

IS RUSSIA SOLVENT?

Lucien Wolfe, in a letter to the editor of The Times, discusses the question, "Is Russia solvent?" He shows that deducting the gold held by Russia abroad, which is earmarked for purchases and for a guarantee to holders of her debt, the metallic reserve is very far from corresponding to the note issue, and in this respect Russia is in much worse position than two years ago. Of 1,200 millions of roubles notes in circulation, 700 millions have no metallic basis, and if we deduct 300 million which by law may be issued without such basis, there still remain 400 millions uncovered, which, by law, ought to be guaranteed by gold in the treasury. The Times says: "It is impossible to ignore the significance of this condition of affairs existing in spite of the foreign loan last April, which produced 677 million roubles. That large sum appears to have been swallowed up in the pull of indebtedness which it is so far from filling that the treasury is worse off 400 million roubles than two years ago."

RENNIE'S ACADEMY.

David C. Rennie's dancing academy on Third street was opened last night by the first of his informal weekly dances. These will be given every Thursday evening during the winter months. The hall was barely finished, and paraffine took the place of shavings as a floor covering only an hour before the opening, so that the proper glasses were only commencing to come on the hardwood as the evening advanced. Nevertheless the hall was comfortable and the evening pleasantly spent.

VANCOUVER PROPERTY AT \$2,000 PER FOOT.

Province: The record price for Hastings street business property was recorded today when at the rate of \$1923 per front foot was paid for the lot and building at the northeast corner of Hastings and Homer streets. This property is now occupied by the Medical Hall drug store, owned by the McEwen, Atkins, Watson Company, and carries a two-story brick building. The best previous price for property on this street was something over \$1,700 per front foot, paid last week by Mr. A. Grossman for the building on the south side of the street between Homer and Hamilton streets, now occupied by the Dominion Trust Company. The price paid for this was \$45,000. Prior to that sale the purchase of the Leland Hotel site by Mr. Dominick Burns at the rate of \$1,500 per front foot held the record. Mr. Grossman is the purchaser of the Medical Hall property, and he paid the sum of \$100,000 for it. The frontage on Hastings street is fifty-two feet. The corner is one of the best business sites in Vancouver, and it is looked upon as being a remarkably good investment.

THE AUSTRALIAN TARIFF.

Ottawa, Oct. 11.—D. H. Ross, Canadian agent at Melbourne in his last report to the department of trade and commerce, refers at some length to the Australian tariff proposals. He says the schedule of tariff concessions in favor of the United Kingdom is limited to a number of lines and mostly apply to goods not manufactured in Australia. If the reciprocity schedule becomes effective, the difference in rates of duty charged by Australia on certain lines of Canadian and British products would be as follows:

Table with 2 columns: Goods, Rates. Items include Great Britain Canada, Bicycles ad motor cars, Furniture, Plated ware, Rubber and shoes, Boots and shoes, Rubber boots, Paper hanging, Engines various.

POWERS SENT UP FOR TRIAL.

(Bulletin Special). Winnipeg, Oct. 11.—Thomas Powers was sent up for trial on a charge of manslaughter at the preliminary hearing held today before Magistrate Daly. He is accused of having killed Thos. Humphries on Oct. 6th in a drunken scuffle at the Stock Exchange hotel. Alex Savage who was also under arrest on the same charge will be held on bail as a material witness. A crusade against the social evil will be begun tomorrow. Special police will patrol the infested district taking the names and addresses of all visitors.

THE WAR IS OVER.

(Bulletin Special). Washington, D. C., Oct. 12.—Cable advices received here from San Domingo state that an agreement has been reached between the government and insurgent forces in the Odorborough of Monte Cristi, whereby the insurgents will surrender to the government tomorrow and General Linauro who conducted the campaign for President Caceres will become governor of Monte Cristi.

TO BEAUTIFY THE CITY.

Board of Trade Committee Wants Boulevard Up and Down the River For Miles.

