Drought in Niagara District

ST. CATHARINES, Sept. 29.—No rain has fallen in the district for a month, and the situation for the farmers is growing critical. There is no pasture, and the farmers are feeding their cattle with food stored up for the winter use. All wells and small streams are dried up, and many people drive their cattle several miles in order to water them at the Welland canal. The peach growers are in a dilemma, as the hot months have ripened the fruit with a rush, and they cannot get pickers, and the fruit is likely to rot on the trees. The apple crop is poor.

In Status Quo.

OMAHA, Neb., Sept. 29.—With the additions to its working force by the return yesterday of a number of the strikers, the Omaha Council Bluffs Street Railway Co. was able to resume more nearly normal service today than at any previous time since the strike began. The cars were, generally, more liberally patronized, although the streets are still lined with men and women walking to their places of business. The failure of the attempt to arrange a compromise between the company and the strikers yesterday leaves the situation much the same as in the beginning.

Scarcity of Water.

WINNIPEG, Sept. 29.—Owing to the unusually fine weather prevailing this month, reports are coming in from the country of great scarcity of water, sloughs and wells are drying up in many places, while as a consequence the threshers are severely handicapped in some instances having to team nine or ten miles for water. In city gardens here flowers are still blooming, while the roots have been so far untouched by frost, only such tender stuff as cucumbers and marrows being affected by the light frost of last week.

Roman Catholic Dioceses

ROME, Sept. 29.—As a result of the meeting of the first plenary council of the Roman Catholic church in Canada, proposals have been made to the Vatican for the creation of new dioceses, especially in the western provinces, including one bishop who would reside at Regina. Subdivision of dioceses in the eastern provinces is also suggested. If redistribution took place, the diocese of Ottawa would probably be split up into two dioceses, the provincial border being taken as the ecclesiastical boundary. Such a division is most likely in consequence of the French-Canadians' claim for a diocese and a bishop of their own.

Mr. Jerome describes Justice Gaynor as a "political charlatan," and as "that most abhorrent product, a political judge, whose so-called personal liberty decisions has secured gain to law-breakers."

Montreal's Birth Rate

MONTREAL, Sept. 29.—According to Dr. Labarge, the medical health officer, Montreal, as far as its birth rate is concerned, is at the top of the list as compared with the leading cities of the world. The annual report of the board of health states that the birth rate for 1908 per 1000 inhabitants was 38.43, being an increase over the preceding year. The death rate was not quite so satisfactory, being 20.70. The birth rate of the French-Canadian section shows the very high figure of 44.04 per 1000.

He had drawn a pension for fifty-two years and is believed to have been the oldest soldier in Great Britain. He was the oldest man at the review of Crimean and Mutiny veterans by His Majesty at Sandringham in May, 1907, and claimed the King's special attention.

Los Angeles Patriotism

LOS ANGELES, Sept. 29.—Citizens of Los Angeles have purchased by private subscription the entire issue of $720,000 worth of school bonds, recently authorized at a special election. After the sale of the bonds had been delayed for several months because of a suit brought to test the validity of the election, the issue, which bears only 4 per cent. interest, was ignored by the bond buyers of the east and the financial institutions of this city. A striking feature of the campaign for the disposal of the bonds was a parade of several thousand school children, which ended at a mass meeting where prominent educators told of the needs of the schools.

LIBERALS BANQUET PUGSLEY AT ST. JOHN

Hon. Messrs. Pugsley and Murphy Tell What They Think of the Great West—Remarkable Progress

ST. JOHN, N. B., Sept. 29.—More than 200 people attended a banquet given by Liberals last night in honor of Hon. William Pugsley. Mayor Bullock presided, with Hon. Mr. Pugsley and Hon Mackenzie King at his right. Regrets were received from Sir Wilfrid Laurier, Sir Frederick Borden and others.

Responding to the toast of "The Governor-General," Hon. Charles Murphy paid a tribute to the guest of the evening. He said he was a big man, seeing the big future of Canada and supplying for the future in the public works of the country. Speaking of his recent visit to the west, Mr. Murphy said the grain crop meant $100,000,000 to the west. He spoke of lumbering, mining and ranching prosperity there and commended the government's immigration policy.

