BATTLE BETWEEN ANTS

An Army of Reds Defeat a Force of Blacks-The Little Fellows Damage Brick Pavements by Burrowing.

Omaha, Neb., June 27.—A curious menace to brick street-paving has come to light in Council Bluffs, Iowa. Numerous ants began burrowing to the sand beneath the bricks and removed so much of it to another quar-ter that the city engineer was called in to repair damages. One street was made unfit for travel for several

While investigating what was going on, the officials witnessed a battle between an army of red and black ants. The later were entrenched in their home, when the former made a raid upon them, routing and driving them out. The reds swarmed across the street and moved in solid array some fifty feet down the avenue, there attacked the enemy, broke into their home, and carried off a large number of eggs. The battlel asted fully half

The Sugar Beet.

To the Editor of The Advertiser: Farmers throughout the western

peninsula are greatly discouraged by the ravages of that destructive pest, the Hessian fly; many acres of wheat being ruined by its encroachments, while the greater portion of the remainder is seriously damaged. No satisfactory remedy for the extermination of the fly has as yet been introduced. of the fly has as yet been introduced. In the meantime, as the progressive farmer is anxious to procure some more profitable crop, upon which dependence can be placed, I would suggest utilizing a portion of the acreage now devoted wheat to the cultivation of the sugar beet. I have made an exhaustive study of this new departure in Canadian agriculture, having consulted the best authorities available, and instituted inquiries among friends in Michigan engaged in the growing of sugar beets, and the unanimous expression of confidence in the enterprise exhibited by every person from whom I obtained in-formation; the splendid results obtained by them from their crops, and the increased acreage they intend to devote to the beets, encourage me in predict-

ing that immense possibilities await the Canadian farmer in this connection. The present appearance of the beets sown in this section is magnificent, indicating an abundant harvest. The industry, though but in its infancy in Michigan (three years established), has made phenomenal progress, and cultivators of the beet have realized handsome profits from their enterprise. The Canadian farmers cannot do better than give the projected refineries their co-operation and assistance by tracting for acreage, as it has been successfully demonstrated that our soil and climate are unsurpassed for the profitable reduction of the beets, and

than in any other with which the land The establishment of these industries would be of incalculable benefit to the community at large, employing a great many hands, and manufacturing their import immense quantities. Trusting officers.

on a broom stick.

Considered with reference to its recuperative effect, there is not so much good in the ordinary vacation as there is in a single bottle of Hood's Sarsaparilla. The latter costs \$1; the former—well, that depends; how much did yours cost last Hood's Sarsaparilla refreshes the tired

POLICEMEN'S TROUBLES Montreal, Que., June 27.-Ex-City Policeman Dieudonne Plouffe was sentenced to three years in penitentiary this morning for having robbed a sup posed drunken man of a gold watch some weeks ago. Plouffe was suspected of being a thief, and a plan was arranged to make sure of his

guilt Ottawa, Ont., June 28.-Detective Flanagan, who was reduced to the ranks, and who afterwards put in his resignation, at a meeting of the police commissioners withdrew his resignation, so that he now stands suspended. Mr. Dowlin, counsel for Flanagan, says that he intends placing in the hands of the commissioners 26 charges own sugar, of which articles we now against the chief of police and other

COMFORT FOR POOR SLEEPERS

The Mystery of Sleep--Insomnia a Warning of Overwork or Approaching Nervous Collapse Which Is Not To Be Lightly Disregarded.

Robbery of Sleep One of the Worst of Crimes-Dr. Chase's Nerve Food by Building Up Blood and Nerves Restores Restful Sleep.

of dreams; it is the relaxation of muscles, and the solace of the nerves; it is and vital energly to every nerve cell the hush of activities; it is a calming in the human body. of the pulse; it is a breathing much slower but much deeper; it is a temoblivion of all carking cares; it is a doctor recognized by all schools of medicine. Lack of sleep puts patients on the rack of terture or in the mad-house, or in the grave."

Insomnia is a disease of our country and of our age. Where there is one man or woman with strong, healthy nerves there are a dezen whose nervous systems are overwrought and un-strung. In vain they toss in beds of misery, longing for mature's great re-storer, restful sleep. In hours of temptation they resert to optates and narcotics, which produce temporary unconsciousness at an enormous ex-

pense to the human system. In all occupations and professions there are times when a special draft is made upon nervous energy. Moth-ers, too, deprived of sleep and worn-out by caring for their children and watching them through periods of sickness and disease, are left physical wrecks. Especially in the springtime

"Sleep is the vacation of the soul; it peculiarly suited to the needs of an ex-is the mind gone into the playground hausted nervous system. Through the medium of the blood and nervous sys-