Early last summer a committee of the board of trade of this city was appointed to report on means of beautifying the city. The result will be found in a comprehensive report submitted and adopted at the meeting of the board of trade yesterday afternoon. The report advocates a boulevard along the river banks, a width of two hundred feet across the city. It recommends that the city secure the entire escarpment along the bank to be used as a park and a boulevard of the Rat Creek and Great creek ravines. It recommends also that the assistance of the provincial government be asked to construct a driveway along the river bank up and down stream for a distance of fifteen miles. Mr. Short, speaking in support of the scheme said that such measures were making headway in the American cities and that large sums were being spent for such purposes. Mr. M. W. Mackenzie supported Mr. Short's motions to adopt the report and particularly referred to the removal of the cemetery from its present location. A. D. Picard thought the plans were too comprehensive, and objected to going beyond the city limits with any scheme of improvement. Mr. J. H. Morris was heartily in favor of any scheme to improve the roads in the vicinity of the city. Mr. J. B. Walker thought the council and government should follow in the steps of the Ottawa council and Dominion government in beautifying the Canadian capital.

NEW PLANING MILL FOR 'CONA.

Messrs. P. H. Baldwin and E. M. Fuller lately with Messrs. W. H. Martin & Co. Strathcona have entered into partnership with Messrs. Davidson & Wolfe, contractors, who have for several years been carrying on an extensive business in Strathcona at their factory situated on Main street. The new firm will be known as Davidson & Co. They have decided to erect a two story frame planing mill 40x10 feet on the corner of Anderson street and Niblock street. The work will commence immediately and will be completed before winter. Mr. Baldwin leaves next week for Toronto to purchase new horses to be used in the new building when completed.

people in the art of bread-making as we practice it today. Although wheat loaf is the ideal bread, there are many honored members of the great family. Bread has an ancient lineage, and "brave John Barleycorn" was once the hero of the common people. Because of its cheapness it has always been the staple food of European nations. The famous black bread of the Spartan soldiers was made of barley, but the Romans hated it, and gave it to "the cowardly and careless." "The brave and fortunate shall eat of the finest wheat," was an old Roman saying. Buckwheat is breadstuff. In Saxony and Silesia it forms a part of every meal in Italy and Holland it is made into a crumpet, which is highly esteemed by all classes.

TO WINNIPEG NEXT YEAR.

London, Eng., Oct. 11.—At the semi-annual meeting of the stockholders of the G. T. P. held today, President Sir Charles Rivers Wilson complained of increased taxation imposed by the Canadian government, particularly the increase in the tariff on rails. If the company continued to buy rails in the United States it would mean an increase in cost of \$1,250,000 for renewals on the present system and an increase over the estimated cost of the construction of the Grand Trunk Pacific railway of \$4,000,000. The president also complained of a great increase in the taxation imposed by the Ontario government and said he anticipated in another year to seek the completion of the Grand Trunk Pacific railway from Edmonton to Winnipeg, but he feared that the government would not be ready with the section from Winnipeg to Lake Superior Junction.

CITY OF REFUGE.

A correspondent of the London Times, in an article from Persia, says:

"According to the latest news from Teheran, the success achieved by the 'reformers' in wringing the promise of a more liberal Constitution from the Shah was not altogether final, and the struggle is about to be resumed on the same lines as before. The peculiarity of this struggle is that the popular party has confined itself hitherto almost entirely to a systematic campaign of passive resistance. The tactics adopted are familiar to anyone who knows the East. In China, for instance, it has been for centuries the one effective weapon against the disposal of the non-official classes against excessive oppression from above. The great merchant guilds pass the word that business is to cease until such and such an official has been removed, or such and such a measure revoked; the bazaars put up their shutters, the native banks are closed, and a paralysis of social life ensues which almost invariably brings the mandarins to their knees. Much the same procedure seems to have been adopted in Teheran, with this difference, that powerful religious influences were also mobilized, and that the objects of the movement were of a far-reaching character. The late

THE LATEST RISE IN LUMBER.

