

**EXERCISE**

In the following exercise, you will start Windows NT and log on.

1. Turn on your computer
2. If required, at the startup screen, select Windows NT, and then press **ENTER**  
*The copyright screen appears, and then the Begin Logon message appears.*
3. Press **CTRL+ALT+DELETE**  
*The Logon Information dialog box appears.*
4. If required, in the Username text box, type your user name
5. Press **TAB** until the insertion point moves into the Password text box
6. Type a password  
*Asterisks appear in the Password text box as you type.*
7. Choose OK
8. If necessary, change the domain
9. Choose OK  
*Windows NT loads.*
10. If the Welcome screen appears, clear the *Show this Welcome screen next time you start Windows NT* check box and close the Welcome screen  
*The desktop becomes fully visible.*

**END**
