

**H**ARMONY of line, beauty of design and supreme motor-ing comfort in all weathers are features that make the Artcraft Top the most handsome, practical and comfortable upper body creation yet devised.

Besides being unusually well adapted for winter driving, the Artcraft Top is ideally suited to the warmer months when the car is opened up as much as possible.

For summer and early fall driving, the Artcraft Top can be completely opened up, side panels removed, giving an effect of open-car smartness and comfort, with its lighter weight and lower wind resistance. Handsome, snug-fitting show-er curtains afford perfect shelter from sudden summer rain-storms.

In winter and early spring, the Artcraft Top, with its close-fitting side panels and bevelled plate glass windows, gives complete protection from snow and wind, at the same time affording clear, unobstructed vision to driver and passengers. The side panels are of the same richly beautiful Artcraft material as the top itself, and impart an appearance of grace and elegance seldom found even in the limousine body.

All windows are of heavy bevelled plate glass, and the door-sections open with doors. The patented Artcraft floating window construction eliminates rattles and squeaks and prevents the possibility of strain or breakage. The interior is finished in soft lustrous fabric and equipped with a handsome dome light. No detail of perfect construction or finish has been overlooked in the designing of the Artcraft Top. It is a top which improves at once the appearance, comfort and value of your car.

For any of the cars listed below we can supply Artcraft tops usually within twenty-four hours from the time ordered.

Packard	Cadillac	Haynes	Chandler
Harmon	Franklin	McLaughlin	Hudson
Stearns	Jordan	Liberty	Essex
