The "Safety" Door and Transom Lock and Ventilator Combined.

This is an invention that takes the place of the Bolt and Chain for Doors, and supersedes and is safer than any device ever invented for a Transom Lift, as it is impossible for anyone to effect an entrance from the outside in the case of either door or transom. It permits a door to be opened a few inches, thus enabling the person inside to see who is outside before admitting them. The person inside has full control of the door, either to open or lock it, as they may see fit. There is no swinging chain to deface the door or jam. It is positive in its action, neat in appearance, and easily attached to the door or transom. It is the only fastener ever invented that will hold a door both open and shut. It must be seen to be appreciated. It is made of the best malleable iron, and is strong, durable, reliable and cheap. It is finished both in Japan and Nickel.

Retail Price of Japanned, 30c.

Retail Price of Nickeled, 50c.

Handsome Discounts to the trade.

For sale at all Hardware and House Furnishing Stores.

The St. Lawrence Steel and Wire Co., Gananoque, Ont. Sole Manufacturers for Canada.

Galvanized Steel Buckets.

—IMPROVED PATTERN.—

Something entirely new, and superior to the old style buckets, made in three sizes. They are superior to the ordinary flaring English bucket, being of greater capacity. They are stronger in shape, consequently more durable. They will not slop over, nor tip over, owing to the wide bottom. They nest very close and firm, which protects them in shipping. The rim is in one piece with the body, consequently cannot get knocked off. They are galvanized, and not lead coated.

FOR SALE BY ALL WHOLESALE HARDWARE AND TINWARE HOUSES.
