

NEW GOITRE REMEDY

Great interest attaches to reports of a remarkable method for treating goitre recently demonstrated at the W. T. B. Laboratory, 5032 Minty Block, Battle Creek, Mich. It is used by the patient herself in her own home and it is said that the largest and most hideous goitres begin to recede almost in a day. They gradually get smaller until in three or four weeks they are often gone entirely. The treatment is perfectly safe for anyone to use and many believe it will prove the long sought specific for all goitres. A little book issued by the laboratory explains the method fully and will be mailed free for the asking to anyone interested.—Advtr. W-227

He further appeals to Canadians to continue their donations until the present distress is ameliorated.

JUDGE FINDS TRADE MARK REGISTRATION INVALID

Justice Rose has dismissed the action for an injunction and damages brought by Frost Steel and Wire Company, Limited, against A. R. Lundy, also a fence manufacturer. Plaintiffs objected to defendant using a mark in advertisements showing a particular kind of tie attaching the upright to the horizontal wires, which they claimed was identical to the registered trade-mark used by plaintiff. This tie on wire fences is made by the Imbler machine, and his lordship finds defendant cannot be restrained from stating the process of making or the characteristic features they possess. The registration of the trade-mark is found to be invalid.
