

ARROW and NITRO CLUB SHELLS

CANADIAN made from our new factory at Windsor, Ontario.

Try Remington-UMC Arrow and Nitro shells this season. Their absolute reliability makes them the choice of sportsmen all over the Dominion. We have yet to find the keen sportsman who balks at paying the price. Manufacturers use a little more nitro in the shell than you are used to. This makes them burn so hot that they will burn in the most adverse conditions. Your name and address will bring you a sample.

CULTURE

and May Be Grown with Great Profit

There is no other vegetable which is so profitable as celery. It is easy to grow and its requirements are few. It is a staple vegetable and its demand is constant. It is a profitable crop for the home grower and for the commercial grower. It is a healthy vegetable and its consumption is beneficial to the human system.

This extra space between rows allows blanching with soil by means of horse implement. Plants are more easily set and are more likely to live when placed in freshly worked soil than in other cases. An extra hoeing always pays. The rows should be marked either with line or marker of some kind. If the rows are properly pulverized, all openings necessary for setting plants may be made with the fingers. In other cases a "dibbler" or "frowel" is employed, or a light furrow may be struck and the work of setting considerably expedited. Care should be taken to firm soil around plants and to set them on a level with surface soil. The trench system may be employed for garden work but is not used commercially.

Celery uses very large quantities of soil moisture. Without it the plant becomes bitter, stringy and of inferior quality. Celery is often irrigated, but if cultivation is persistently practiced soil moisture may be maintained in sufficient quantities to meet the demands of the crop. One or two hand-hoeings will be necessary along with the cultivator to keep weeds in check.

There are several methods of blanching celery, viz.: Soil, boards, paper, and drainage tiles. Earth is always convenient, and as good as anything, provided the process consists of throwing soil from between the rows toward the plants until the sunlight is entirely excluded from the leaf-stalks, which means a blanched or whitened celery.

Early or summer celery is harvested as soon as it is blanched; and put on the market in such condition as market demands. Celery for winter is taken up root and all, and stored in cellar with root placed in damp soil. A good storage celery should have an earthen floor, proper ventilation, and should be frost-proof. The soil around roots should be kept wet. If the celery is allowed to "dry" no subsequent treatment will be found sufficient to restore its whiteness to the top.

The early and late blights of celery are common and not easily controlled. Bordeaux mixture will very much lessen these maladies if not entirely control them. Celery may be grown in New Brunswick as easily as elsewhere and should be grown in sufficient quantities to meet local demands.

The people of St. John (N. B.) are disappointed over the Dominion government's failure to carry out harbor improvement plans. It had been some such extensive project as the dismissal of a lock-tender for voting Liberal that the government would be Johanne on the spot.

THE "MIRACULOUS" STATUS.

The alleged miraculous status of the Virgin Mary in the cemetery of Bezares, in France, is causing a furore. A number of persons (says the Telegraph) who had expressed doubt as to the truth of the story took the miraculous virgin to be effected, got into a dispute with some women who were mounting guard over the statue. There would have been a hands-on fight had the "Liber" not come to put an end to the dispute. A woman had appointed herself guardian of the statue, and in exchange for small tips she took the hands of visitors and touched the statue with them, after which the handkerchiefs were supposed to have acquired a miraculous virtue.

TWO BODIES LOOK HORNS WITH I. C. R.

Canadian Brotherhood and Trainmen Await Word from Grand Officers

Increases Asked Eighteen Months Ago for Many Different Classes Refused by New General Manager—Compromise Offer Not Acceptable to Delegates—Left With Executive.

Two organizations representing 5,000 men, practically all the employees of the I. C. R. except the locomotive engineers and the telegraphers, have reached a deadlock in negotiations with the management for better terms and are awaiting word from the grand officers as to the advisability of a strike.

Several days ago the committee from the Brotherhood of Railway Trainmen members met on the 11th and decided to await the arrival here of W. G. Lee, president of the brotherhood, before formulating a plan of action following the refusal of the management to meet their request for changed working conditions. There are said to be about 1,600 members of the brotherhood on the I. C. R.

The I. C. R. conference between the representatives of the Canadian Brotherhood of Railway Employees and the management concluded on Saturday and it is reported from Montreal that adjournment was made with General Manager Gutelius and the delegates at loggerheads. The general manager announced that he was going on a two weeks' trip of inspection and that the men need not expect to hear nothing more from him during that time.