While these elements of nature are combined in various proportions, it is now generally conceded by physicians that the prescriptions used by Dr. Chase with such marvelous success in his immense practice is the one which gives most general satisfaction. preparation is now known as Dr. Chase's Nerve Food, and has come to have an enormous sale in every part of this continent, where nervous disorders and sleeplessness are so preva-

Each and every sufferer from neryous and physical exhaustion, thin, watery, and impure blood, and the de-mon insomnia, can begin the use of Dr. Chase's Nerve Food with positive assurance that the regular use of this famous food cure will gradually and thoroughly build up and reconstruct the nerve cells and bodily tissues, and permanently cure sleeplessness and ir-

ritability. watching them through periods of siokness and disease, are left physical wrecks. Especially in the springtime do we all seem to require an unusual allowance of sleep to overcome the weakening and debilitating effects of winter and the trying changes of temperature.

Sicepleseness is a warning that the metveds force of the hody is being exhausted more rapidly than it is being treated, and points to ustimate physical bankruptcy. The nights do not repair the waste of the day. Some unusual affort must be made to every cell with new life, vigor and vitality. As a spring tonic and invigorator it is marvelous in its action, instilling into weak, worn, tired human bodies the strength, elasticity and buoyancy of perfect health; 50 cents a bex, 6 boxes for \$2.50, at all dealers, or sent, post-paid, on receipt of price, by Edmanson, Bates & Co., Teronto.

THE HEALTH **OFFICERS**

Sanitary Arrangements in the Schools Criticised.

hiore Attention to the Subject Recommended—Another Warning Against Kissing—Officers Elected.

The executive health officers of Ontario concluded their annual convention at Brantford Wednesday afternoon. The forenoon was largely occupied with the subject of the spread of diseases through schools, by reason and other breaches of sanitary laws. A resolution was passed favoring a more rigid inspection of schools, with a view to this end, a systematic education of pupils and teachers, one of the means to obtaining which would be a proposed medical bulletin. In the afternoon the association honored Dr. E. E. Kitchen, of St. George, who has done excellent work on the provincial board of health, by electing him president.

Dr. John Herald, of Kingston, read a paper on "Schools and Their Influence in Promoting or Retarding Tuberculosis." He criticised the school sys tem as making no provision for difline Connelly, of Ironwood, and her ferent treatment of pupils of different constitutions, or dispositions. teachers were not given sufficient discretionary power in assigning work to the pupils, and were forced by the foolish parents to send the weak child along beyond his strength. The schools must bear some of the responsibility for the spread of the bacilli. Dr. Herald spoke of the impure air and bad ventilation in the majority of schoolrooms. There were regulations to prevent this, but they were rarely carried out. Our schools were centers from which this disease had spread abroad. In almost every school there bacilli and the presence of more or less dust and dirt and the absence of sunlight, it was easy for them to spread.

"The system of intellectual hothouse forcing in vogue in many of our schools," Dr. Herald continued, "the impure air and the lack of ventilation found in many of our schools, the dust and want of sunlight so characteristic of many of our schools, the presence of children already suffering from tuberculosis in many of our schools, the presumable impregnation of the air in many of our schools, with the bacilli of tuberculosis, the very high death rate of our children from tuberculosis, contracted at or about the school age, these all point to schools as the probable source of that disease, which is yearly carrying off so many of our people. This proof is not positive, but it is so strongly pre-sumptive, that it becomes almost, if

not quite, positive." Dr. Herald concluded by urging the education of the public, the teachers and the trustees to the dangers they sharpens the dulled appetite, re-the lost courage.

c and the trustees the trustees the trustees the faced, the enforcement of the regula-tions of the educational department, and suggested the appointment of sanitary inspectors who were specially fitted for the work.

BAD WELL WATER. Dr. H. G. Roberts, of New Germany, gave a paper on "Inspection of Rural Schools and Rural Districts as Regards Dangers from Polluted Well Water." He said that in Waterloo township, where he lives, they had a regular system of inspection of the houses and wells. They had, further, a "well-cleaning day," a day set apart in each year, just as Arbor Day, when every resident was urged to clean out his wells. The result had been quite satisfactory, and typhoid fever had been notably lessened. He thought it

information on health topics of the scholars and the public generally. CONDEMNS KISSING. Dr. Riddell, of Bayham, considered the habit of ladies kissing one another, a very fruitful source of spreading dis-

might well be adopted throughout the

whole province. He also suggested that the provincial board of health

issue a bulletin, say quarterly, for the

On motion of Dr. Bray. of Chatham, seconded by Dr. McAlpin, of Petrolia, the following resolution was passed: "That in view of the facts set forth in the various papers, both of the direct dangers from children and teachers in-fected with tuberculosis being present in schools; further, from the presence of accumulations of infected dust and dirt in schools, and absence of sufficient good ventilation and sunlight, and, further, from the debilitating effects of over mental work: This association would urge that education of the people and trustees and health boards be systematically prosecuted by public health lectures and by conventions of trustees, inspectors and teachers; and that a public health journal be published monthly, dealing carefully and systematically with the prevention of, spread of and care of infectious and contagious diseases, and, further, that systematic inspection should be carried out by inspectors specially fitted for the work, either by government or county health officers duly appointed."

