N. B. WHEAT AND BUCKWHEAT

FLOUR. Turkeys, bronze, hen (3 exhibits)—

The guests at the Clifton house enjoyed the rare treat on Sunday evenist; W. M. Thurrott, Maugerville, N. ing of biscuits made from home manufactured flour. The wheat was grown in this province, and the flour was made at the Lockhart mills, Jacksonville, Carleton Co. The biscuits were the product of flour taken from sam ples on exhibition in Agricultural hall by Mr. Lockhart, who is enthusiastic over his method of manufacture. The Olifton is likewise serving its patrons with delicious buckwheat cakes made from flour milled by Mr. Lockhart.

A FINE HORSE. P W Nument of St Martins N R has on exhibition a handsome carriage stallion, "Chas. N.," sired by "Sir Chas," dam by "Dutchman," grandson an artillery mare that saw service here some fifty years ago. "Chas. is a splendidly built horse, that has taken first prizes wherever he has been shown. Although he has never been trained, he has shown quite a turn of speed. Some of his get are very speedy.

NOTES W. S. McKle of Charlottetown, owner of the celebrated trotting staillon Provider, 2.201-4, did the exhibition

vesterday Hon, J. P. Burchill of Nelson, Miramichi, paid a visit vesterday to the ex-Twenty-eight cars of horses and live stock will go over from here to the

Hallfax exhibition. John H. Reid. Fredericton's veteranhorseman, nobly upheld that icity's reputation at the present show. The absence of all tent shows and fakirs, who in past years drew a rather undesirable crowd outside of the exhibition grounds, is favorably

mmented on by country visitors. There are 16: exhibits of potatoes in One of the performing baboons died last week. It was a valuable animal, and cost Miss Hatheway \$300. In the Royal Arcanum's tastily de-

corated booth in the gallery of the annex, there is a handsome oil painting by A. H. McNally of this city. The picture is much and favorably ented on and reflects a great deal of credit upon the young artist. Commodore Stewart of the Miramichi Yacha club is in the city. The Shetland pony "Nelson," exhibited by Richard Jackson, is a clever, well trained animal, and weighs only about 265 lbs. It is here on exhibition,

and is not for sale. The paid admissions came up with a rush Tuesday, and when the doers closed last night the turnstiles recorded a total for the day of 12,288, the highest figures reached in recent years, and 5,607 in excess of the returns for

the corresponding day of the exhibi-This brings the paid patrons er up to 39,512, or within 1,474 of the total attendance at last year's exhibi-tion. With fine 'veather there is no reason why the grand total attendance should not prove a record breaker. The programme of outdoor amuse-ments and sports, for which no charge is made in addition to the 25 cent en-trance fee to (the exhibition, is the best and most comprehensive over of-

with telling force to all classes in the its) to date and for 1897 is as fol 2,701 4,356 2,838 5,041 6,881

There was a genuine throng at the

29.512 32.174

volume surpassed all expectations. Early in the morning the streets up town were alive with visitors who had come in the night before, while every train that arrived at the Union depot throughout the morning was filled with excursionists, who had taken advantage of the exceedingly low fares offered by the Intercolonial and other railways. Soon after the gates opened at 9 a. m. the crowd began make its way to the grounds in steadily increasing volume. The grand rush began about one o'clock, when it became necessary to put all the turnstiles in operation and to increase the staff of ticket sellers. For fully two hours a steady living stream poured through the gates, while it well on into the afternoon ere ticket takers were given a rest. fast as the crowd arrived it passed through the buildings into the parade ground, which was the theatre of the afternoon attractions, and by the time Prof. Seabury mounted the 80 foot pole for his thrilling plunge, nearly every seat in the grand stand was occupied, and the ground roped off for the base ball match was encircled by an immense gathering. The trapeze gymnastic exhibition of the Watson Sisters was applauded to the echo, and lety from the list. The dairy in acthe high diver was greeted with a storm of plaudits, but novel and startling as were these two events, the heart of the throng was most deeply the day. About forty or fifty lbs. of touched by the base ball match be tween a picked Boston nine and the in the butter exhibit is full, and the St. John Roses. A cold northerly wind swept across the field, making butter itself is of highly commendable overcoats and wraps necessary to comfort, but the crowd stood at its post until the last man was retired. Amusement hall had its quota of afternoon admirers, while there remained a considerable proportion of the visitors who took the opportunity, when the mass of their fellows was watching the sports and vaudeville per-Boar, over 1 and under 2 years (3 formance, to inspect the exhibits in the main buildings, the drill shed, the poultry house, machinery and agricultural halls and the stock yards. It was an orderly crowd and a good natured one as well, bent on enjoyment and obtaining full worth for the price

> The rush began again soon after six o'clock and continued for a couple of hours, so that during the evening, buildings and grounds were crowded as rarely before in the history of exhibitions. The rallying point for the great mass was in the vicinity of the grand stand, the programme of outtill 8.30. The grand stand was well filled, but the crowd outside of the force, flocked up close around the performance was going on. Seabury's high dive and the Watson Siswork were in consequence delayed patient one and did not apparently mind the delay. For the first night since the exhibition opened the wind E. Fisher of Chatham is the banne was strong enough to carry off the smoke of the fireworks and give an uninterrupted view of the display, which was a generous and highly creditable one. All the set pieces were received with applause, while the closing effect, the bombardment of Manila and the destruction of the Spanish fleet, was greeted with every demonprevious efforts in this city. When of the two provinces. the fireworks were over, as much of the crowd as could get in packed arrangement and extent of the exhibit, Amuscment hall, where a first class its superior quality being especially vaudeville performance was given, commented upon. including, of course, the comical antics of the trick donkey Blondin There are lots of people, residents of the city, who visit the exhibition nightly for the sole purpose of enjoying a couple of hours in Amusement The band concerts, afternoon and evening, at the stand in the anne were patronized by large throngs, who delighted with the excellent music furnished by the 62nd and Artillery bands. The management should, however, see that the bands are on hand at the advertised hour, as the half-hour's delay that night was not fair to those people who had to leave early to catch trains. THE GAME FUSH EXHIBIT.

