M. R. A. MAKES IMPROVEMENTS KING ST. STORE

New Fixtures Give Extra Display Space—Room for More Lines

OTHER IMPROVEMENTS IN SHOPS PLANNED

Novel Arrangement Makes for Convenience of Customers and Clerks.

Manchester, Robertson, Allison, Limited have made changes in their stores recently which not only make them more beautiful to the eyes of the customers but add to the comfort and convenience of the shoppers in that they make it easier for them to choose the goods they want and so it is about half the time it took under old conditions.

These latest additions consist of fixtures which will be found in the main King street store. As one enters the door he sees a beautiful rounded end plate glass display case with base of marble. The wood bottom of the case is of real mahogany and the glass is framed in rosewood mouldings. The drawer and shelf fixtures being so much lower than the old style they supercede give an unobstructed view of the whole store, thus giving the most pleasing effect of spaciousness.

Two of these circular fixtures are found in the centre of the main store, and in each is a cash register, to facilitate the making of change for the customer.

A Fine Display.

As the customers enter the door they come to a fine display of handbags, on the right and toilet goods on the left.

With these new fixtures, which are the equal of anything in any store on the continent, it is possible to practically display the entire stock to the customer at a glance and do away with the taking down of goods before a selection is arrived at. This means that it is possible for the customer to be served in much less time than it formerly took and eliminates long waits.

Saving Space.

The installation of the new fixtures has made it possible to carry a stock of buttons which formerly occupied 35 feet of shelf room in a space of 13-2 feet in length and the space so saved has been given over to the wash goods. Alterations have been made in the dress goods department
