There should be no difference of opinion about any of the other bylaws. They all make for the prosperity of the city and the increased value of real property in Toronto. The freeholders are getting the chance to improve their own property at the expense of the city generally in voting for them. The waterworks bylaw will be charged on the consumers. SIX NEW MEN. Many people are rather disgusted with the old city councils of the past ten years and would like to see enough new blood infused into the aldermanic stock to raise the standard The hope is in new men. One new man from each ward would be a sensible addition to the forces of organization and progress. We have been asked to pick out one man in each ward about whom there could be no doubt or dispute of his value to the city government. To do so without regard to politics or pull, but simply on the merits of the cases, is not an easy job, but we submit the following list as worth plumping for by those who are not so much concerned about getting old members back as getting a new deal altogether. At the same time we believe that in every case it will be found that these men will be found on the ballots of those who vote for three aldermen:

First ward—Walton. Second ward—Ball. Second ward—Ball.
Third ward—Burgess.
Fourth ward—McLeod. Fifth ward—Meredith. Sixth ward—Maybee.