The game fish exhibit at the anner entrance is a never ending source of attraction to all classes of visitors and D. G. Smith is kept busy answer ing questions concerning the habits of the salmon and trout, and the provincial waters in which they most do con gregate. The arrangement for showing the fish is the best ever attempte here, because it shows them under perfectly natural conditions. Each glass tank is a miniature reproduction of a river, in that it contains dead water, moving water equivalent to a river current, and rapids or waterfall, the latter effect being produced by forcing a stream from a small faucet overhead into the water of the tank. Here the fish can be seen, some lying motionle in the dead water, others movi slowly in the current, and other slowly in the current, and others again jumping around the rapids. Mr. Smith, who is the inventor and designer of these tanks, has made for years a close study of our game fish, and so accurate have been his observations that he is able to tell by the respiration of a fish whether it is being ke in confinement under proper condition or not. When first placed in the tank in the exhibition the fish showed every sign of excitement and alarm. that soon wore away, and they now perfectly at home. So fa Smith has not lost a single fish a fact that attests to the perfect man-ner in which he has fitted up their temporary abodes. Visitors can see fered by the management, and appals as well as they can at high noon.

-------------- AGRICUIT/NURAL HALL

Never before was the Agriculture hall such a centre of attraction as it is now. Every day the hall is filled with admiring spectators, many now coming several times where formerly one visit proved to be more than sufficient. There is no doubt that a great deal of the credit for this change in tendent S. L. Peters, who has been unremitting in his attention and painsaking in the performance of the nunerous duties which fall to his lot. year is larger than ever, but the dropping of white cheese from the prize list has made a noticeable gap in the number on exhibition. Every one. nowever, approves of the course of the association in dropping this vartion attracts a great deal of attention The work of separating takes place in the morning and churning later in

quality. The display of wheat is large, but ook first, Albert Co. coming in secwhole is 250 per cent. better than the best previous display. The collection of grain in the straw has increased 300 per cent, over previous years.

outter are made daily. Every class

The potato show is equal in quantity to anything ever held by the association, and in quality it is easily surerior, being exceptionally smooth Something over fifty varieties are shown. A larger number than usual participated in the competition in assortments, which was exceedingly keen, requiring a great deal of time before the judge could arrive at a final decision. The display of field roots and garden produce comes almost exclusively from New Brunswick. In turnips, carrots and mangel wurtzels the exhibit is up to the highest standard ever set by New Brunswick produce, and experienced exhibitors and exhibition goers know that is saying

a great deal. The absence of the large exhibits usually made by Nova Scotia fruit growers has been largely supplemented by displays made by the counties of enclosure was so great that it swept the province, in which Queens, with resentative vigorous efforts of a strong police took first. Albert Co. coming in second. In the plum, peach and grape exhibit Nova Scotia of course takes the banner. Sunbury Co. takes the ters' electrically illuminated trapeze leading place in the display of garden work were in consequence delayed vegetables, her success being largely for some time, but the crowd was a due to the fine exhibits of W. M. Thurrott of Maugarville. Northumberland, however, is a very close second. G.

man of the county. The honors in the single exhibits of classes go largely to St. John and Sunbury, while Kings and Queens do not come very far behind. The other counties are practically nowhere. The honors in the tomato exhibit are divided pretty evenly between New stration of delight. In this piece Worden and Byron Chesley are re-Messrs. Hand have surpassed all their spectively the leading representatives The visitors are delighted with the

> commented upon. POULTRY ASSOCIATION. The annual meeting of the New Brunswick Poultry Association was held last night in Agricultural hall. There was a fairly representative attendance, President John Berryman,

M. D., occupying the chair.

The report of the treasurer was called for, but that gentleman ex-plained that as no funds had been offected and none paid out, no detailed statement would be necessary. The election of officers resulted as follows: President, J. Berryman, M.D., city; 1st vice-president, Dr. W. S. rrisen, city; 2nd vice-president, Seth Jones, Sussex; secretary, J. G. Burke, city; treasurer, J. B. Magee,

Or. Berryman, in accepting the ce, thanked the members most relially for the confidence reposed in him, and promised that as in the past he would do his best to interest others in the work of he association. He did not believe that much progress ad been made, but the material was present awaiting development. The doctor then outlined a rogramme for the next year's work, which he hoped would prove beneficial.

It was moved by R. D. Damery, seconded by Dr. Morrison, that be-side four directors from the city, one be elected from each county in the province. The resolution was unanimously adopted, and the election re-sulted as follows:

ctors for the city-R. P. Hamm. R. D. Damery, C. F. Porter and W. A. Charlotte-Harry Spence, St. Ste-
