Given to Question of Elders as Moderators—Case of Dr. Shearer Again Comes Up

By Courier Leased Wire London, Ont., June 13 .- The exed question of the throwing the office of moderator open to elders as well as ministers, which took up practically all of last evening's session of the Presbyterian Assembly, leading to heated argument with accusations and denials hurled across the floor of the house, was this morning quite peaceably given its quietus for another year, when a new amendment to refer the matter to the Presbyteries, to be reported

on to the next Assembly, carried. The announcement that Rev. Dr. shearer had accepted the position of secretary of the Dominion Social Service Council, which would have seemed to have left no further grounds for discussion of his re signation, led to another warm exchange of accusations and counter-

Dr. J. U. Tanner, of Quebec, said Dr. Shearer's resignation was introduced to the board solely by himself. It was not fair to accuse the committee of trying to oust Dr. Shearer because they had not been able to find a position to keep him. "It is not by the whispered councils of a politician," he went on, "we are trying to exercise by influence. What we do we do openly." He accused Dr. Dickie of inconsistency in proposing a new office properly, and always suffered with for Dr. Shearer, which would have made him a dictator. This Dr. Dickie denied. The posi-

tion was advisory and/left the Asembly supreme. On motion of President Murray of Saskatchewan, Rev. Dr. Shearer's fect on September 1, and he was made a member of the board of place of Frank Yeigh of Toronto. A resolution of appreciation of Dr. Shearer's service was passed.

Rev. Gerard Graham wanted this had been suggested for Dr. Shearer of superintendent of home missions and social and moral reform and had that tight uncomfortable feeling offer it to Rev. D. C. MacGregor, in my stomach, and chest since I pastor of St. Andrew's Church, Lon- began taking it, and the sourness

Rev. Dr. Neil, ex-moderator. to think over for a year.

Rev. W. R. McIntosh wanted a committee of Assembly associated with the board to make provision for the meantime and bring in a ecommendation to the Assembly 'Let the matter simmer for a year, was the advice of President Murray but Rev. J. G. Miller of St. Mary's thought this was not good business. This was a critical time and there should be no temporizing. The mater was dropped.

A communication from the secreary of state regarding the proclamation of Sunday, June 30, as a day of sational humiliation and prayer for the success of the Allies and righteous peace, brought the suggestion from Rev. James of Braeside, Ontario, that they should pray for their enemies also, "at home and abroad." There was nothing pro-German in this, it was pro-humanity.

Rev. Dr. Campbell of Montreal told the Assembly that when he led

in prayer he prayed for the enemy "that he may be brought to a sane frame of mind." This, he thought, about covered he ground.

J. L. Lachute quoted as a sugrestion as a prayer once offered by Dr. King of Aberdeen for Queen

Victoria:

"I pray for her, I pray for you; I pray for every sinner out of hell."

The communication of the secretary of state was acknowledged and the Assembly agreed to fall in line with the action of the Anglican diocese of Toronto and commend to the churches the setting of the latfer half of the week preceding June 30 for preparation for the day of

MISS' OR SMALL WOMAN'S DRESS.

The back closing is a feature which is much used on misses' dresses, and prebably the best reason for its popularity is adapts itself well to trimming, such as beading, braiding or embroidery. The dress shown in No. 8741 has a very new and smart, collar which also buttons at the back and rolls up rather high about the neck line. It is cut in a very unusual shape, with tassels weighting each corner. The front of the waist extends down over the belt and is trimmed with buttons. The two gored skirt is gathered to the slightly raised waistline.

The miss' or small woman's dress pattern No. 8741 is cut in three sizes-16, 18 and 20 years. Width at lower edge of skirt is 1% yards. As on the figure, the 16-year size requires 3% yards 36 inch, 314 yards 44 inch, or 27 yards 54 inch contrasting material.

To obtain this pattern, send 15 cents to the Cautier, Brantford.

But Tanlac is Only Thing That Helped Him

"Well, there may be other mediines as good as Tanlac for troubles like I had, but I have never been able to find them, and if I have spent one dollar during the past nine years, trying to get well, I have spent five hundred." Edison E. Bradshaw, who made this statement, is a contracting painter and decorator and lives at 593 Jane street.

