

100 Per Cent. Advance After Saturday, June 22nd.

The underwriting price of 15 cents a share for first allotment of shares in the "Bonanza Gold," of Larder Lake, will be withdrawn Saturday, June 22nd. The Company will then be chartered, and thereafter all further sales will be at an advance of 100 per cent.

This Company will take over about 960 acres of mining claims, consisting of twelve 40-acre claims a little south and south-west of Larder Lake; eight 40-acre claims in the section lying to the north of Larder Lake; three 40-acre claims a short distance north-west of Round Lake, in Otto Township, and near the railroad; three 40-acre claims near Lake Abitibi.

The underwriting of the first allotment of shares in this Company is on the basis of \$15.00 for each 100 shares, par value \$1.00. All applications for an interest in this proposition at this first underwriting price must be mailed not later than the 22nd of June.

Any further information desired will promptly be furnished upon request. Applications made by telegraph, to be followed by immediate, will be accepted. Reservations will be made by telephoning to the office. Phone Main 6454. P. V. FRASER & COMPANY, Financial Agents, 23 Toronto Street, Toronto, Ont., Can.; U.S. Office: A. M. Cottrill & Co., 138 North Avenue, Plainfield, N.J.

Canadian Pacific Cobalt Development Co., Limited

100,000 Shares Are Now Offered the Public at 15c Per Share

I had to refuse a number of orders at 12c, the allotment being largely over-subscribed. I advise an immediate investment in development work now going on indicates another early advance. Write for Map and Prospectus or, better still, send order by first mail and secure the stock at the low price of 15c per share.

OWEN J. B. YEARSLEY, Banker and Broker

JAMES J. WARREN, Managing Director.

YORK LOAN SUES.

Begins Action to Recover \$21,500 From Toronto Life.

The York Loan Company has brought suit at Osgoode Hall against the Toronto Life Insurance Company for a full accounting of money alleged to have been received on account of the plaintiff firm, and \$21,500 insurance on property on Roncesvalles-avenue, and \$1200 for office rent are other items mentioned in the suit.

Grey County Old Boys and Girls are running one of their popular excursions to Owen Sound on July 20. Beach Brothers have secured from Master-in-Chambers Cartwright judgment against the Town of Halesbury for \$421 for electric lighting.

GOOD CLASS OF IMMIGRANTS.

One Hundred Families of Best Type Coming Shortly.

Thomas Southworth, superintendent of immigration, expects that about 100 families will be sent out to Toronto within the next three weeks by the East End Immigration Society of London, Eng.

These immigrants will all be of the most respectable class and most of them will come direct to situations which have already been secured for them.

Admitted to Royal College. LONDON, June 14.—R. D. Forbes and P. E. McKenney of McGill University are admitted fellows of the Royal College of Surgeons.

LOSS MADE GOOD.

Beaver Buildings Burned, But Quickly Replaced.

A portion of the machinery buildings on the Beaver were burned down last Friday night with a loss of about \$2000. As soon as F. L. Culver was apprised of the loss he immediately wired that the buildings must be replaced immediately. The mine manager lost no time, as by Wednesday the compressor was again working as the nothing had happened. The reports from the Beaver are exceedingly flattering, as the development work proceeds.

Morton & Company, brokers, in Toronto, Bank Building, offer to trade a block of stock in a good Petroleum Oil Company, earning ten per cent. for stock in Cobalt Mining Companies, in shipping class.

Foster Company Meeting.

The board of directors of the Foster Cobalt Mining Company have called a meeting for 4 p.m. June 27 at 29 West King-street, when reports made by P. C. Loring and W. Hamilton Merritt will be presented and other business of interest to the shareholders will be transacted.

While some criticism has been offered thru the press and elsewhere regarding the management of this company, much of this has been discounted by the fact that the directors are men of proved probity and acknowledged business ability. Time they have outlived and pursued a conservative policy, but they believe good results will come from it.

Reports presented to them go to show that the silver-ore on the property and by proper mining operations can be got out to the advantage of all holders of the stock. The members of the board are: John Cowan, Kent, Joseph Oliver, F. B. Johnston, K.C., George H. Doran, Toronto; Simon Dymally, Hamilton; Jackson Booth, Ottawa; Hamilton Fisher, Montreal.

