TOTTA THE STATIAN, ACCOUNT AND

The Mines at White Horse

Coal Measures Being Opened Up and Product Tested With Good Results.

Something About the Geological Formation in That Flourishing Mining District.

The mining district of White Horse, which has attracted so much attention of late, was visited by W. M. Brewer, M. E., on his recent trip north. Asked for his opinion this morning Mr. Brewer said

Horse district, I was only in the town about an hour and a half, and despite "Dean appears to have suffered more of mineral claims is apparently on the northeast border of a mineral bearing zone at present undetermined in longi-tudinal extent, and having a width of possibly nearly two miles. My examin-ation was as thorough as possible under the circumstance, for during the time I visited, beside the Copper King group. Cub mineral claims.

expressed last year by another mining to Teller on July 20th. engineer, in which he made the state- "Before his death De ment that this mineral bearing zone oc-cupied a basin which was underlaid by which was finished at his dictation by low depths the granite would be encountered, cutting off the ore bodies. I found. on the contrary, that there is absolutely no reason, in my judgment, for any such Capt. Knudsen, of the steamer Dora. The identical with that on Texada island of firsh that Thiery and Huston were pre-around the Van Anda, Marble Bay and paring for their meal when Woods and other properties, and all the ore, with Reich came upon the dreadful scene. the exception of that on the Pueblo, is very similar to the copper ores of Texada to the iglos by something in the bushes, very similar to the copper ores of Texada island. Apparently this mineral bearing zone occupies a territory, the okdest formation in which is limestone but as formation in which is limestone, but as body of a dead Indian. no fossils have been found and the limeno fossils have been found and the lime-stone wherever I saw it is fully crystal-Tized, it is practically impossible to desig-Masonic order. Thiery is from Davenport, nate the geological period to which it Ia., and Huston was formerly mate on the belongs. At some later period this lime-stone had been disturbed and metamorphosed by the intrusion of felcite, diabase and hornblendic granite dykes. The ore comprises carbonates, azurite and malacite at and near the surface, bornite to as great depths as has yet been Date. Vessel. ite to as great depths as has yet been attained in the workings and compar-5-S.S. San Mateo, Port Los Angeles 4,458 atively very little chalcopyrite.

the ore body is an extensive deposit of 19-S.S. San Mateo, Port Los Angeles 4,465 red hematite iron carrying low copper values on the surface, which, judging from the dump, disappeared entirely with 12--S.S. Mincola, Port Los Angeles ... 3,394 25--S.S. New England, Alaska 41 31--S.S. Milton, San Francisco 4,825 depth. I was unable to visit the workings in this claim where a depth, I was told, of 130 feet had been reached, because the shaft was full of water, and no pump-ing facilities were at hand. It is impos-8-S.S. Dirigo, Ketchikan on many of them it would appear that 22-8.8. Diego, Ketchikan the bodies possess greater extent than 22-S.S. STARVATION AND DEATH.

Rescue of Prospectors in Act of Cooking Flesh From Dead Body.

"A story of death from starvation and a ar approach to cannibalism came from Nome on the steamship Centennial, which arrived yesterday," says the Seattle Post-Intelligencer.

"Two men in the last stages of hunger were found in the act of cooking slices of flesh from the dead body of their companion, who himself had died from exhaustion and hunger. "George Dean, Joseph C. Thiery and John

Huston were lost in the Agiapuk district. After wandering about for twenty-two days with nothing in the way of food save a few aid: "Although I spent a week in the White into a deserted igloo, about ten miles up

the fact that it is a first class location from the pangs of hunger and the terrible for a town and has some good buildings and warehouses built of corrigated iron, and warchouses built of corrigated iron, the property of the railway company, I can express no opinion whatever as to its present prosperity or future prospects. About four miles and a half in a south-wasterly direction is situated the Conner westerly direction is situated the Copper King group of mineral claims as well as the group of concessions which are today controlled by the White Horse Cop-per company, of Vancouver. This group of mineral claims is apparently on the Woods fed the two survivors and carried them heat to The Cor-prospectors, came upon them. Reich and

the Carlyle, Rabbit's Foot, Anaconda, Pueblo, Grafter, Verona, Arctic Chief, Best Chance, Brown Club and Black given every attention at Teller. Both will recover, though they are now starved to "My opinion differs entirely from one skeletons. The body of Dean was conveyed "Before his death Dean began a letter

granite, and that at comparatively shalhis compan

opinion. The geological formation is captain and Thomas Hogan saw the piece "Woods stated that they were attracted
