treasurer of the superannuation fund was preaching in Chatham in 1873. Yesterday Dr. Griffin preached both

anniversary sermons in Park Street church as he did 25 years are when the church was first opened. His text in the morning was. "Covet earnestly the best gifts and yet show I unto you the best way." All people, said the reversend doctor cannot acquire the same gifts because some people are what is called brainy but each one should do the best possible with the brains he has. There are intellectual, moral and spiritual gifts. Intellectual gifts extend as high as man is able to attain but there are better gifts in store. The moral and spiritual gifts are the best. Then there are home, social and church gifts. Among other things in the home gifts is the cultivation of home and the improving of the home life. This must be done in a way to increase the happiness of others. To covet the best social gifts, one must improve his or her talents and use them for good. If a person could sing he or she should use that talent to make others happy. A musical instrument might remain in a family for years and yet you would never have any music unless love and friendship bound the family together. Lastly we have the church work. In the churches of to-day there may be elegant choirs, trained singers and fine preachers. Yet unless the hearts of the people were thoroughly in the worship the besutiful church with their elegant choirs, trained singers and fine preachers would simply have Ichabod written on their; walls.

In the evening the Rev. Dr. Griffin preached an eloquent sermon from the taxt "If thou canst believe; all things are possible unto him that believeth." My observations, said the minister, throughout life have been that those who undertake to tell men how to believe. I also recollect I got no good from their advice. Long years ago I learned not to tell men how to believe in the Lord Jesus Christ never accomplish anything nor are they satisfied. I have vivid recollections of good men, who when I was young told me how to believe him the recollections of good men, who when I was young told me how to believe him the rich

To CURE A COLD IN ONE DAY.

Take Laxative Brome Quinine Tableta, All Druste relund the money if it falls to cure. Sc.

JUST TWO WEEKS

Would be Required to Destor the French Navy.

Africa disputes, or they must be acting on an understanding with Russia. If the first supposition is correct, they must be very badly informed of the temper of this country in respect to the whole matter of Egypt. If the second, then we must be prepared for the long-expected turning-point in the affairs of the Old World.

That the Freach press invariably withholds from the public information which may prove unpalstable or may clash with the interests represented by individual journals is a notorious fact, and in the present instance no exception has been made to the rule. The facts and arguments addoced in the English blue-book have not been reproduced with any fulness or fairness in Paris, and in consequence Freach public opinion stands, as it has found itself on many a critical occasion, on a misconception of the situation. But

Could Mr. Bruneau Withdraw the Resignation

combination strong enough to defy all the healing skill of the physician. Common carelessness lets the cold root and grow. Common carelessness root and grow. Common carelessness says, between paroxysms of cough-ing. "It will be all right in a day or two," and the common end is con-firmed lung trouble, perhaps con-sumption. The common-sense treat-ment of a common cold is a prompt dose of Ayer's Cherry Pectoral. It is the most efficient and reliable cure for colds and coughs, and is con-stantly prescribed by physicians.

"I have used Ayer's Cherry Pectoral in my practice since 1853, and have always found it reliable for the cure of colds, coughs, and

The Lake Brile EXTENSION.

Bonus by-laws are being submitted to the municipalities Iying between the commerce would suffer a terrible blow; considering that of the entire exports of France, amounting to something like three billion five hundred million francs, one billion three hundred and twenty million are taken by England, nearly as much as Belgium, Getmany and the United States together take. "In holding out, therefore, in this matter of Fashoda the French Government must either rely on a yielding disposition such as England displayed in the Siam, Madagascar, and West Africa disputes or they must be act
Chatham, is attending his be-saide. THE Lake ERIE EXTENSION.

Bonus by-laws are being submitted to the municipalities Iying, between these points. Two thousand dollars only is asked to the from Ordrof on account of its proximity to Bidgetown, \$7,000 from Punwich, \$25,000 from Dunwich, \$25,000 from Dutton, and \$20,000 from \$20,000 from St. Thomas, and \$20,000 from St. Thomas, on the proximity to Bidgetown, \$7,000 from Dunwich, \$25,000 from Dutton, and \$20,000 from St. Thomas, and \$20,000 from St. Thomas, and they disposite than in the syring, and they arrive that all the bylaws, including St. Thomas, will be carried. Messrs. Lewis Wigle, Charles Macdonald and they are holding meetings nightly. Mr. Macdonald

WALLACEBURG.

A Suit thinges on the Question.

Montreal, Oct. 24.—An action has been entered at Sorel against A. A. Bruneau, M. P., for Richelieu, charging him with having illegally occupied a seat in parliament after having formally resigned his mandate to the Speaker of the House of Commons. It will be remembered that Mr. Bruneau sent a letter to Sir James Edgar resigning his seat for Richelieu, but it was alleged at the time that the letter was secured and returned to Mr. Bruneau. before the document reached the hands of the Speaker. The case will, of course, hinge upon the rightful ownership of a letter after it had left the hands of the sender. The law provides that a man who sits in the House of Commons without proper qualification shall be liable to a fine of \$150 for each and every day on which he so sits.

OUR FIRE ALARM.

Is the New ; System Equal to

Dit. Thinks Not.

Bit.—The disastrous itre of Friday morning must certainly lead to grave doubts in the migds of many rate payers whether installing our present fire alarm system and abolishing the night watchman was a step in the right direction. For my part, I believe an error was made in doing so. While we have to bow to the whimsand fancies of an underwriters' association I claim that that body has yet a deal to learn. My contention is, if a watchman had been in the old stand the fire of last night would have been detected before the alarm was sent in from ber 3i. We have many places of business, lumber yards, factories, etc., having watchmen employed during the still bours of the night. These places would be partially destroyed before desceted and the alarm sent in. Our fire and light committee in their re-organization of fire hall matters have certainly not improved our position. I believe that I voice the sentiments of citizens generally when I say get back to the old system, build an addition say 15 feet higher on the tower or high snough to command a view over the entire city, put your watchman up there and let him be on the alert whilst we are in peaceful sumber. Your fire alarm system may be all right providing you have someone to give the alarm. At present we are depending at night solely on chances and the policemen on duty. Who knows but what they may not be around and if we all sleep then what!

ial reports from two of the Can

THE SOUTHERN STATES

Charles T. Cherry, King street returned last week from a visit to his parents in Littleton, N. C. He reports

parents in Littleton, N. C. He reports times there very lively. The war has increased the sale of merchandise. The rich mineral deposits of this district have begun to be opened up. They have both mice and iron. The country is also rich in timber, especially pine and black walnut. The crops this year have been very good. Mr. Cherry predicts that the south is the coming land. That this country will be the Klondise to which the people will flock in the next ten years.

During his trip Mr. Cherry spent a few days at Baltimëre, his old home. The oriole city is quite different since Mr. Cherry slast visit. Electric care have taxen the place of the old horse care, and the street care nearly all run under ground, thus lessening greatly the many accidents from this source. The prices in Baltimore differ somewhat from the prices here. Baltimore dressed steak brings 16 cents a pound, Chicago 12c, butter 25c, eggs 20c., flour 2.25 a hundred weight, coal oil eight cents a gallon. In the markets you can find every kind of fish that syims in the water.

A New York firm is putting up a 12 story building. The first story will be occupied by a bank, and the rest by offices.

This sity has the latest fire department. They use a ladder which can be elevated at any angle by levers and the firemen play on the fire from above.

ECZEMA FIVE YEARS