WANTS COUNTY INSPECTORS. Dr. L. H. Mitchell, of Delaware, presented a carefully prepared paper on health organization in rural districts, in which he strongly urged the appointment of county health officers, instead of leaving the work to township officers, who were generally inade-quately paid for their labor.

INSPECTION OF MILK. Dr. D. Dunton, of Paris, in a paper on "Inspection of Municipal Milk Supplies," contended strongly for regular inspection of cattle, which furnished the most general article of diet in use. Mr. D. Forsyth, M.A., Berlin, read a paper on "Medical Inspection of Schools and the Prevention of Spread of Contagious Diseases"; Prof. J. A. Amyot, of Toronto, on "Value of Exeminations of Throat Swabs as a Test of Freedom from Diphtheria"; Mr. W. Mahlon Davis, C. E., Berlin, on "Modern Systems of Sewage Disposal, while papers were also contributed by Dr. F. G. E. Pearson, Brantford, on "Typhoid Outbreaks in Brantford and Their Relation to Polluted Wells," and Mr. Angus Smith, C. E., Stratford, on "Septic Tank Method of Garbage Disposal in Stratford," and Mr. Thomas McFarlane, of Ottawa, on "Moss Puri-

fication of Closets." FOR CONSUMPTIVE SANITARIA. The report of the secretary-treasurer, Dr. Bryce, called attention to the work of fighting consumption now being prosecuted, and suggested that a

committee of the association be formed, consisting of one member from each county, who will endeavor, through local committees, to have bylaws for the establishment of country sanitaria submitted to the people. The general committees were instructed to name the members of the committee suggested by Dr. Bryce.

OFFICERS ELECTED. The election of officers for the year resulted in the following being unanimously chosen: President, Dr. E. E. Kitchen, St. George; vice-president, Mr. Thomas McFarlane, Ottawa; executive committee, Dr. F. G. E. Pearson Preparation Preparation of the present of the preparation o son, Brantford; Dr. Hoare, Walker ville; Dr. D. Dunton, Paris; Dr. John Herald, Kingston; Dr. W. J. Arnott,

Thinner Than a Rail

Thinner Than a Rail

Spending every day as much energy as you make and if the balance goes a little further, well, you get thinner. Not wise to go that way longer. Better use Ferrozone, you will digest more—a little gain the first week, but the gain keeps growing. Not quite so thin! Keep right on, only don't use Ferrozone too long or you will get too fat. Then your blood will be rich, your heart strong, you won't puff so much, you won't get tired quickly. Fat, blood, strength, you have them all with Ferrozone. Sold by W. T. Strong & Co.

MADAME A. RUPPERT

The World-Renowned

COMPLEXION SPECIALIST

Says:

The complexion is usually at its worst at this time of the year, and if it is neglected too long, the skin gets so bad that it causes much unhappiness. You can save yourself all this unnecessary trouble if you will use now one or two bottles of my FACE BLEACH, which draws out of the skin all impurities which disease and discolor it.

My FACE BLEACH is today used by thousands of ladies throughout the land, whose complexions it has made perfect. I will personally guarantee to every lady that there is no preparation that will improve the complexion as my FACE BLEACH improves it. If you are troubled and worried over a complexion filled with freckles, pimples, blackheads, moth patches, eczema, sallowness, all redness or roughness of the skin, and wrinkles that are not caused by facial expression, get my FACE BLEACH at once and get rid of them. I only wish I could meet every lady in London, whose complexion is not all that it ought to be, and have a good talk with her so that I might advise her how to secure a good clear complexion. I could not advise anything better, anything more beneficial than my FACE BLEACH. But as I cannot meet you all, I would suggest that you get my book, "How to Be Beautiful," which my agents, Cairncross & Lawrence, 216 Dundas Street, will give you FREE. My book is simply invaluable to every lady who desires a clear and perfect complexion.

MADAME A. RUPPERT.

We hope that Ame. Ruppert's patrons will be guided by what she suggests and get a full treatment of her FACE BLEACH this time, and give your face, and neck too, a thorough

clearing of all impurities of the skin. We will present to every lady caller FREE, Mme. Ruppert's book, "HOW TO BE BEAUTI-FUL." We have a full line of Mme. Ruppert's Toilet Preparations in our store, and we will be pleased to show and explain their merits to every lady interested.

CAIRNCROSS & LAWRENCE,

Sole Agents for Lendon, - 216 DUNDAS STREET, LORDON, ONT. ***************