Hon. Mr. Pugsley was given a warm reception. He spoke in praises of the Liberal members from New Brunswick, naming each. Passing on to his recent tour of the west, he described the progress shown in the 12 years since his last visit. As to Vancouver, he saw no reason why it should not reach out across the Pacific and grasp a large share of the trade there. Coming back to New Brunswick, however, and notwithstanding the progress of the west, he was prouder of his native province than ever. He was more convinced than ever that eastern ports were to receive a greater impetus from western prosperity. Some of Alberta's wheat would be exported by the Pacific coast, but the east was not set up against the west, and the east would take its chance of its share of the business. Hitherto, not all the western produce for export went by Canadian ports, but this was being changed and he was convinced that before long it would be. He would not say all would come through St. John; Nova Scotia would share. All St. John wanted was what should come to it by means of its geographical advantages. He predicted that inside of five years there would be 500,000,000 bushels of wheat grown in the west and future years would see even this enlarged.

Hon. Mackenzie King, in his speech eulogized Dr. Pugsley.

PROGRESS OF WEST

TORONTO, Sept. 29.—"Thirty years ago today," remarked D. D. Mann, vice president of the C. N. R., to a reporter here, "I arrived in Winnipeg on a flat-boat. There was at that time not a mile of railroad in Canada from the Red river to the Pacific ocean, and the people of the Western plains were importing their flour from the United States. The entire population of Canada westward from Winnipeg to the Pacific was not more than 100,000. Today," he continued, smilingly, "there are one and a quarter million people in that territory, and one million bushels of wheat are being handled on the railroads whose total mileage is nearly 10,000 miles. It seems wonderful that such great progress should have been made in the short space of thirty years. Canada has without doubt grown faster than did the western states of the great American union during a like period.

"At that time, 1879," pursued the railway magnate, "I was working on a construction contract for the Canadian Pacific railway, which was being built by government aid out into the Far West. I started my railway career by taking contracts to build stretches of the line. In 1879 passengers to Winnipeg journeyed by boat from St. Vincent. The C. P. R. had been surveyed from Emerson to St. Boniface, across the river from what is now the thriving metropolis of the Canadian Middle West. Then, in 1896, or thirteen years ago, William Mackenzie and myself secured a short strip of line west of Winnipeg, and today we have 3,000 miles of steam road in the Western provinces alone. Yesterday our cars handled 412,000 bushels of wheat."

TAX ON FOREIGNERS

Proposition Laid Before Canadian Federation of Labor by Ottawa Delegate.

OTTAWA, Sept. 29.—The feature of the afternoon session of the Canadian Federation of Labor yesterday was the introduction of a resolution by Delegate Sam Kennedy, Ottawa, asking the convention to petition the Federal government with a view of having them place a tax on foreign laborers or employees who come over to Canada and do work that can be done by Canadian workmen and Canadian employees. This resolution, as well as one referring to the convention's attitude toward the American federation of Musicians and another tending toward the discussion of amalgamation with the P. W. A. and Canadian railway employees were referred to the committee on resolutions without discussion.

The president, vice-president and delegates were appointed a committee to confer with the fraternal delegates from the Canadian employees and the F. W. A. with a view to working out an amalgamation scheme.

F. A. Acland, deputy minister of labor, welcomed the visitors to the city on behalf of the minister and department of labor. Hon. Mr. King was out of the city. An invitation was extended to the delegates to visit the handsome new offices into which the department has just removed on O'Connor street.

SLAUGHTER OF INNOCENTS

MELBOURNE, Sept. 29.—In New South Wales the situation arising from a low birth rate is aggravated by the large proportion of deaths among infants. According to the Sydney coroner, Stephen Murphy, a grave feature of this problem is the enormous annual loss of life by criminal means. Within the past few months he has held inquests on the bodies of ten newly-born infants found dead in public places in his district. Six were clearly proved to be cases of murder. During the same period the bodies of nine stillborn or probably stillborn children were found. Mr. Murphy is convinced, not only that these nineteen bodies constitute a mere percentage of those unlawfully disposed of, but that expert baby farmers are plying their gruesome calling in Sydney. He suggests that in the populous centres of New South Wales institutions should be established wherein, "without question," mothers might receive the attention they require, and their children be enabled to obtain a proper hold on life. With such institutions as these, and a system of state adoption of the children, Mr. Murphy is confident that the operations of the baby-farmer would be considerably curtailed.
