

Fig. 1.

Fig. 2.

Fig. 1. *Bacterium tuberculosis* (avian variety) in smear from intestinal tubercle of hen. Stained with Ziehl-Neelsen's method, x 1,000 di. (Original).

Fig. 2. Adult hen in advanced stages of tuberculosis showing extreme emaciation due to the disease. The owner of the bird who sent it for examination stated that it had continued to eat heartily but had not been laying for some time. The crop was full of grain. Other members of the flock were affected with the disease in all stages, and many died during the previous eighteen months. (Original).
