

WITH THE FARMERS

SHEEP IN ALBERTA. Writing in a booklet issued by the Alberta Sheep Breeders' Association, James McCaig, of Edmonton, gives some valuable information relating to the sheep industry in Alberta.

He points out that sheep husbandry is displaying rapid contraction on the range side and shows no compensating growth as a farm enterprise. Since 1910 there has been a reduction of one-third in the number of sheep in the total sheep stock of the province.

From Range to Feeding. Mr. McCaig is not enthusiastic over the wool side of the sheep industry in comparison with the range side. If, however, the sheep breeder turns his attention to the mutton side, he will not find the market for mutton satisfactory.

What Can Be Done. "The sheep business," says Mr. McCaig in conclusion, "is to be benefited as a whole not only by an improvement in farm and range practices which the profits of the industry will attract a greater number to engage in it, but it requires the leadership of stockmen on the farm who decide the quality of the sheep on account of their ordinary profit, have some pride in the production and possession of the animals of high type. This condition has almost been attained with respect to cattle and horse stock, but only to a limited extent in the case of sheep."

STOCK JUDGING SCHOOL. The stock judging school, which has been instituted in the province by the Department of Agriculture opens at Lloydminster on Wednesday, Jan. 26, and works weekly along the C.N.R. with stops at Vermilion on January 28 and 29, at Vegreville, February 1, 2 and 3, at Saskatoon on February 4, 5 and 6.

MONDAY'S GRAIN MARKETS. Winnipeg, January 25.—Wheat markets were very dull today again, but European prices were higher. Liverpool closed 1/4 higher and all continental markets were higher. The world's shipments for the week are a decrease on Saturday's figures, but visible supply shows a large decrease.

CHICAGO GRAIN MARKETS. Chicago, Ill., January 25.—The Paten brand of wheat known to the public as the May option, closed with a fractional gain in price tonight, and this too in the face of a string of bear items that were influential enough to force the more deferred futures to a slightly lower range.

LIVE STOCK EXPERTS. C. M. MacRae and Duncan Anderson of the Dominion Experimental Farm, Ottawa, arrived in Edmonton on Saturday evening from the southern part of the Province where they have been holding demonstrations in the judging of live stock in connection with the Farmers' Institute meetings. They stated to a Bulletin representative that six lectures on all were given extending over a period of two weeks and that there was an average attendance of 80 at each meeting.

SHEEP HUSBANDRY IN CANADA. A timely bulletin entitled "Sheep Husbandry in Canada," by Mr. J. B. Spencer, B.S.A., has been issued by the live stock branch at Ottawa. Mr. Spencer has taken up the task from practically all the standpoints that concern the sheep raiser in whatever province he may dwell. After describing the ideal mutton sheep he gives a brief, though comprehensive, history and description of eleven of the popular breeds. Next he covers in a practical way the establishing of a new commercial breeding flock. Mutton production as a highly specialized industry is dealt with by reviewing the methods in vogue in Great Britain.

New York, Jan. 25.—Bradstreet's today says: "Trade is expanding slowly but steadily, the wholesale and jobbing lines getting some good orders for immediate delivery and rather more confidence in placing orders for spring. Conservatism is, however, noted in many sections and some markets report a feeling of disappointment at the rate of progress made. The best reports come from the leading dry goods centers of the East, where the demand for cotton goods is improving and preparations for spring offerings still lighter.