INJURED IN RUNAWAY.

AURORA, June 14.—Mr. Thomas Geer was returning from the railway station, where he had taken his daughter to go on the summer excursion yesterday, when his team ran away. He fell on his head and shoulders, and when removed to his home he had not regained consciousness. His farm is about a mile north of the town.

Christian Science. Attention is called to the notice that Edward A. Kimball, C.S.D., of Chicago, an authorized lecturer on Christian Science, will deliver a lecture on this apparently new phase of religious faith on Sunday, June 23, at 3 p.m. in Massey Hall. The lecture is free.

British Embassy in Summer. WASHINGTON, June 14.—For the remainder of the summer season, the work of the British embassy will be conducted at Intervale, N.H., where headquarters have been established.

WILLS & COY. BROKERS Weekly Bulletin.

Toronto, June 15th, 1907. The market in the past week has been purely protective. There has been very little dealing by the outside public, with the exception of a little investment buying of the standard stocks, especially Trethewey, Nipissing, Watts and a few others.

It is rumored that a meeting of the shareholders of the Foster Cobalt Mining Company will be called at an early date. We think this is the right policy for the board to pursue. The shareholders are certainly entitled to know the exact condition of affairs.

Green-Meehan is out with a statement, but what the shareholders would like to know is the exact amount that was received from the shipments that were made, and in what direction the money was expended. There is also some enquiry as to what price the treasury stock was sold at.

Several new finds of great importance have been made in the camp. These finds, however, are not causing the furries that they have in the past, as this proposition has gotten down to a basis of actual values.

We have not changed our opinion, but still believe that there is a special value in the property. It is about time to begin to average. Good profits can be made. The market is about to open up at the present selling prices, if they are held for three or four months. Yours very truly, WILLS & CO.

Foster-Cobalt Mining Company Ltd.

(NO PERSONAL LIABILITY)

Toronto, June 15th, 1907. Notice is hereby given that a Special General Meeting of the Shareholders of the Foster-Cobalt Mining Company, Limited, will be held at the hour of four o'clock in the afternoon, for the following purposes:

To read and consider the report of Mr. Frank C. Loring and Mr. W. Hamilton Merritt, engineers.

To determine the composition of the Board and the remuneration of Directors; to consider and if deemed advisable, to sanction a new law increasing the number of Directors to seven.

To advise the Directors as to the future course of development of the mine. To sanction a by-law of the Company fixing the rate of interest on the advance of sale of Treasury Stock.

The Transfer Book will be closed from Friday, June 14th, 10 a.m. until Tuesday, June 18, at 10 a.m.

By order of the Board, JAMES GEORGE, Secretary.

Post Office Box 5, Uxbridge, Ont.

FOR SALE.

25 shares of National Portland Cement stock, in blocks of 5 shares each, at \$75 per share.

This company paid 10 per cent. last year. J. E. CARTER, Investment Broker, Phone 428, 645, GUELPH, ONT.

TRADE BRISK IN JAMAICA.

More Money in Circulation Than Before Earthquake.

OTTAWA, June 14.—Mr. G. E. Burke, Canadian trade agent in Jamaica, reports to the department of trade and commerce that more money is in circulation now in the island than before the earthquake of last January. The earthquake has done a good business. Building operations are very brisk and there is a good opening for Canadian trade in sugar, molasses, etc. A good trade might also be developed in flour, meat, corn, oats, butter and condensed milk. The British government has given a grant of \$100,000 to the company, and a loan of \$200,000.

NEW BOOKS FOR LIBRARY.

At a meeting of the public library board yesterday donations of books were announced from the following: Rev. A. Baldwin, Lowell Observatory, Lowell, Mass.; Sikh Association of America, J. White, F.R.G.S.; Michigan board of health, E. H. Cresswell, Toronto, U.S. consul; Goldwin Smith, Geshvornar Henriksen, Norway; Northwestern University of Chicago, secretary of the English genealogical society; Nova Scotia Institute of Science, J. A. Murray, and A. Sandham.

