Kelley is now established to detain a south extensions. All three of Sherifi McLaughlan, started with his son and two assistants to the place men-tioned above. On the way they met a will have ultimately to be adopted, for the increase of shipping making use of the docks is at present 236,000 tons per annum. With this very considerable annual in-grease, and a gross revenue which last year amounted to more than one million ster-ling, with enlarged accommodation bring-ing larger receipts, the Liverpool Dock Board are clearly in a position to under take quite as large an extension of their dock system as is desired. History pre-sents few, if any, more wonderful exam-ples of commercial growth than that of the port of Liverpool. In 1757 the dock dues amounted to only £336 15s.; in 1850, very nearly a century later, they had reach-ed £242,069 14s 9d; and now, in the year lis72, the great necessity is still for more greater as the colonies and independent States of the East and West continue to develow their latent resources.
