

Bankers' Safes

ness and can be fitted with double, triple or quadruple time locks.

For rich effect in artistic designs our safes are not surpassed. In the decorations, done on highly polished surfaces with intricate weavings of delicate hues, even the art critic finds beauty worthy of admiration. The deep warm reds and vermilions edged in bold relief with graceful patterns in gold and with a careful modulation of color from dark to light, give a dash of beauty not unlike marquetry work. Couple with this the massive construction of the Safe proper, with its ponderous weight of iron and steel and you have an extraordinary combination of modern mechanism and art surpassed to-day by no other line of manufacture. We shall be pleased to furnish prices on application.
