# Jackson on the Eye

---

## **A Manual of the Diagnosis and Treatment of Diseases of the Eye.**

By EDWARD JACKSON, A. M., M. D., Emeritus Professor of Diseases of the Eye in the Philadelphia Polyclinic. 12mo volume of 535 pages, with 178 beautiful illustrations, mostly from drawings by the author. Cloth, \$2.50 net.

In this book more attention is given to the conditions that must be met and dealt with early in ophthalmic practice than to the rarer diseases and more difficult operations that may come later. It is designed to furnish efficient aid in the actual work of dealing with disease, and therefore gives the place of first importance to the conditions present in actual clinical work. A special chapter is devoted to the relations of ocular symptoms and lesions to general diseases.

### **The Medical Record, New York**

"It is truly an admirable work. . . . Written in a clear, concise manner, it bears evidence of the author's comprehensive grasp of the subject. The term 'multum in parvo' is an appropriate one to apply to this work. It will prove of value to all who are interested in this branch of medicine."

The author has endeavored to bring to the attention of the general practitioner special symptoms and methods of the greatest importance to him.

### **Boston Medical and Surgical Journal**

"This task he has performed admirably, and has given both to the general practitioner and to the specialist a book for collateral reference which is modern, clear, and complete."
