#### QUESTIONS AND ANSWERS ON FORESTRY

By the Canadian Forestry Association

part of our oak, ash and elm from the United States. Hickory is also an imported article. These woods grew on our best agriculture lands and were the first to be destroyed.

Q. How much of Canada's lumber A. Not more than one-sirth. The United States is our greatest market for forest products.

Q. Is Scotland planning to afforest

her waste lands? A. Yes, and is making excellent progress. Scotland has an acreage of 19 million acres. The existing reserve of woodland is just 650,000 acres. During the next ten years ed with timber trees. The British Isles are enormous wood consumers and yet hold the smallest percentage nation except Portugal. A great programme of forestry is now under way.

#### Q. Is it true that Canada faces a imber famine?

A. Not true in the sense of a bread or clothing famine. There could be a timber famine with a general decay of our industries and decrease in population even though the casual observer could see plenty of trees about the country. Timber can only be profitably cut when in relatively dense stands. A few scattered trees dense stands. A few scattered trees do not make a stand and such trees would make enormously expensive lumber if cut. The present danger is that our forests are growing steadily thinner, the burnt areas are rapidly extending, and valuable species are disappearing. Canada needs con structive forest policies.

Q. How many forest fires, large and small, do we have in Canada in I an average year?

than 14,000 forest fires broke out in

Q. What causes our forest fires; is there any means of preventing

A. Ninety forest fires in every hundred are started by settlers, railroads, campers, smokers, and other ning. These men require the timber and one sister, Mrs. Albert Mullen, of human elements, very few by lightareas to give them occupation or recreation, yet their personal carelessness is killing one of Canada's son, H. M. Mullen, Saturday aftermightiest assets.
