FASHION DECREES COLORED SPATS

Black Foot Coverings Are Relieved by Attractive Cloth or Kid.

WHITE LEATHER SMART

For Young Maids, Also Dark Five Hundred Dollars for Pa-Colors Favored This Season.

mong the novelties in footgear prorided for present and winter wear are new high spats, in white and fashion-able colors extending several inches above the high topped boots. These are made from an excellent quality of kid-velvet or waterproof silks. They fasten up the outer side with fancy round, or novelty shaped buttons in black or matching shades.

Altho at the first of the season fashion favored all black footwear. It is now authoritatively stated that plenty of "light tops" will be exploited by the

most exclusive makers. Already the new lasts are showing combinations of patent or dull kid with the favored grays, greens, purples, browns and wine colors so indisputably popular this season. In many cases if black foot-covering is adopted in the gypsy styles the high spat in white, or a color to

match the costume is worn.

Attractive to Youth.

For the youthful devotee, the white spat is particularly attractive. Worn with a pretty navy or black costume and white furs, the effect is unusually chic. White gloves in washable chamois are also very modish, and if gray or are also very modish and if gray or quietly colored spats are chosen the gloves are often worn.

BIRDS OF LABRADOR **VIVIDLY DESCRIBED**

nteresting Talk by Prof. A. C. Coleman at the Canadian Institute.

Prof. A. C. Coleman spoke on the subject of "Birds of Labrador" at the meeting of the Canadian Society for the Protection of Birds in the Royal Canadian Institute vesterday afternoon. The description of the life. habits and eccentricities of these feanered creatures of the far north proved most interesting and instructive, and the members present were so pleased with Dr. Coleman's talk that he was persuaded to tell also o the mammals inhabiting Labrador.

Prof. Coleman is well acquainted with the various centres along the

ment, as studied in the vicinity of Nain, Hebwell as a ron, Okak, Kamaktorvik and Hopevastimprovement in general robins and types of sparrows seen In speaking of the water birds pe-culiar to the Okak region the speaker stated that fowl was not reared there

Pigeons' eggs are the substitutes, as the dogs would destroy any birds that they could attack. In Hebron and Kamaktorvik were to be found eider ducks, ravens, sandpipers and the ioon. At Hopedale, situated further south, the chicadee, ptarmigan, gulls, divers and several other species of water birds, which are edible and palatable to the inhabitants any way, are abundant; also in the southern regions are to be found woodpeckers, hawks and other birds more intimately known further south on the North

American continent.
