EXTRACTS FROM SOME OF THE EARLIER PRESS NOTICES :

The Mail, Toronto.—Mr. Lindsey's book will be read with interest, inasmuch as it treats with remarkable skill the various questions which demand consideration at his hands. Mr. Lindsey has the historic faculty strong. When writing a book such as "Rome in Canada" he is moving in his natural groove.

The Literary World, Boston.—The reader is taken from stage to stage of this Romish conspiracy, and the whole plot is laid bare. The circulation of such a work in Canada cannot fail to be productive of good.

From the *Spectator, London, Eng.*—This volume deserves the attention of all who are studying the problem of the Free Church in the Free State. It certainly makes out a strong case.

North American Review.—Mr. Lindsey's book is replete with historical information leading up to the present condition of things, and with facts supporting his conclusion. He makes it quite clear that on American soil and under the dominion of a Protestant power, the highest pretensions of the Church of Rome are more confidently asserted and more nearly realized than in any European country when the Government is avowedly Catholic.

Evangelical Churchman.—It is just the book we need in Canada at the present juncture of our history.

Boston, U. S., Traveller.—The author is Mr. Charles Lindsey, of Toronto, a gentleman long connected with Canadian journalism, and a representative of advanced political thought, who has recently devoted much attention to a subject which the active politicians and party journalists on all sides have studiously ignored.
