**Farm Wife Should Be a Co-Partner.**

It is only a contented, willing, thrifty and competent wife that can provide adequately for the needs of the farmer and keep the social atmosphere of the farm so wholesome and pleasant that work becomes a joy to the family and to such help as may be employed. One of the shames of farm life is that such services are accepted as a matter of course, and that little, if any, recognition is given for the important place taken by the wife and mother in making the farm financially successful and the home a fit place in which to rear a family. One of the best definitions I have heard of an ideal farm is "A home with a farm business attached." If this view were to be commonly accepted the plane of living on farms would be much higher than it now is, and the duties and influence of the home manager would be put on a par with the duties and influence of the farm manager. Then the farm business would become a partnership in fact.

**Meat Consumption Figures.**

The average per head consumption of meat of all kinds, exclusive of poultry and game in Great Britain, was about 120 pounds a year prior to the war. Of this amount three-fifths was home-produced, and two-fifths was imported. Of the overseas supply 70 per cent. of the mutton, 17 per cent. of the beef, and 9 per cent. of the pork came from within the Empire—Canada, Australia, New Zealand and South Africa.
