A "LOOK AHEAD."

No more interesting, instructive and tertaining contribution to the literature and thought of the age has been made than that given in another portion of the Adven-TISER to-day from the pen of Mr. Andrew Carnegio, the well-known Scottish-American

The task which Mr. Carnegie sets before him is to prove on the one hand that the English-speaking race should never have been divided, and on the other that its schism ought to be healed, can be healed, and in his opinion one day will be healed. It is an attractive subject, and Mr. Carnegie discusses it in a manner that will interest every reader. He points out that both Great Britain and the United States are now fully agreed that the colonists in resisting the attempt to tax them unjustly simply vindicated the right which they had acquired as British citizens. Indeed, Mr. Carnegie urges, all influences are now working towards a reunion of the separated parties, and a restoration of the citizenship which once was common to the two branches of the race. In support of his belief, Mr. Carnegie adduces the unity of the race. He maintains that the American remains three-fourths purely British, and that the blood other than Angle-Saxon and Ger. manic which has entered into the American has been absorbed without changing him in any important trait. We see, indeed, the same processes of amalgamation of the English, Scotch, Irish, German, Swedish, Finnish peoples at work on this continent as proceeded in the motherland in bygone ages. Then the fusion of the sturdy Northmen evolved race that has practically controlled the destinies of both old and new worlds. Is it too much to expect that a like unity will produce a good type of citizen in North America ? Rather is it not producing a strong, industrious, inventive, progressive people ?

The unity of the race is even now established in everything but political ideas, as Mr. Carnegie points out. We are one in that we speak a common language, have identity in literature, in religion and But the factor Mr. Carnegie deems most important in rendering political rennion possible, and in his judgment inevitable, is the telegraph, which brings the most widelyseparated centers of activity into instantaneous communication, enabling a central authority to feel the pulse of the remotest part of the nation and annihilat-

Mr. Carnegie holds that reunited Anglo-America "would be unassailable upon land by any power or combination of powers that it is possible to create, and as for the water, the combined fleets would sweep the seas. It would be the arbiter between nations and enforce the peaceful settlement of all quarrels." Reunion, too, would mean perfect freedom of trade, by land or by sea, in every part of the world controlled by the united race. It would bring prosperity such as has never been known in Canada or in the United States, Great Britain and the Australasian colonies.

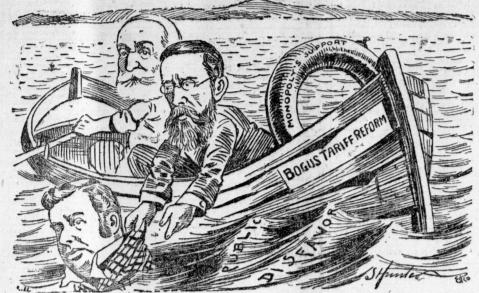

For these and other cogent reasons, Mr. proposal for reunion will meet with undoubted favor in Canada, where a race federation that would include the whole Carnegie is naturally sanguine that the English-speaking people could have no effective opposition. The United States would favor it with equal zest; Ireland would receive it with delight; Scotland, with her enlightened ideas of self-government, would see great advantage in it; and to Wales it would make little difference. An Englishman might feel ence. An Englishman might feel that the reunion involved the giving up of his separate nationality, but Mr. Carnegie assures his readers that England would always remain mother of the race, though she would not overshadow the other divisions of the reunited nation.

The apparent impediments to reunion are discussed, and shown to be manageable. Of these, the great colonial empire, apon which Britons dwell with pride, could easily be dealt with. Britain is educating the people of India to local government by its own people, and that vast territory as well as Australia would remain under the protection of the British-American Union.

Mr. Carnegie frankly admits that the monarchical form of government is a cause of disunion, but the political institutions of Great Britain are being rapidly assimilated to those Canada and the United States. Mr. Carnegie enjoys the personal acquaintance Garnegie enjoys the personal acquaintance of the Prince of Wales, and he believes that his Royal Highness would be the last man in the world to stand in the way of healing a separation which he constantly deplores. He suggests that the Queen inght be expected to give up her crown to be the peacemaker who brings reunion to liter race. If the Queen could express her views on the subject, with what interest foold they be perused! It is a disadvantage of her position, in this instance, that the control of the position, in this instance, that the control of the peacemaker who be peacemaker who be peacemaker who brings reunion to liter race. If the Queen could express her views on the subject, with what interest foold they be perused! It is a disadvantage of her position, in this instance, that the control of the peacemaker who be recommended in the world to stand in the world to self, causing fatal woulds. she cannot express any other views that those of her responsible Ministers.

Mr. Carnegie is not a politician. He has all his life, until a year or two ago, been busily engaged in industrial pursuits, in But he has been, and is, a close student of what is going on in the world around him. One result of his investigations is this proposed reunion of the different branches of the English-speaking race. Is it not a bold project, a noble aspiration? The German people were reunited by the necessities of self-preservation, arising from the rigors of war. How much more powerful would the lesson of our race unity be if effected, not because of war, but in order to promote the interests of the entire race, and to render war impossible !

Mr. Carnegie's concluding sentence exemplifies the strength of his convictions: "Let men say what they will, therefore, I say that as surely as the sun in the heavens once shone upon Britain and America united, so surely is it one morning to rise, shine upon, and greet again "The Re-United States," "The British-American Union."
