grandly-bred bull, Wanderer's Star—58585—.
Wm. R. Elliott & Sons, Guelph, Ont.

QUESTIONS AND ANSWERS.
Miscellaneous.

CASTRATING LAMBS.

As I got only part of my lambs cas-
trated, would it be advisable to get it
done this fall, or will there be too
much risk to run of losing them? I
want to feed them till spring.

A SUBSCRIBER.

Ans.—There would be more risk than if
it had been performed when they were
quite young, but if you have had good
success in the operation, there is no rea-
son why it should be specially dangerous
if done when the weather gets cool, say
about first November. Some flockmasters
claim to safely castrate rams of any age;
others have had losses in the case of
rams six to eight months old. Expe-
rience is the best teacher in this mat-
ter.

BEES IN MANITOBA.

1. Are bees kept with as much profit in
Manitoba, where there are bluffs of tim-
ber, as in Ontario?

2. Are they wintered successfully, and
how?

A SUBSCRIBER.

Ans.—1. It is impossible to answer this
question directly, but bees are being kept
quite profitably in many parts of Mani-
toba. Profits vary here as they do in
Ontario, and management and locality
have as much to do with results here as
there. Clover is not yet grown in
Manitoba as a farm crop, so bees have
to depend on wild pasture. This, as a
rule, is better, where scrub and bluffs
exist. Naturally, a locality could be
more easily overstocked than in Ontario,
but yards of 100 colonies have yielded
an average of over 100 pounds of ex-
tracted honey per hive. This, however, is
exceptional. Comb honey is not likely
to be as successful here as in Ontario, as
the honey flow is too gradual and long
drawn out.

2. Bees are wintered in cellars gener-
ally, and with perfect success.

Selkirk, Man. J. J. GUNN.

Veterinary.

A SICK SHEEP.

We have a two-year-old ram that has
not eat any of any account for about a
month. He never chews his cud; is fail-
ing in flesh. Is there any such thing as
grub in the head? If so, how do they
act, and is there any cure for it?

A. Y.

Ans.—There is such a trouble as grub
in the head of sheep caused by the eggs
of the sheep gadfly being deposited in
the nostrils, and finding their way to the
head, where they develop into life.
Preventive measures are the most satis-
factory, tarring the nostrils being as
good as any. Some have claimed to
effect a cure by filling the nostrils with
tobacco juice, holding the head up mean-
while to cause violent sneezing, which is
said to dislodge the grubs. Professional
practitioners claim to have saved animals
so affected by trepanning; that is, saw-
ing a part of the bone of the skull, tak-
ing out the grubs, and replacing the
covering. The symptoms of grub in the
head are holding the head to one side
and a little higher than natural. We
judge, from your description, that the
ailment of your ram is something differ-
ent. Would advise giving half pint of raw
linseed oil and a teaspoonful of spirits of
nitre. Administer gruel if he does not
eat, and give a little gentian as a tonic.

POTATO-DIGGER TESTED.—A new
potato-digger is being placed upon the
market for the season's work by that
well-known firm, The Dennis Wire &
Iron Works Co., of London, Ont., that
bids fair to prove a very popular im-
plement. On Sept. 17th it was thor-
oughly tested on the farm of Mr. Hy.
Tanton, some distance west of the city,
on both sandy and heavy clay soil, and
gave excellent satisfaction, raising the
potatoes thoroughly. Part of a field
that had been dug with a fork was gone
over with the digger, and many tubers
were turned up. It is drawn by two
horses; a pair of front wheels (ad-
justable) straddle the row, and the point,
with six spreading prongs in rear for
separating the tubers from the soil, is
also movable up or down. Strong and
simple in construction, it appears to be
just the implement the potato-growers
have been looking for.

Clean Skimming
Means Good Living

The hog trough is no place to put
butter.

Wide awake farmers want the
cream separator that skims the clean-
est. It means more profit—better
living. That separator is the Sharples
Dairy Tubular—the separator that's
different.

Sharples Dairy Tubulars have
twice the skimming force of any other

separators—skim twice as clean.
Prof. J. L. Thomas, instructor in
dairying at the agricultural college of
one of the greatest states in the Union,
says: "I have just completed a test of
your separator. The skimming is the
closest I have ever seen—just a trace
of fat. I believe the loss to be no great-
er than one thousandth of one per cent."

That is one reason why you should
insist upon having the Tubular. Tub-
ulars are different, in every way, from
other separators, and every difference
is to your advantage. Write for cat-
alog \$-15 and valuable free book,
"Business Dairying."

The Sharples Separator Co.,
West Chester, Pa. Chicago, Ill.
