## The Mill Situation.

J. A. Lively, who was delegated by the board of trade to endeavor to bring about a settlement of the mill strike, on Saturday presented a copy of the resolution adopted by the men, offering to go back to work for an increase of 15 cents and unconditional recognition of the I. O. O. F. to J. Fraser Gregory, as chairman of the mill owners. When asked after the meeting if any decision had been arrived at, Mr. Lively replied that the mill owners declined to alter their stand in the matter and refused to recognize the International Longshoremen's Association. They declared, he said, that they were gradually filling the vacancies in their crews, and it would be only a short time before the mills would be operating full blast.

What It Means.

According to Worcester's dictionary, satisfaction means "the state of being pleased, contentment, comfort." We know of no way to reach this enviable state quicker or more completely than by sitting in front of an open fire of our Broad Cove Coal, or good dry hard wood, granting, of course, that you have laid in a supply of equally good hard coal for the long winter ahead. The Consumers' Company can supply you every need in this respect, and it is their aim to make each load of coal a load of satisfaction as well. ## Try This For Relief and Cure

Only Thing Good Enough To Stand a 60-Day Test

Here is something you can try sixty days—just as a test—without trying to risk a cent—

Something which in the last twenty-four years has saved thousands of ruptured people from having to undergo operation.

Something so strengthening to the ruptured parts that you can work right along without the slightest danger—

Something absolutely guaranteed to keep rupture from coming out—if it doesn't it won't cost you a single penny.

You Don't Have to Risk A Penny

We don't ask you to pay out a penny on the strength of any mere promise or claim.

We will make you a guaranteed rupture holder especially for your trial—make it so your money—and let you try it sixty days.

Let you give it a thorough test without asking you to risk a cent.

If it doesn't keep your rupture from coming out or bothering you in any way—if it doesn't prove every claim we make—then you can send it back and it won't cost you a cent.

See What It Does

This guaranteed rupture holder—the famous Clute Truss—made on an absolutely new principle. It is far more effective than any other truss—unlike all others—it is self-adjusting, self-regulating.

The support it gives automatically increases when there is any sudden movement or strain as in walking—so no strain can force your rupture out.

And, in addition, the Clute Truss provides the only way ever discovered for overcoming the weakness which is the real cause of rupture.

Just how it does that—entirely automatically—in all explained in our free book.

306,000 People Have Tested It

The Clute Truss has such a remarkably strengthening and beneficial effect that it has cured some of the worst cases on record—

Among them men and women 50 to 70 years old, who had been ruptured from 20 to 50 years.

Cured many of them after everything else, in outline operation, had failed to do any good.

No Belt—No Leg-Straps—No Springs

The Clute Truss does away entirely with belts, leg-straps and springs. People who have tried it say it is as comfortable as their clothing. It is water-proof—will hold in the bath. Also perspiration-proof and easily kept clean.

Get World's Greatest Rupture Book

So that you can judge for yourself, we want to send you a free book we have written—a copyrighted book of advice. People who have read it, including physicians—say it is the best book ever written on rupture.

It gives up all we have learned about ruptures in thirty years of experience. It details every remedy tried to all the latest known facts. It explains the danger of operation. Shows why wearing straps or springs would be worse. It tells about the Clute Truss and how to get it. It explains the "appliance" method. It tells you on guard against throwing money away.

It shows why 60-day trial is the only safe way to buy anything for rupture, and how the Clute Truss is the only thing you can get on such a long trial, because the only thing good enough to stand such a thorough test.

It tells all about the Clute Truss—how it works, how it is made, how you can try it 60 days, and how to keep it.

4,000 other voluntary endorsements sent with the book.

## The Gurney-Oxford Attracts Madam To The Kitchen

THE GURNEY-OXFORD has a large following of fashionable cooks who dip into the culinary art simply for the pleasure they derive from trying dainty recipes previously not attempted. They are all most enthusiastic supporters of the Gurney-Oxford because it contains many exclusive devices that make a perfect cooking equipment.

Its oven is evenly heated in every corner to insure deliciously dainty cakes, golden brown biscuits, and light flaky pastry. A special Divided Flue carries the heat to every hole on the range. The top is perfectly smooth and clean, requiring no black lead polish. But most important is the Economizer. It is a small lever that moves around a series of six notches giving the exact degree of heat required for any particular dish. The heat of the range can be shut off and the kitchen kept cool between meals by turning the lever to a certain number.

The fire is held at a low ebb on a special Reversible Grate until a baking oven is required. Then the necessary heat can be obtained quickly by simply turning the Economizer lever to another notch.

Such control as this enables many smart women to invent some very tempting dishes which they set triumphantly before their friends. It will pay you to investigate the Gurney-Oxford.
