

THIS IS A REAR VIEW OF

The Humane Horse Collar

SOMETHING no thoughtful farmer can afford to be without at least ONE, if he owns one pair of horses, or TWO if he owns more. Now, why? you ask. FIRST, because owing to the high price of horses, and all products raised on the farm this year, above all others. It is absolutely essential from a monetary standpoint that the horse should be kept well and busy. THE HUMANE COLLAR is the only one made to-day that is guaranteed to do this. If your horse should be idle for one day, it will more than pay for the collar, but when he gets sore shoulders it takes more than one day to cure him.

SOLD BY OVER 5,000 HARNESS DEALERS.

Over 60,000 sold in the U. S. last season. The Humane Horse Collar has 40 square inches of pulling surface to 10 inches on the old-style collar. The pulling is all done where the shoulder is the strongest, and where it is best protected by heavy layers of muscles. NO grinding from one shoulder to the other. NO pressure on top of the neck. NO hot sweat pads to chafe the horse. NO choking on going up hill. NO sweated horses, and NO sore shoulders or necks with THE HUMANE HORSE COLLAR.

It is adjustable to any horse from 16 to 26 inches, and is put out on 15 days' free trial; if not entirely satisfactory your money cheerfully refunded. Write to-day for free catalogue describing and giving testimonials, then order one from your dealer for the spring work. If he cannot supply you, order direct from us. Address:

QUESTIONS AND ANSWERS. Veterinary.

SWOLLEN LEGS.

Last fall, my pregnant mare had three swollen legs, and they cracked at heels and discharged matter. Two of them healed up, but are still swollen. The swelling subsides some when she is exercised, but reappears. The other leg is quite sore, and discharges a watery fluid. E. M.

Ans.—Some horses are predisposed to this condition, and especially some mares when pregnant. Get a solution of corrosive sublimate 30 grains to a quart of water, and rub this well into the skin of the leg that still discharges. Rub twice daily. Hand-rub, and bandage the other legs. As she is in foal, it will not be wise to give medicine internally. Feed on easily-digested food, as good hay, bran, and linseed meal, and some rolled oats. Give a few raw roots daily, and give regular exercise, or light work. It is probable she will give you trouble until she gets on grass, and there is a danger of the legs becoming chronically enlarged. V.

A DANGEROUS DITCH.

There is a large ditch on a certain road in our township. It formerly was a Government drain, but was made a municipal drain. This drain is now about 40 feet wide in some places, leaving it dangerous to travel. The farmer who owns the land along the dangerous place, refuses to allow people to drive through his field unless the commissioner pays him about four times as much as other men ask for winter roads in time of drifted roads. Will I have to give him his price, or am I liable for any accident that might happen for not doing so—as a commissioner? Ontario.

Ans.—It would seem to be advisable for you to refer the matter to the council of the municipality. We do not see that you are in a position to compel the landowner to grant the desired right of way. At the same time, you are in duty bound to see that the matter is dealt with; and, under the circumstances, the council would seem to be the proper parties to suitably deal with it. If you take the course suggested promptly, we think you will thereby avoid the danger of incurring liability of the sort mentioned.

TRADE TOPIC.

FARM HANDS FOR CANADA.—Notwithstanding the great flow of immigration to Canada during the past few years, the need of farm help seems to be almost as great as ever, and, in order to meet the demand, the Salvation Army has had ten experienced Canadian representatives in Great Britain during the past three months, selecting a good class of able-bodied men and women, whose emigration will be arranged this spring. As the Emigration Department of the Army has done extensive advertising in the rural districts of Great Britain, it is expected that they will be successful in bringing a class of people to this country who will readily adapt themselves to Canadian farming.

Married Men as Permanent Settlers. There is a great desire on the part of married men with families to emigrate to Canada for farm work, and it is gratifying to observe that farmers are seeing the advantage of making proper provisions to be in a position to hire this class of help. Married men are to be heartily recommended as making the most permanent settlers, being anxious to make homes for their families in this country.

Full information and Application Form will be furnished by Lieut.-Colonel Howell, Immigration Office, James and Albert streets, Toronto, or Staff-Captain Williams, Clarence street, London.

It is expected that parties of men for farm work will arrive during the months of March, April, May, June and July, under the supervision of the Army's duly appointed conductors, and will be sent from port of landing direct to situations throughout the Provinces of Ontario and Quebec.
