FREDERICTON, MAY 1, 1895.

A SUGGESTION FOR DR. M'LEOD.

At the temperance meeting Sunday \$2,485; the tolls amounted to only \$126. evening, Rev. Dr. McLeod, in speaking of As an investment, the Tay Canal, or Hagprohibition, said "he wished he was gart's ditch, takes rank with the Frederan army or a flame of fire, he would go over the Dominion and stir up the people to the nature of the hideous, hateful and damnable liquor traffic. The time was ripe for action. If men were honest in their convictions they would send representatives to parliament who would stand up like men on the prohibition question. Ample opportunity would be given them at the approaching Federal elections to show their honesty in this regard."

Now there is no possibility of Dr. Mc-Leod ever becoming either an army or a with ability, an eloquent tongue and good lungs, and with these he could do a large amount of useful labor in the prohibition cause. Why not start right here in York county, with the weapons at his command. Here the government have a candidate for parliament who has declared that when he voted for immediate prohibition he did it "in a moment of weakness," that he is sorry for it and will never do it again. Surely, with his

THE NICARAGUA DIFFICULTY.

Nicaragua, a little republic in Central America, has attracted the attention of 1860 a treaty was effected by which the judges, instead of accepting judgships. Mosquito reservation was allowed to retain its independence, but last year Nicaragua made one more attempt to seize the country and was successful. The British Consul, Mr. Hatch, intervened and the Nicaraguans in revenge seized him and threw him into prison, and subsequently with other British subjects expelled him from the country. Such treatment of her subjects aroused the ire of Great Britain and she demanded satisfaction from Nicaragua. Seventy-five thousand dollars in cash is the amount Great Britain asked the Nicaraguans to hand so powerful an ally. However, the necessary. Yankees felt it was none of their particular business, and the British government proceeded to lay down its ultimatum to the Nicaraguans. It was this, pay over the indemnity at once or we will occupy Corinto, close the port to commerce, and seize all vessels carrying the Nicaragua flag. The republic still declined to meet Great Britain's terms, and on Saturday morning last, the English Admiral Stephenson, landed his forces, took possession

The garrison at Corinto, which consisted of a small force of 150 or 200 men | TOUCHED OFF A POWDER HORN. was withdrawn to the interior, leaving the British in peaceable possession of the town. No opposition was made to their landing, but it is stated by those familiar with the Nicaraguan programme, that any attempt on the part of the British forces to penetrate to the interior, or, in short, to leave Corinto, will be resisted by Nicaragua. Great excitement is reported to exist, not only at Corinto and burning the powder. The result was a Managua, but throughout the republic. It is now said positively that Nicaragua held the horn, had both his thumbs cut will not pay the \$75,000 idemnity de- off and was blown away a considerable manded by Great Britain. The town of Corinto is so situated as to be almost entirely surrounded by water. It is connected with the mainland by a bridge 600 yards in length. The Corinto soldiers and people removed to the mainland across this bridge. The town has a population of about 2000 souls. Many of the inhabitants are foreigners, principally Americans, Germans, Italians and British, engaged in trade. It is the principal port of entry for Nicaragua.