One hundred and twenty books at a cost of \$196 will be purchased for the main library.

THREE BURNED TO DEATH.

CINCINNATI, June 14.—Three women were burned to death and two men seriously injured in a fire that destroyed four houses in the White-water settlement near Harrison, Ohio, today.

APPROVES TRUST MERGER.

ALBANY, June 14.—Superintendent Keop of the state banking department has approved the proposed merger of the Equitable and Mercantile Trust companies of New York.

Funeral of John Walde.

The remains of the late John Walde, lumberman and financier, were conveyed to Burlington yesterday afternoon by special train.

A private service was held at the residence, "Glenhurst," Rosedale, at 12 o'clock for the family and immediate friends of deceased. In the absence of Rev. John Neil, pastor of Westminster Presbyterian Church, with which Mr. Walde was connected for many years, Rev. Mr. Duncan, his assistant, officiated. He was assisted by Rev. Canon Oddy of St. Paul's Anglican Church.

In Burlington the clergymen were Rev. Dr. Grant of Orillia, an old friend, and Rev. Mr. Anderson, the local Presbyterian clergyman. The pallbearers were the sons and sons-in-law. They were: Messrs. F. N. Walde, R. S. Walde, W. S. Walde and C. P. Walde, sons of the deceased; Messrs. E. Sprague, R. C. H. Cassels, Dr. C. A. Temple and C. G. Marriott, sons-in-law.

Pay Tribute to Godwin. LONDON, June 14.—At a meeting of Dundee United Free Church, Rev. A. B. MacAulay paid a tribute to the scholarship and pastoral care of Rev. A. R. Godwin, who is appointed to the chair of the Old Testament literature in the Presbyterian College, at Montreal.

JAMES A. MATTHEWS, Real Estate and Investments, Bristol, Conn.
WM. THEOPHILUS STUART, M.D., C.M., Professor of Chemistry and Metallurgy, Toronto, Ontario.

It is safe to say, in view of the extensive and valuable properties owned and controlled by this Philadelphia Company, that it has lower capitalization than almost any mining company now operating in the World-famous Cobalt district, as is evidenced by the following:

The Company's property consists of four tracts of land, three of 40 acres each and one of 140 acres. One of the 40-acre tracts contains a shipping mine, known as the St. Denis or Fortier Mine, which is being operated with a force of men developing same. High-grade ore is being sacked and shipments that will run several thousand dollars per ton, will be made in the near future. This tract of land is located in the Township of Lorne, N.W. 1-4 of S. 1-2 lot 3, concession 11, and is in the heart of the Cobalt District. In this tract of land there are seven known veins; in fact it is believed that there is a network of veins, and that further development will expose the same to a very slight cost.

The development of this property consists of several hundred feet of prospecting and trenching, and has also a forty-foot shaft and twenty-foot drift at the bottom. The shaft and drift expose seven veins which show ore equally rich to anything ever shipped from the district, some of it running almost pure silver, pieces of rock actually being held together by silver that will bend back and forth without breaking. This property can soon be put on a heavy shipping basis.

SACKING HIGH-GRADE ORE.

We are working a force of men in our Lorne property sacking ore that will run from \$5000 to \$10,000 per ton. We have purchased the S.W. 1-4 of S. 1-2 lot 2, concession 11, in the Township of Lorne, known as the Laval Mine.

FORTUNES AWAIT STOCKHOLDERS OF THE PHILADELPHIA-COBALT MINING CO.

The other 40-acre tract is also in the heart of the Cobalt district, being S.E. of N. 1-2, lot 9, concession 2, Township of Bucks, known as the Gamble Mine. There are three veins on this property; one has been developed by open cuts, trenching and shafts, and it makes a splendid showing. Ore has been opened up at the surface that assays as high as \$40 per ton in silver, besides some Cobalt. This property is close to the Green-Meehan Mine, which is considered one of the BONANZAS of Cobalt. This lot is in the direct course of the Temiskaming main vein, and experts in the district believe this wonderful vein passes through this tract.