"My appetite seemed to be fairly he continued, "that is, I could eat, but I couldn't digest my food ndigestion after meals. Gas would form and bloat me up and press on my heart so at times I felt like I was smothering. There was heavy eeling in the pit of my stomach like my food had lodged there in a lump. was bilious all the time and often resignation was accepted to take ef-fect on September 1, and he was through the back of my neck. I was also very nervous, couldn't rest well nome missions and social service in at night and felt tired, worn-out and unfit for work all the time.

"I lost weight all the time, and when I began taking Tanlac I was, off more than twenty pounds. But assembly to create the office which I have already gotten back fifteen ounds and have just finished my fourth bottle of Tanlac. I haven't and gas have disappeared entirely My food seems to digest perfectly. hought it unwise to take action at and I can eat and feel nourished and his late stage of the Assembly. In refreshed from it. I'm not bilious this Mr. MacGregor concurred. The any more and am feeling much matter should be left to the board stronger and better in every way. in recommending it.'

Tanlac is sold in Brantford by Robertson's Drug Store, in Paris by Apps Ltd., in Mt. Vernon by A. Yoe-

PREVENT MILK SOURING LARGE INCREASE IN

Potatoes Increases Yields.

xercise Male Breeding Stock-The Bull, Stallion, Ram and Boar Must All Be Given Exercise If the Standard of the Herd Is to Be Maintained

(Contributed by Ontario Department of Agriculture, Toronto.) T is one of the anomalies of life that the sources of our greatest pleasures and greatest means of good, may also be sources of life's greatest pains and most harm. Milk is a case in point. Milk is the best source of life's greatest needproper and sufficient food. It may also be a cause of the destruction of life, because it may become the home or feeding ground of those death-dealing organisms which are Spent \$500 For Medicines, now recognized as the cause of practically all deaths, except those due

to accident or old age.

Fortunately we have discovered combating the effects of what are called pathogenic (disease-produc ing) hacteria. These may be stated in a few short rules as follows: 1. Milk which is consumed in raw condition must be drawn only

from cows which are healthy. 2. As soon as the milk is drawn from the cow, it should be cooled to 50 degrees or lower, and be kept at that temperature until consumed, 3. All pails, strainers, dippers, milk bottles, pitchers, etc., which come in contact with the milk, must be thoroughly washed and preferably steamed, or be rinsed after washing in a chloride solution, which has been found to be one of the best germi-

cides. 4. Milk should not be exposed to the air any longer than absolutely necessary, as this seeds the milk with fresh lot of germs. This means the keeping of milk in a closed wessel and not in an open dish. 5. "Left over" milk from meals should not be put into the general

supply, as this causes the whole lot to spoil. 6. "Left over" milk from the sick room should be pasteurized or destroyed, as it may spread disease. 7. Milk at all times and in all places should be kept "clean" and "cool."—Prof. H. H. Dean, Ontario

Roguing Potatoes

Agricultural College.

The average yield of potatoes per acre in the Province of Ontario for the past thirty-six years has been about 115 bushels. The yields vary stronger and better in every way. greatly, In 1917 there were vari-Tanlac has convined to the that it's ations in Ontario from twenty-five great medicine and I take pleasure or less up to seven hundred bushels per acre. People are realizing more and more that for high yields of potatoes conditions must be favorable. It is important to have good fertile soil well cultivated and to plant a mans, in Middleport by William Ped-die, in Onondaga by Neil McPhadden. Ilberal supply of seed of the best varieties at the proper time. Seed potatoes somewhat immature which have been produced in a cool climate, and which are comparatively free from disease, are apt to furnish seed of high quality. Even under these conditions it is well to care-fully inspect the seed before plant-ing and to thoroughly rogue the

growing crop.

A potato field is rogued by removing the undesirable plants. A thorwood roguing of the growing crop once or twice during the summer is one of the most effectual ways in ridding the field of a number of the ridding the field of a number of the potato diseases. This operation would also insure the immediate removal of the weak and unthrifty plants which are sure to produce undersizable seed. Potato growers sometimes go through their fields and remove all plants which are not true to type. Thorough roguing is one of the best methods of securing pure, healthy seed of high quality.—Dr. C. A. Zavitz, Ontario Agricultural College.

