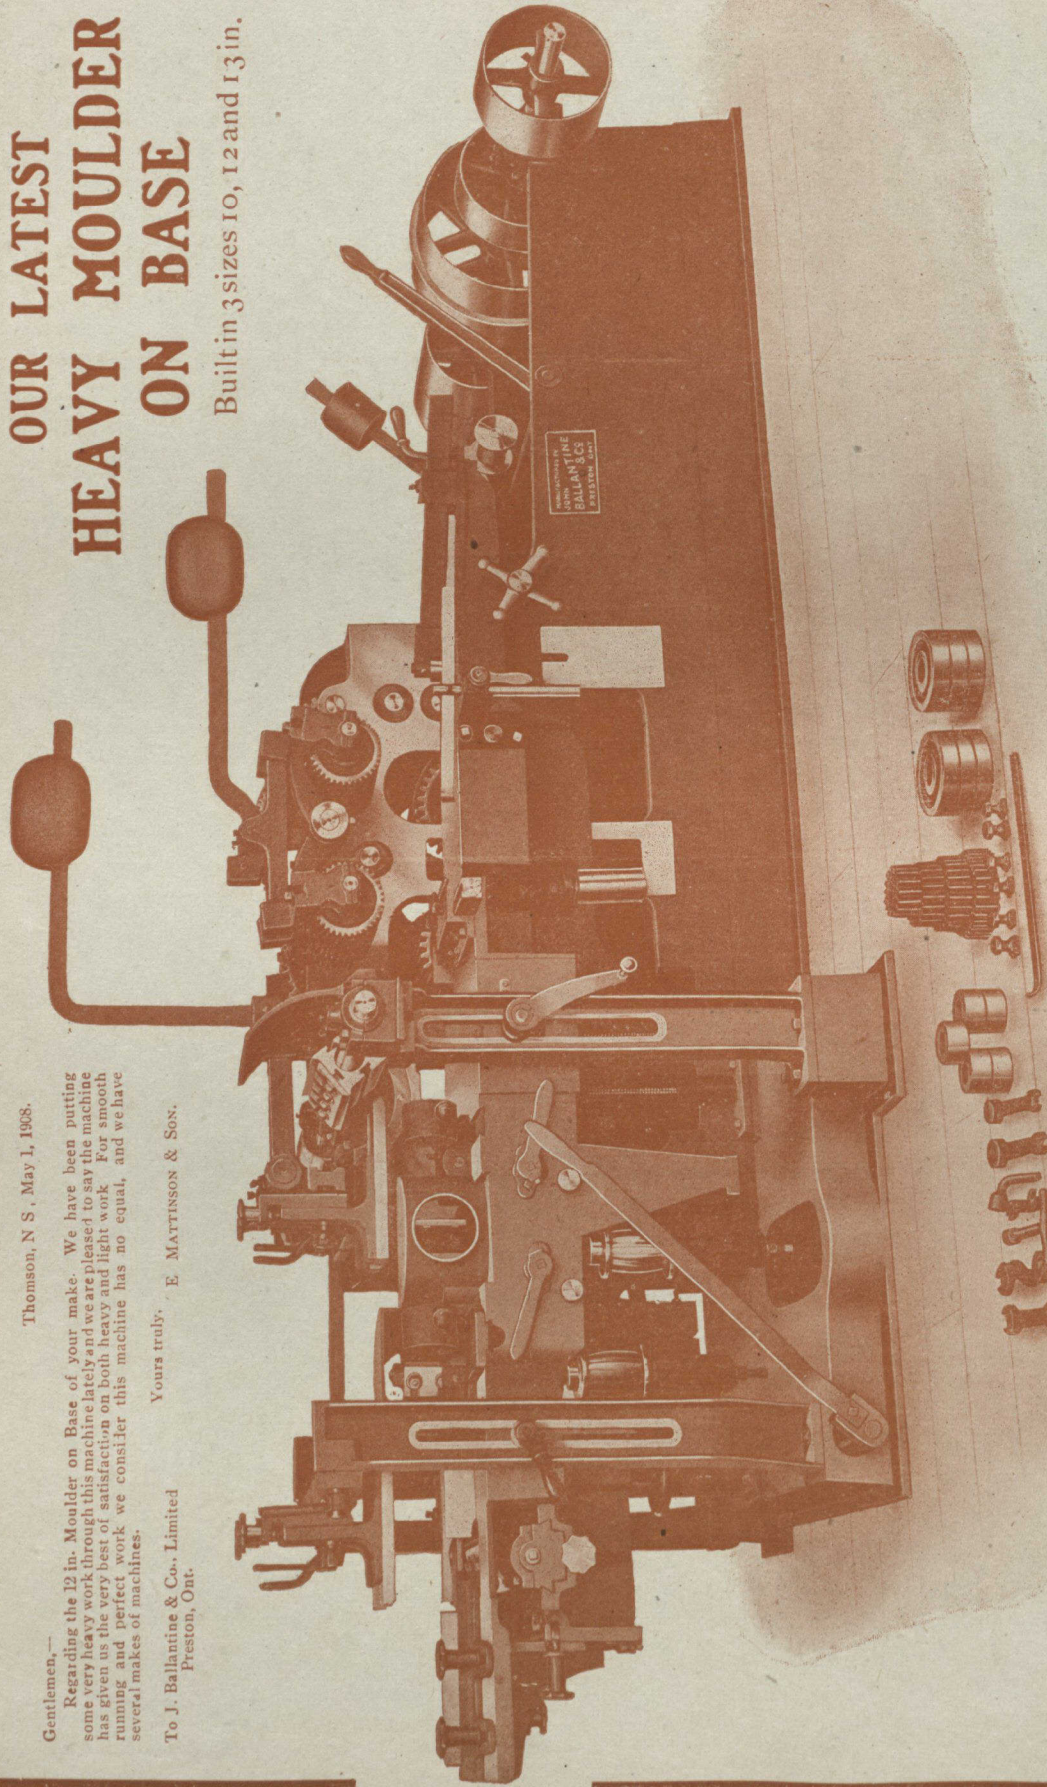

Thomson, N S, May 1, 1908.

Gentlemen,—

Regarding the 12 in. Moulder on Base of your make. We have been putting some very heavy work through this machine lately and we are pleased to say the machine has given us the very best of satisfaction on both heavy and light work. For smooth running and perfect work we consider this machine has no equal, and we have several makes of machines.

To J. Ballantine & Co., Limited
Preston, Ont.

Yours truly,
E. MATTINSON & SON.

The above cut represents the best moulder on the market to-day. This may seem pretty strong talk but the machine backs it up with results. We have always made a specialty of moulders and think that this is the best yet. But don't take our word for it; hear what the men who use them have to say. The best firms in Canada use our moulders. Write for a list.

John Ballantine & Co., Limited. Preston, Ontario.
