Bernstorff on Peace Which Would be Hailed

WISHES LEAGUE OF NATIONS
BERLIN, Feb. 1.—A statement has been given the Associated Press by Count von Bernstorff, after consultation with the German Foreign Minister, which may be accepted as being what official Germany would consider a peace of right and justice.

His statement professes complete agreement with the first four points of Wilson's program and also welcomes free and impartial adjustment of all colonial claims; asserts Germany's disinclination with regard to Russia, except as to the prevention of the spread of Bolshevism; and announces willingness to pay for all damage done to civilians in Belgium and France, so far as this damage can be proven due to German aggression; a restoration of Alsace-Lorraine to France is resisted, and regarding this and any other proposed territorial changes it is held that a peace of right and justice presupposes that the principle of self-determination will be made superior to all territorial questions; the question of the guilt for the war should be submitted to a neutral commission.

"No Annexations" Winning at Peace Parley

Speeding up the Deliberations.

MORE COMMITTEES BEING APPOINTED.
PARIS, Feb. 1. (By Robert J. Bender)—The Peace Conference has developed so marked a tendency to accept the practical application of the Fourteen Principles to speed up its work, so the belief was expressed today, that President Wilson may find a second trip to France unnecessary. Whether the president will return after his departure for the United States two weeks hence, is known to depend not only upon the disposition of the most important problems in the interim, but also upon the trend of the conference policy after he has withdrawn from the council and their inclination to work along the general lines of the American program.

Just six weeks after his arrival in France, the President felt confident today that the pivotal victories had already been won and that further action by the conference will be in strict adherence to the broad principles included in the armistice terms. Within a few days the delegates will have accomplished the framing of a constitution for the league of nations, in conformity with the principle of "no annexations," the president believes.

Wilson is advocating the systematization of the peace work to the utmost, in order to hurry the handling of all problems. The plan for the reference of each great problem to a special committee is now known to have been adopted largely at his suggestion. It developed today that he also is urging that more committees be created to take care of the lesser questions, leaving the peace bureau free to center its attention on only the broad lines of the settlement and to make decisions on the findings of the committees.

With all these committees functioning simultaneously, a pace could be maintained that would bring the signing of the treaty several weeks nearer than was believed possible.

UNITED STATES TO RETAIN PHILIPPINES AND PANAMA

Monroe Doctrine Will Remain in Force.

NOW DRAWING UP LEAGUE RULES.
PARIS, Feb. 1.—The usual plenary session was postponed today to permit the peace bureau to speed up action on the frame work for the league of nations.

The belief was expressed in certain quarters that a demonstration of the practicality of the league, as evidenced in several recent decisions by the bureau, would hasten agreement on the details of its make up.

The German colonial question was virtually settled in accordance with the Principles of the league. Previously the bureau had acted in the capacity of an association of nations in warning Central and Eastern European countries to cease warring over disputed territories. The bureau assumed a similar capacity yesterday when it decided to send delegates to straighten out the argument between the Czechs and the Poles over the possession of that rich industrial district.

A queer tangle has developed in connection with the Czechs and Poles, in that their representatives are sitting at the same peace conference to arrange a treaty with a common enemy, yet there are outbursts of fighting between their own troops over the question of readjustments of their new boundaries.

A temporary settlement by the allied commission will be followed by final settlement by the league of nations, when the latter institution is formally established.

Speculation as to whether the Philippines and the Panama canal will be considered in the internationalization of colonial possessions and waterways, was ended today when it was authoritatively stated that neither would be brought up as both are strictly American and free from any dispute.

It was also pointed out that the Monroe doctrine will not be disturbed, as it will fit in automatically with the league of nations.