Put Up To Executive.
A. R. Mosher, president of the brotherhood, was in attendance at the conference, however, and it is understood that the I. C. R. organization is determined on the advance in wages demanded. The request was first made eighteen months ago when a revision of the schedule and an increase of twelve per cent in the wages of a large body of the members was requested. Negotiations have continued ever since that time and the men have been out of work since living had increased since the demands were first formulated, that they will be satisfied at present with the raise asked for below the wage of the ordinary laborer on the street and that it is impossible to live and raise a family with this wage. The men say that employees of fifteen years standing are not receiving more than \$55 a month.

Compromise Offered.
It is understood that Mr. Gutelius advanced an offer of increases to different classes ranging from two per cent to nine per cent. The two per cent increase would mean about three cents a day additional, and it was said in Montreal after the close of the conference that the delegates would not accept the small increases proposed or did not agree with Mr. Gutelius as to the amendments he offered to existing rules and schedules. The proceedings ended in a deadlock and future action rests with the Brotherhood executive.

Those Affected.
The Brotherhood numbers about 4,000 men on the I. C. R., comprising many classes, and the following are included in the list of those asking for the twelve per cent increase: freight clerks, general office clerks, divisional office clerks, freight clerks, sleeping and dining car conductors, chefs, cooks, waiters and baggage men, general freight forwarders, locomotive checkers and freight porters, station porters, baggage masters at passenger stations, ticket agents, car ferry employees at Miramichi and Point Tupper, round house employees, night sweepers, ash pit men, fire builders, boiler washers, tube cleaners, inspectors, crane-men, locomotive inspectors, locomotive

LETTERS TO THE EDITOR

CANADA'S EXPORT TRADE.
To the Editor of The Telegraph:
Sir—Referring to comments in your issue this morning about Montreal's efforts to capture the export trade, let me point out that Boston is thriving on Canada's export trade. A week ago the secretary of the Boston Chamber of Commerce showed me a book in which he records the export trade of Boston. Every month since December shows that more than fifty per cent of that city's exports was of Canadian origin. Several months showed seventy-five per cent and one month showed ninety per cent. The secretary has only kept the record since December of last year. The details of this trade should be gotten by our board of trade here.

Some years ago H. J. Logan's resolution favoring the tariff on wool was allowed only to goods in British vessels to British ports, was carried unanimously in the house of commons, but was never made law. It was agreed then that on the completion of the G. T. P. the above tariff policy would be applied. I am convinced that the above resolution was never intended to restrict British ports only to receive tariff preferential, would soon make a vast difference with the quantity of Canadian wool reaching the United States ports. What is the use of building railroads and making canals free of tolls (they are free to United States vessels) and then fall to adhere to the principle that the preferential tariff shall apply only to Canadian ports.

Yours truly,
W. FRANK HATHAWAY,
St. John (N. B.), July 24.

MOOSE AND DEER.

To the Editor of The Telegraph:
Sir—A communication in today's issue is headed "The last of that squirrel question" but with your kind permission, I would very much like to see both information and advice. I shall not write again.

The rectory speaks of irresponsible persons in cities who always watch for opportunities to use other creatures, even their fellow men, as targets in order to further their own sporting antics. They that they may gain notoriety. Now not for one moment would I have the reverend gentleman think that I would endeavor to set the kind of notoriety which could be obtained by a criticism of the acts of a rural rectory; but as a student of nature, I consider it my business to refer to unwarranted killing of bird and beast and shall continue to do so. It occurs to me that the rectory's ideas quite coincide with those of most of mankind at the time of Socrates. I therefore am not surprised to see that he quotes that philosopher. I would advise the rectory to confine his reading to writings from A. P. Long, and endeavor to better fit himself for his high calling, for a rectory who brags that he hopes to shoot one moose, two deer, a few ducks, partridges, snipe and woodcock, needs a change of heavenly man.

There are in this province over 170,000 male persons and presuming that one out of every ten is able to shoot, that a slaughter would follow if they claimed the right to kill one moose and two deer, as the rectory does—17,000 killers and 34,000 moose and 68,000 deer killed.

Very soon, I think if the other males

VITALITY SHOWS IN A MAN'S EYES

This, rectory, applies to you. It means I am here hinting at a marvelous power or force which you can easily avail yourself of and which might make for all the difference between future years of health, strength and bubbling spirits, or future years of ill-health and debility. Please use the free coupon below.

In speaking to you of this great mysterious power I care not what your years may be, whether you are young, middle-aged or elderly; I care not what in the past may have caused your loss of strength and loss of nerve energy. I care not whether you are a man, a woman, or a child; I care not whether you are a laborer or a gentleman; I care not whether you are a Christian or a heathen; I care not whether you are a Jew, a Mohammedan, or a Hindu; I care not whether you are a man of letters or a man of arms; I care not whether you are a man of science or a man of law; I care not whether you are a man of religion or a man of pleasure; I care not whether you are a man of honor or a man of dishonor;