The Philadelphia-Cobalt Mining Company has been careful in selecting properties that show from one to seven or more veins of valuable ore in each. Our engineer says additional veins will undoubtedly be discovered. These have all been reported on by the Ontario Government engineer, and passed upon as containing "VALUABLE DISCOVERIES OF MINERAL IN PLACE."

Extract from a statement given out by the Green-Meehan Mining Company, Our Dear Neighbor: When it is known that we have only been in possession of the property a trifle over two months and that much of the work was done under adverse weather conditions, and further, that we have hardly started the work of ore extraction or shaft development, I think it is safe to say that the productive possibilities of the Green-Meehan Mine are yet in the initial stage.

Number of days worked 53
Average number of men employed 36
Number tons ore extracted 47
Actual cost of producing ore \$4,349.62
Actual cost of production per ton \$92.55
Estimated value of ore shipped \$87,340.09
This shows a profit of more than \$82,000 at an expenditure of only \$4,349.62

The 140-acre tract has had no development, but is in the direct course of the mineral belt, and rich finds have been reported close to it.

We have been extremely careful in this selection, having had old experienced mining men on the ground for more than six months prior to purchasing these properties.

It is our intention to actively prosecute development on these properties, and it is believed that in six months we will be on a heavy shipping basis, and large dividends can be paid in less than a year.

COBALT MINES ARE MAKING MILLIONS FOR THEIR STOCKHOLDERS

Read a proof of what some of Cobalt's famous mines have earned:

Canadian Mines Made \$20,000,000 in COBALT
Messrs. Timmins, McMartin & LaRose have made in Cobalt \$10,000,000
The first owners of Nipissing sold out (they were Canadian) 250,000
Canadian mine made (at least) out of Nipissing 2,500,000
The Timmins took out of Foster (at least) 700,000
The University crowd got over 700,000
The Jacobs would not sell for over 1,000,000
The Lawson is held in Canada and is worth 2,000,000
Canadian mine made in Foster 2,000,000

This little list totals over \$20,000,000, and if other mines were included in the computation the total would run into many more millions. This takes no account of the fortunes made by Americans.

The Timmins mine was located in 1903, and a half interest was sold for \$2000. Fifteen carloads of ore shipped from this mine aggregated \$500,000 in silver alone, and the mine to-day is worth over \$15,000,000, and is earning \$3000 per cent. for its stockholders. Recently a mass of ore weighing 8,500 pounds, assaying 5,000 ounces of silver to the ton, was taken from the bottom of the Timmins shaft (the pioneer mine of Cobalt), the deepest shaft in the Cobalt district, on which diamond drilling has been carried down 520 feet and exceptionally high silver values found.

The greatest mining engineers now agree that the silver fissure veins in Cobalt are equal in depth to any in the world, and greater in richness by many hundreds per cent. than any the world has ever known. Values of the silver ore increase as the shafts go down.

Hudson Bay, another great Cobalt property, has paid the magnificent total in dividends of 9,200 per cent. to its stockholders. Only a year ago this stock sold at \$1.00 per share, and to-day is hard to buy on the Standard Exchange in Toronto at \$160 per share.

The immense richness of the Cobalt ore is demonstrated from the following:
The first car from LaRose mine brought \$124,000.
The first car from the Trethewey brought \$38,000.
The first car from the Silver Queen brought \$58,000.
The first car from the Foster brought over \$100,000.
The first car from the O'Brien brought \$55,000, and a car of ore from any of the mines seldom runs under \$35,000.

The Temiskaming and Northern Ontario Railway Co., owned by the government, has given the Right-of-way Mining Co. a 999-years' lease on three miles of its right of way in return for \$50,000 in cash and a flat royalty on all ore mined. This company is taking out ore yielding 6,000 ounces per ton.

The great Nipissing mine produced \$2,500,000 the first two years at a cost of \$250,000, including all buildings, machinery and outlay of every description. There is but one other camp in the world that can equal such a production with such a profit, and that is Goldfield, Nevada, and it is doubtful if the latter can show a better record. The LaRose Mine has been developed more systematically than any other in the district. A shaft has been sunk, and about 250 feet of drifting has been done at the 80-foot level, following the vein in both directions from the shaft. The drifts prove that the vein is at least as large and rich at this depth as it has ever been. In the 250 feet the drifts have passed through comparatively barren ground. Approximately \$1,000,000 worth of ore has been blocked out on this vein.

