

Beautiful Ferns. 14 colored life-size plates of American Ferns. Text by Prof. D. C. Eaton, of Yale College, 4to gilt. Uniform with above \$6.00.

Wild Flowers and where they Grow. By Miss Harris, containing wood cuts of familiar wild flowers 4to \$3.00

The Naturalist's Assistant. By Prof. J. S. Kingsley. \$1.50.

Adventures in the Wilderness, or Camp Life in the Adirondacks. By W. H. H. Murray, \$1.25.

The Problem of Human Life Here and Hereafter. By Dr. A. Wilford Hall, Svo. 524 pp. \$2.00.

Steele's Fourteen Weeks Series, includes Physiology, Chemistry, Physics, Astronomy, Geology, Zoology and Botany. \$1.20 each.

Any book in the above list will be sent postpaid. Cash must accompany order. Address ACADIA SCIENTIST, Wolfville, N. S.

BOOKS ETC. RECEIVED.

LECTURE NOTES ON GEOLOGY. J. W. Dawson, L. L. D., F. R. S., Dawson Brothers, Montreal. Price 75 cents.

To mention its author's name is to give this little book the highest recommendation. No one knows better than this veteran in the scientific labor how to teach the subject in a scientific manner, or is better able to anticipate the needs of students. This work is designed especially for Canadian students and embraces an epitome of our present knowledge of Canadian geology which to them is indispensable.

THE KANSAS CITY REVIEW is the popular science monthly of the West, and seems to indicate to a large degree the spirit of enterprise that characterises our western friends. We are always sure of finding its columns filled with able articles of scientific interest. In the November number we notice the following original papers: "The Coming Transit of Venus" Prof. H. S. S. Smith. "The Remoteness of the Final Catastrophe" J. D. Parker, U. S. A. "Some of the Wastes of Nature," Rev. L. J. Timpila. "The Origin of Matter and the Indestructibility of Mind," Wm. Stevens. This No. contains in addition to the above, many interesting articles by other able writers. Edited by Theo. S. Chase, Kansas City, Mo. \$2.50 per annum; single nos. 25 cents.

The November No. of WILFORD'S Microcosm is at hand. This a monthly magazine making on behalf of religion, most uncompromising war upon "science falsely so called," or whatever seems to the Editor to be such. Among the numerous interesting articles with which the columns are filled, those from the quill of the Editor are conspicuous. These are so suggestive, forcible, and pleasingly original that one can almost overlook the egotism with which the author answers the arguments of those who presume to differ with him in opinion. Having in his book entitled "The Problem of Life" overturned the generally accepted theory of sound, he now makes bold to attack even Newton's great law of gravitation, which subject is being discussed in the *Microcosm*. Among the contributors to this magazine are a number of clergymen and college professors, many of them of considerable literary note. 32 pages, monthly, price \$1.00 a year. Hall & Co. New York.

We are prepared to receive subscriptions to the *Microcosm*, and will send the *Acadian Scientist* for one year free to every one ordering the magazine through us.

GEOLOGICAL SKETCHES

By ARCHIBALD GEIKIE, Price 15 cents. This book forms No. 38 of the Humboldt Library of Popular Science Literature, and is one of the most instructive volumes in that valuable series. Its author is Director-General of the Government Survey of Great Britain, and the charming essays here published contain the results of his vacation rambles in both hemispheres, from the Rook Mountains to the Rhine, wherever any field of special interest presents itself to the geologist. The work is a practical demonstration of how scientific knowledge, when, mingled with literary tact, can invest the dry facts of natural science with the highest degree of interest for the general reader.

We will send this popular and standard work postpaid on receipt of price.

CORRESPONDENCE.

This column is for the use of members of the A. S. C.

We respectfully solicit your subscription and ask your aid in extending the circulation of our little paper, and also in making the *Acadian Science Club* a success. After reading this No. please hand it to some friend who is interested in science or who would be likely to unite with the Club.

Remittances may be made in stamps if convenient, the 25 cents in silver coin can be sent in a letter from any part of Canada and would be more convenient for us.

Address the *Acadian Scientist*, WOLFVILLE, N. S.

THE COMET.

T. BERRY SMITH.

O wanderer, from where dost thou come to my sight,
And whither art going so radiantly robed?
Hast been to the uttermost limits of night,
And far into Nature's deep mysteries probed?
No answer! No speech! O mysterious thing,
That burneth thy torch in the heavenly spangl
Far from me my boasting of wisdom I fling,
And bowing I bury my face in my hands.

Kansas City Review.

EXCHANGE DEPARTMENT.

Every subscriber has the privilege of inserting in this department one notice, not exceeding five lines, each year. Beyond that, and for non-subscribers, the charge is five cents per line. Members of the A. S. C., may also advertise their text-books for sale in this column free of expense.

Dana, Manual of Geology.

" " Mineralogy.

Loomis, Elements of Geology.

Turner's Chemistry.

Jules Verne, Journey to centre of the Earth.

Jules Verne, Adventures in the Land of the Bohemoth.

To exchange for a small printing press with accompaniments.

Address A. B., Office *Acadian Scientist*.

PATENTS.

MUNN & CO.,
NEW YORK.

Established 1846.

WE continue to act as solicitors for Patents, Caveats, Trade-Marks, Copyrights, etc. for the United States, and to obtain patents in Canada, England, France, Germany, and all other countries. THIRTY-SIX YEARS' PRACTICE. No charge for examination of models or drawings. Advice by mail free.

Patents obtained through us are noticed in the *SCIENTIFIC AMERICAN*, which has the largest circulation, and is the most influential newspaper of its kind published in the world. The advantages of such a notice every patentee understands.

This large and splendidly illustrated newspaper is published WEEKLY at \$3.20 a year, and is admitted to be the best paper devoted to Science, Mechanics, Inventions, Engineering Works and other departments of Industrial Progress, published in any country. Single copies by mail, 10 cents. Sold by all newsdealers.
