Canada has not played an influential role in the Mexican market for laboratory instruments and equipment although exports have shown an increasing trend. Total Canadian exports to Mexico amounted to Cdn\$1.1 million in 1988, Cdn\$2.1 million in 1989, Cdn\$2.9 million in 1990 and Cdn\$4.6 million in 1991, but fell again to Cdn\$2.2 million in 1992 with the decrease of exports of gas, liquids and electricity supply and production meters (see Table 3).