Calgary Alberta.—Rough lumber has again been advanced one and two dollars a thousand according to the grade. It is by the Lumber Manufacturers of British Columbia. This decision was arrived at a joint meeting of the Mountain Lumber Manufacturers Association and the British Columbia Manufacturers Association at a meeting held by their several days ago in Vancouver.

THE ORIGIN OF BREAD

Before the dawn of history there was bread and baking, for cooking is one of the oldest arts, and we cannot imagine life without bread. Who can tell the origin of the raised or leavened loaf? "Chaldaea claims the discovery," says one authority, "and it is certain that Chaldaean bread was famous for its excellence." Egypt knew the leavened loaf, for Moses interdicted it during the Passover season. Pliny says that the first the French used yeast made from fermented malt, but they surely must have forgotten it or considered it too much trouble for it was not a general method until the seventeenth century. Those old folks had some queer ways. The faculty of medicine declared yeast-made bread to be bad for the health, and Louis XIV. prohibited its use. It took many years to educate the

MAKING TREATY WITH CREES.

W. F. Breden, M.P.P., returned yesterday from Prince Albert where he went to be on hand when the McKenna party distributed the scrip to the half breeds of the country to the north of that town. Altogether the scrip distributed 330 land scrips of 240 acres each and 275 money scrips redeemable at \$240 each as payment on government land. The party also made treaty with a large number of Indians in the North Saskatchewan country. They have completed their work for the year and have gone back to Ottawa.

TEACHER SHOT.

Cleveland, Ohio, Oct. 11.—In the presence of sixty pupils in the south

Buclid school this afternoon, Harry Smith, 25 years old, shot and killed Miss Mary Shepard, a teacher, aged 22 years. When brought to bay, Mr. Smith shot himself through the head, dying instantly. Four Cleveland policemen with drawn revolvers and under cover of eight armed farmers, were about to rush on young Smith, when he ended his life. "Disappointment in love is said to have been the motive."

THE EARL SHOOTING.

Indian Head, Oct. 11.—Earl Grey arrived here today and left for the File Hills by automobile. He will spend a couple of days among the chickens and ducks.

NEW WARSHIP.

London, Oct. 11.—The Daily Telegram today says that three armed cruisers, now under construction, the Infelix and Indomitable on the Clyde and the Invincible at Elswick, about which much secrecy has been maintained by the admiralty, are in reality battleships of as heavy broadside as the Dreadnaught, but very much faster. These vessels will in fact be the most wonderful ships ever built by any navy. They will have greater offensive power than any two battleships now in commission in any fleet in the world, combined with extraordinary speed, far in excess of anything hitherto attained by any warship.

DEVELOPMENT AWAITS ONLY TRANSPORTATION.

"Transportation in the north," said J. W. Swigert, who returned from the fur country a few days ago, "is going to be a very serious problem. There are immense resources which await only transportation but they are at present locked fast behind 50 miles of rapids and development is impossible."

Mr. Swigert, who has followed the fur trade in the north for many years and has a whole string of posts scattered about the Mackenzie River country is a great believer in the ultimate destiny of the great northland. "I am not at all sure," says Mr. Swigert, "and consequently I do not know how much it would cost to open the Athabasca for steamers from Grand Rapids down to Fort McMurray. But I do know that there is a wonderful rich country on the other side of the Whitewater on the Athabasca that will some day attract the attention of the world. At present its development is impossible and the transportation problem must be settled before any real progress can be made."

