Can be operated by a child. Requires cleaning only twice a month and filling twice as soon as the gas is made. I would pay you in cash as soon as the sale was made. I would also give honest and reliable persons credit of three and four months. All business strictly confidential. Any one writing to me and opening an account will also get a discount off my regular prices. All goods fully warranted.

C. P. R. WILL FIGHT GREAT NORTHERN.

PORTLAND, Ore., Sept. 28.—The Oregonian today says: Retaliation upon the Hill lines for building the Portland and Seattle railroad to reach Portland by the water level route along the Columbia river will come in the form of a new traffic agreement by which the Oregon Railroad and Navigation Company will admit the Canadian Pacific into the Columbian Basin and through such an agreement the Northern Pacific and Great Northern, their most aggressive competitors for the northern traffic.

RUBE WADDELL OUT OF THE GAME;

HIS PITCHING ARM IS BAD.

PHILADELPHIA, Sept. 28.—Manager Connie Mack of the Philadelphia American League baseball club, is considerably worried over the loss of the services of "Rube" Waddell, his big left-handed pitcher. Though the other pitchers of the team are doing excellent work, Mack believes that the championship pennant would be certainly his club's if Waddell could go to the box and pitch in the great form that he has maintained in the last few years. Waddell retired from the game at Boston, Sept. 8, in the third inning, complaining of a sore arm and has not since been in the game except for a few minutes. Then he found he could not get the ball over the plate and retired.

A MONUMENT OF GOLD.

If you should be fortunate enough to take a trip to China and visit Yangtze you will see a monument of which the Chinese are very proud. Well, they should be, for it is the only one in the world of its kind. It is of pure gold, and because of its great value is attached to the roof of the pagoda where it stands with heavy chains of strong iron. This monument is an object of great curiosity, and because of its value—being worth \$1,000,000—has to be guarded night and day lest robbers take it away. Several attacks have been made upon the Brahmins who guard it, but so far it has been bravely defended by them.

The inquiry into the matter of the \$17,000 which the Gibson interests still claim is owing to them from the I. C. R., and which came up the other day at Montreal, opened this morning before the Hon. H. A. McKowen. The meeting was only short, however, and nothing was done, the commission adjourning until Tuesday at Fredericton. Auditor Williams was in the city for the hearing, but returned home by the I. C. R. to Moncton. At the Moncton meeting the evidence of General Manager Pottinger was taken.

Schiff, head of the firm of Kuhn Loeb and Company, Bankers, of this city and formerly a director of the Equitable Life Assurance Society, was the first witness called before the legislative life insurance investigating committee for the quarter of a century prior to that time. The question of the propriety of the firm of Kuhn Loeb and Company desisting from the Equitable Society occurred to him and he took counsel upon the matter and was advised that there was nothing to prevent such relations. He was a director of the Society four or five years before he became a member of an executive committee of the firm.

NATIVES OF INDIA BOYCOTT BRITAIN.

Refuse to Use British Goods in Any Form.

Angry at Division of Bengal, Natives Strike Back—British Traders are Already Feeling the Effects.

CALCUTTA, Sept. 28.—Fifty thousand Bengalis assembled at the temple of Kalighat, have sworn by the Goddess Kālī to boycott British goods as a protest against the partition of the province of Bengal.

The administrative work of the province according to the views of the home and Indian government has grown to such unwieldy proportions as to necessitate a division of the labor, hence the partition of the province into two lieutenant-governorships. The Bengalis are intensely resentful at what they characterize as an attempt to split the population and impair the Bengali nationality. At scores of meetings throughout Bengal, the people have pledged themselves to support the boycott which has now received the sanction of the priests.

TYPHOON SWEEPS THE PHILIPPINES.

Immense Loss of Life and Property.

Two American Ships Wrecked, Many Drowned—Thousands of Natives Have Been Made Homeless.

MANILA, Sept. 28.—Reports now coming in from places along the path of the recent typhoon in the Island of Luzon and the southern islands indicate great loss of life and property. In the waters surrounding Samar and other islands many coasting vessels and island transports have been wrecked. The coast guard cutter Leyte is a complete wreck and eleven Americans and 31 natives were drowned.

At the town of Sorogon, 15 natives were drowned. The loss on hemp plantations is estimated at \$1,000,000.

The army transport Juan Rodriguez is ashore at Legaspi. In the interior of the island of Samar thousands of natives are homeless, and the same report comes from many of the other small islands.

The army post in the southern island have been destroyed. The civil and military authorities are rushing aid to the suffering people in the form of supplies of food and shelter. Owing to the destruction of the telegraph system reports received from other points are very meagre.

WIRELESS GAMBLERS INDICTED.

CHICAGO, Sept. 28.—True bills were returned by the Grand Jury yesterday against the promoters and owners of the City of Traverse gambling boat, charging the keeping of a common gambling house and a conspiracy to do an illegal act. Some of the defendants must face two indictments, for keeping a common gambling house and two indictments for conspiracy. Fourteen defendants were named in the bills. The evidence on which the indictments were voted related to a single occasion, when the boat was said to have been in Illinois waters, racing pools on horses were sold, the racing program being received by wireless telegraph.

HOW LONG SHOULD MAN LIVE?

Against cold, heat, and famine the white corpuscles are powerless, but they intervene for the protection of the organism in the case alike of a razor scratch or a stroke of apoplexy. They also struggle against the microbes of putrefaction. When the human body is invaded by such lethal microbes, the phagocytes rush to its defense, and, in so far as lies in their capacity, they not only kill, but swallow and digest, the hostile germ. This warfare is taking place incessantly in the pores of the skin and of the digestive tube, in the spongy walls of the mouth and nostrils and throat and lungs—wherever, indeed, the attacking microbes seek to find an entrance. For once that we are protected by spoon administered medicine we are protected a thousand times by the power of an innumerable army of microscopic bodyguards. Professor Metchnikoff's latest researches have shown that it should be possible to avail ourselves of our knowledge of the struggle between microbes and phagocytes as to be able to arm the body for a great length of time against old age itself. He believes that man does not now live the natural span of life, but that the score of years now allotted to the stage of "middle age" should and will be at a distant day extended to three or four score years.—Harper's Weekly.
