FOR INDUSTRIAL PEACE

In an article in the September 10th issue of "The Best Way to Prevent Industrial Warfare," Dr. Charles W. Eliot, President Emeritus of Harvard University, pronounces the Industrial Disputes Investigation Act of Canada the best piece of legislation in the world for the prevention and settlement of disputes in the "important" class of industries, and advocates the adoption of similar measures in the United States.

This pronouncement by one of the foremost authorities in North America on social and economic problems is based upon a careful investigation of proceedings under the Act over a period of two years, in which Dr. Eliot made it simple, prompt and just and, therefore, effective.

During these two years the records show that the Dominion has known no interruption in the continuous operation of any of its great agencies of communication—steam railways, electric railways, telegraph and telephone lines, or other public utilities of that kind—and that the national industries and the public have not suffered from any inconvenience of more than temporary and local proportions.

Of fifty five applications received up to March 31 last for the establishment of Boards under the Act, there were but two cases in which strikes were not averted or ended.

The two exceptions referred to occurred in accordance with the terms of the Act which do not attempt to forbid the declaration of other strike or lockout after public investigation has been completed and its results made known. In both instances, moreover, the employees concerned ultimately accepted the recommendations made by the majority of the Board.

The fifty two applications for Boards received during the first two years of operation of the Act were distributed as follows: Disputes in mines and smelters, 36; disputes affecting transportation or means of communication, 10; disputes in the public utilities class 2.

The fact that Canadian workmen have been applicants for the creation of Boards in forty six cases is considered by Dr. Eliot as evidence that they have acquired confidence in the operation of the Act. Not in a single case did the employees ultimately reject the findings of the Board. The satisfaction of the employers with the Act is not so clearly determined because the number of applications for Boards on the part of employers has been relatively small. Doubtless, however, they must have taken satisfaction in the fact that interruption of the service to the public was prevented in the cases of fifty three disputes out of fifty five.

In his striking review of the subject Dr. Eliot has well caught the spirit of this legislation that the public has a right to full information about the causes of all industrial disputes which threaten to interfere with the supply of such necessities as food, water, power and communication, on which not only the convenience but the lives of the people depend, and that discussion, conciliation and the force of public opinion together constitute the most effective means at present available for the adjustment of proper relationship between employers and employees.

The Act relies solely on the ultimate reasonableness of the parties to a dispute when the facts on both sides are publicly stated and discussed and on a fairness and sound judgment of that long suffering and patient public which ultimately pays for the greater part of the cost of industrial warfare.

Canada has this great advantage over the United States in regard to industrial disputes, that the central government can constitutionally take cognizance of industrial disputes; whereas in the United States the power of intervention in such quarrels resides with the States. There is nothing, however, to prevent the individual States from doing so.

Diarrhoea,
Dysentery,
Colic and Cramps

Nearly every one is troubled with bowel complaint during the summer months. But, do they know what to do to cure it. Thousands do, many don't.

WE CAN TELL YOU!

DR. FOWLER'S

Extract of

Wild Strawberry

WILL DO IT!

It has been on the market 64 years, and is universally used in thousands of families.

There are many imitations of this sterling remedy, so do not be led into taking something "just as good" which some unscrupulous druggist tries to talk you into taking.

Dr. Fowler's is the original. There are none just as good. It cures Summer Complaint, Cholera Morbus, Cholera Infantum, Dysentery and all Bowel Complaints.

Price 35 cents. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Palpitation of the Heart.

One of the first danger signals that announce a serious ailment is the heart's irregular action or violent throbs. Often there is only a fluttering sensation, or an "all gone" feeling, which of itself may be a most violent beating, with flushings of the skin and visible pulsations in the arteries. The person may experience a smothering sensation, gasp for breath and feel as though about to die. In such cases the action of Milburn's Heart and Nerve Pills in quieting the heart, restoring its normal beat and imparting tone to the nerve centres, is beyond all question, marvellous. They give such prompt relief that to one need suffer.

Mrs. Arthur Mason, Hartbank, Ont., writes:—Just a few lines to tell you what Milburn's Heart and Nerve Pills have done for me. I have been troubled with weakness and palpitation of the heart, would have severe chest pains and could scarcely lie down at all. I tried many remedies but got none to answer my case like your pills did. I can recommend them highly to all with heart or nerve trouble.

Price, 50 cents per box, or 3 boxes for \$1.00, at all druggists, or mailed direct on receipt of price, by The T. Milburn Co., Limited, Toronto, Ont.

If these discoveries continue there will soon be a North Pole ship. The Northwest Mounted Police to take charge of the Pole.

The Canadian Government will, of course, send a detachment of the Northwest Mounted Police to take charge of the Pole.

The latest reports from the Arctic in the Northwest say that ninety per cent of the Northwest Mounted Police to take charge of the Pole.

There is in Birmingham, England, a pin factory which turns out 37,000,000 pins every day. No, we don't know where they go.