To give an idea of the character of ore of one of other veins, it may be said that an open cut about 50 feet long and 25 feet deep, on the Trethewey vein, location J. B. 7, has produced approximately \$2,000,000 of ore.

In addition to the Cobalt properties we have secured twenty mining claims, of 40 acres each, total 800 acres, in the famous Larder Lake district, in Ontario. These claims show marvelously rich gold ore. Great results are expected from these coming summer. We have under option four claims in Coleman.

United States investors are rapidly awakening to the unparalleled richness of the Cobalt silver mines.

It is the intention to sell 200,000 shares of stock at 50 cents per share before putting it on the curb and exchanges. The first allotment of stock will be pooled August 1st, 1907. This means the stock will be issued to the purchaser and deposited with the Union Trust Company of Philadelphia, and when the pool expires it will deliver the stock to the owner. The object of this pool is to keep this allotment of stock from being thrown on the market while the Company is selling stock for the purchase of property and development purposes.

The first allotment is being sold at a low price (50 cents per share).

During the time the first allotment of stock is pooled the Company will develop its most favorable properties, and will no doubt place several of its numerous mines on a good commercial shipping basis. It is believed that when the pool is dissolved the stock should be selling from \$2 to \$4 per share on the market.

As soon as the first 200,000 shares have been disposed of the stock will be placed on the market at \$1 per share, and will be made an active stock on the curb and mining exchanges.

The Board of Directors consists of well-known prominent business men of Philadelphia, Toronto and Montreal, with headquarters in Philadelphia.

INVESTORS

this Company, and urge everyone to secure it at the present price.

In making application for stock, send draft, cheque, postoffice or express money order, payable to the order of UNION TRUST CO., Limited, TRUSTEES, Temple Building, Toronto, or H. W. Van Every, General Agent for Ontario, Toronto.

Any further information desired will gladly be given. Mr. Edwin Wallace, a mining man of twenty-two years' active experience in mining, with not a single failure in his record, will be General Manager.

Mr. Wallace recommends the purchase of the stock, fully believing in the great future of the Company.

REGISTRAR

The Union Trust Company, Philadelphia, Pa.

For Stock Sold in Canada: UNION TRUST COMPANY, Limited, Trustees, Toronto, Ont., Can.

THE PHILADELPHIA-COBALT MINING COMPANY,

A Message to Weak Men

Spring is here, and it is a time of the year that, with its changeable climate, brings out the defects in all men. If you are not equal to these sudden changes of weather, be sure that this condition will manifest itself now. If you have not taken care of yourself through the winter months; if you have overworked; if you have been careless in diet and your blood circulation is sluggish and your system is full of impurities; now you will pay the penalty; now you will feel the loss of that vital energy that makes life worth living. Now is the time when weak men suffer the most; the time when their weakness is a constant worry to them. Now is the time when you must sacrifice to regain your lost manhood, to be able to hold up your head and feel that you are the equal of any man? Here is the chance for you weak, sickly men to regain your lost vigor and energy, to become men of power, bounding with the vim of life and strength in every vital organ and muscle of your body. Men have come to me almost without hope, discouraged, and I can point to these men to-day, after their having worn my

Dr. McLaughlin's Electric Belt

happy, enthused and shouting with gladness in the possession of the full vigor of perfect manhood. These men will at any time be glad to tell you what I have done for them. If you have thought much of me trouble you know that the force which keeps up the health and strength of your body is nothing more or less than electricity. All the motive power in your body is born of electricity. That is what you lack, and that force given to your weak organism, as I will give it, will renew your strength. You will be able to enjoy life. You will be strong again.

The confidence I have in the wonderful curative power of my Belt allows me to offer any man or woman who can give me reasonable security the use of the Belt at my risk, and they can

PAY WHEN CURED.

Proof from all parts of the Dominion will be furnished on request. Write me at once and get the bona fide proof of my claims.