"The possibilities of the north are really not appreciated even by the men who travel it. There is copper and lead worth untold millions on Great Slave Lake. I myself am interested in sinking a shaft into a galena ledge on the south side of Slave Lake not far from Resolution. We went down 20 feet and the ore stayed in the full size of the shaft as the way down was so narrow that I could lead and a good value in silver. I had copper assays from Slave Lake ledges which went 11 to 23 per cent. copper—values simply immense compared to the 3 and 4 per cent ledges which have made so many millions on the Lake Superior country. I have seen some beautiful samples of mica from the same country, brought into the north. As far as I know the mica possibilities have never been prospected but I am satisfied of the existence of immensely valuable deposits. As for the coal resources, they are too well known to require any comment and the wonderful gas well at Chert Rapids, the tar and asphaltum springs and the many other indications and natural by products of petroleum have been sufficiently advertised. On the way down I visited the well at Fort McMurray where Messrs. Bennett, Wellbarn and other Winnipeggers have sunk a well 1000 feet in search of oil. They did not find oil yet but they have found something that may be immensely valuable. 165 feet of rock there is one of the best in the world. The drillers got to the end of their cable and had to suspend operations for the winter but they will go ahead next spring. This is not the only salt in the north. At Salt River, 20 miles below Fort Smith, the traders pull their scows along shore and shovel up a natural salt of the strongest kind. I am not a geologist to explain its presence; it may be a natural process of evaporation. However, the main point is not uncertain. The salt is there in large quantities. "Timbering in the north is going to be a great industry in the near future. There is beautiful pine on the Peace between Vermilion chutes and its confluence with the Slave River. There is more fine timber on the Athabasca from Fort McMurray down to the lake. As soon as there is any way to get this timber out you may be sure it will be worked."

Mr. Swigert reports a fairly prosperous fur year in the north and the prospects favorable for another good winter this year.

GOLD IN PENNSYLVANIA.

(Bulletin Special). Pittsburgh, Pa., Oct. 12.—All records for low temperature in October since that which was established in 1871 were broken today when the mercury dropped 28 degrees.

PERISHED FROM COLD.

(Bulletin Special). Cleveland, Ohio, Oct. 12.—The storm continued unabated today, heavy snow falling steadily. John Reese, eighty-five years of age, was found frozen to death in his home today. He lived alone.

Ask For A Ticket East On The Pioneer Limited Chicago, Milwaukee and St. Paul Railway. THE PIONEER LIMITED leaves Minneapolis at 8:00 p.m. and St. Paul at 8:35 p.m. Arrives Union Station, Chicago, 8:35 a.m. the next day. Four other fast trains to Chicago daily. Compartment and standard sleepers with "longer, wider and higher berths," dining car, observation-library car, chair car and coach. W. B. DIXON, 365 Robert St. North-west N. Passenger Agent.

Sanitaris A Health Protector Most Typhoid Fever cases are due to drinking impure water. SANITARIS guards the whole system against disease. It prevents Typhoid, because it is absolutely pure. It prevents Gout and Rheumatism, because it neutralizes uric acid. It prevents serious Kidney and Liver Trouble, because it cleans and heals and strengthens these organs. SANITARIS used regularly, is the surest and pleasantest way of keeping well. It is a delightful table water—clear as crystal—sparkling and buoyant. AT ALL DEALERS. J. B. MERCER, Agent Edmonton.

Ask for Pure Malt when buying Scotch Whisky. Pure Malt contains medicinal properties. It conduces to health and economy. Leading physicians recommend it. It is the best value money can buy. The price is the same as that of "blended" Whiskies. Strathmill and Spey Royal Pure Malt Scotch Whiskies are distilled from the finest malted barley, thoroughly matured and guaranteed by J. & A. Gilbey. Sole Proprietors of Strathmill and Glen Spey Distilleries, Scotland. Purveyors of Whisky to the Royal Household. FOR SALE BY J. B. MERCER, The Edmonton Wine and Spirit Co., And all Leading Hotels.

THERE ISN'T "SALADA" ARE THE PUREST, MOST HEALTHFUL AND MOST DELICIOUS OF ALL. GEYLON TEAS. 40c, 50c and 60c Per Lb. Look for this tag on the cloth of every Suit and Overcoat you buy. It guarantees wear and service because it goes only on cloth that is pure wool. ADVERTISE IN THE BULLETIN