Everybody, brides and all, will be wearing something blue this year and it will be jewelry. Jewellery, we're told, is to be all the rage.

The English Tories are still worrying about the navy. They apparently know better what Australia and Canada favor than do those States themselves.

A hundred and twenty legislators, newspaper men and others, have left Toronto with the Hon. Frank Cochrane for a week's tour of Ontario's silver land.

The road to Hudson Bay is now demanded by the West. Canada is growing so rapidly that she can profit by her own experience and this highway with its great possibilities should be kept under some form of efficient supervision.

Recent reports of mergers in Canada have become very common. A trust wave appears to be sweeping over the country. Various mergers are being consummated. It is said that a tin can combine has been formed by the tin can manufacturers. What next will they undertake?

BATHURST

BATHURST, Sept. 13.—Mr. J. N. McDonald, who has been in the city several weeks with friends in Quebec, is again at home.

Mr. H. Bernier returned to his home in Quebec, for several weeks, after a visit to Mr. McDonald.

Miss Winifred Goodwin returns this week to Bathurst to resume her studies at Mount Allison.

Miss Margaret Kent, a student at Mount Allison, returns this week.

Mrs. John McKenna and the Misses McKenna are on a visit to relatives here, having returned to Montreal.

Mr. Alex. J. Morrison of Washington, was in Bathurst during the week visiting friends.

Miss Secord of the Maryland Military Co. has returned after her vacation to resume business here in the Johnson block.

Mr. Stewart Ellis returned to Amherst during the week.

Mr. E. J. Veniot returned during the week to Laval University, Quebec, after a visit to his home.

Miss Dora Gallant is visiting with friends in St. John.

Masters Cetas Elhaton and Harold White returned during the week to St. John's College, P. E. I.

Miss H. Meahan is attending the millinery openings in St. John.

Harry Sweeney and Richard Smith, after spending their vacation at home, have returned to St. Joseph's College, Memramcook.

Mr. J. P. McTomney has purchased a lot on Douglas St. and is making preparations to erect a store and dwelling thereon.

Miss Irene Doherty has returned from a visit to Saginaw.

Mr. Ivor Murray of the Bank of Montreal, made a visit to his home people in Shediac last week.

Miss B. McGinley has gone to St. John to make a visit to relatives.

There is more catarrh in this section of the country than all other diseases put together, and still the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires a constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by druggists 25c.

Take Hall's Family Pills for constipation.

ALL TRAVEL AT REMARKABLY LOW RATES

An Opportunity to Visit Montreal, Detroit, Chicago, St. Paul, Minneapolis and Other Western Cities at Less Than Single Fare

Announcement is made by the International Railway of a very low fare to Montreal and return—less than the ordinary single fare, and also to some of the great commercial centres in the United States, during dates named are September 16, 17 and 18, with a return limit to October 4th, which means nearly three weeks may be made away from home at a saving of the year particularly convenient for the business man at a time when travel is perhaps the most enjoyable.

The celebrations connected with the 100th anniversary of the birth of the late President Lincoln will be in full blast, and a most elaborate program of festivities has been arranged. Other points to which the low rates apply include Fort Huron, Detroit, Cleveland, Saginaw, Bay City, Grand Rapids, Chicago, St. Paul, Minneapolis. Taking the most westerly city as an example, the reduction in price, the regular return fare from Halifax to St. Paul would be \$71.45, while by this excursion it is only \$44.00, and to the other cities named the reduction is proportionate.

To St. Paul and Minneapolis it should be mentioned the excursionist has his choice of several routes from Chicago to the West, and the reduction is proportionate. As this year the International Ocean Limited is running later than customary, the train service from the Maritime Provinces to the West will be for by the connection with the Grand Trunk's International Limited at the Bonaventure Union Depot in Montreal, and through service is given to Detroit and Chicago. With these many advantages there is no question of a big travel, and it is advisable that early application be made for sleeping car accommodation.

SAWDUST YIELDS A CHEAP ALCOHOL MINUS FUEL OIL

Chicagoans Announce a Discovery That Bids Fair to Revolutionize Industry

CHICAGO, Sept. 8.—Drinkable alcohol from sawdust.

This is the latest triumph in chemistry, according to a statement made public by J. M. Ewen, Chicago harbor commissioner and widely known as an engineer. After five years of almost incessant experimenting a process for making an alcohol said to be as pure as that obtained from grain, has been patented at Washington.

Malcolm F. Ewen, brother of Mr. Ewen, and George H. Tomlinson, formerly one of the engineers for E. H. Corbin at Seattle, Wash., are the inventors of the process.

The Ewens and Mr. Tomlinson are of the belief that their process will revolutionize fuel and illuminating oils, and that it will save thousands of dollars in the cost of fuel.

Not only is the new alcohol obtained from sawdust, but it is obtained from any kind of lumber waste, from edgings, shavings and saw mill odds and ends. All this material is thrown into the machinery to undergo transformation into pure alcohol.