Exercise is essential for all male breeding stock. At certain seasons of the year it is an easy matter to

of the year it is an easy matter to arrange for ample exercise for the stallon, the bull, the boar, or the ram. At other times it is rather difficult and frequently little or no exercise is given, or if given too much freedom occasionally, harm to the sire is the result.

The bull should not be allowed to run loose in the pasture with the cows. In the first place it is a dangerous custom, as it gives abundant opportunity for the bull to attack a person unawares or where escape is difficult. Further, a record of the date of breeding of the cows cannot be kept and no herd can be handled to the best advantage without these records.

records.

The main points to be observed in keeping a bull in good condition so as to retain his breeding powers are to avoid excessive use when young and to give plenty of exercise and a moderate ration when mature. A good boxstall, about ten by twelve feet, gives freedom indoors, and it is well to arrange for a strong paddock outdoors with convenient passage between the two. Two or more bulls of any age may be kept together if they be dehorned, and the advantage is that more exerand the advantage is that more exercise will be taken.

cise will be taken.

The stallion on a route usually gets plenty and sometimes too much exercise, at other times moderate work of the boxstall and paddock will suffice.

The ram running during the greaturer part of the year with the main flock gets plenty of exercise, especially if the breeder is aiming for a crop of strong lambs, and gets the flock outside practically every day during the winter.

The boar will do best on a great

The boar will do best on a grass plot with plenty of shade during summer, and in a pen provided with a small yard during the winter months.—Harry M. King, B.S.A., Oritario Agricaltural College.

An attempt to bribe an express clerk cost H. Kandelman, a Brook-lyn merchant, three months' im-

Production of First-Class Seed Returns Show Gain in Extent of Land Sown at

> Ottawa, June 13.—An increase of 324,950 acres in the amount of and sown to grain and hay in Canada this year as compared with last year is shown in the first preliminary crop bulletin for the season, is sued to-day by the Dominion Bureau of Statistics. This is an increase of The returns show very satisfatcory increases in the areas sown to wheat and oats, and the condition of these crops on May 31 was generally better than at the same

> date last year. The total area sown to wheat for the whole of Canada for 1918 is estimated at 16,080,800 acres, as compared with 14,755,850 acres, finally established figure for 1917. The area to be harvested of fall wheat is 338,000 acres, and the area sown to spring wheat is 15,742,800 acres, so that the increase of the later as compared with 1917, is 1,712,250, or 12 per cent. The area sown to oats is placed at 13739,000 acres, as compared with 13,313,400 acres last year, an increase of 425,600 acres, or 3.2 per cent. Barley Acreage 2,395,800.

The acreage of barley is 2,335, 00, as compared with 2.392.20 in 1917; of rye 234,530, as against 211,880; of peas 200,430. as against 198,881; of mixed grains, 506,530, as against 497.236; of hay and clover 8,200,300, as against 8,225,-034. and of alfalfa 103,800, as against 109,825. The areas sown this year to wheat, oats, barley and rve are the highest on record for Canada. The acreage sown to wheat in the Prairie Provinces totals 15,196,300, as against 13,619,410 eres last year; to oats 8.767,000 acres, as against 8,559,500 acres.

and to barley 1.845,500 acres, as against 1,850,000 acres. To wheat, Manitoba has 2,618,000, Saswkatchewan 9,220,600 and Alberta 3,356,300 acres. Under oats the acreages are for Manitob ,500,000, for Saskatchewan 4,602,-000, and for Alberta 2.665,000, whilst for barley Manitoba has 715,-000 acres. Saskatchewan 663,500 and Alberta 467,000 acres. Nearly all the Provinces have considerably increased their acreage under spring wheat. Nova Scotia by 11, New wheat. Nova Scotia by 11. New Brunswick by 44, Quebee by 24, Ontario by 45. Manitoba by 7, Saskatchewan by 1116 Alberta by 16 and British Columbia by 6 per cent. The acreage under oats is also increased by magnetic than the second by the se creased by percentages ranging from per cent. in Saskatchewan er cent. in British Columbia, Manitoba showing no change.
