London today is on the verge of the greatest industrial expansion that has ever known. Industries are flocking in, and "big business" is here to stay. The Buffalo Sunday Times says in its issue of January 2 of this year: "The fact that within the last few months a number of industrial concerns decided to locate in London has had a very happy effect upon the situation generally. During the last year the London Chamber of Commerce has begun to reap the fruit of long and careful preparation in bringing to London allied businesses. In the east end of the city the factory buildings for these number of automobile industries and are now going up. A proof that there is nothing visionary or chimerical about the promises made that they would locate here."

### Our Creed---

We believe in the City of London: in its present prosperity, and its future greatness.  
We believe that London is a city worth living in; that its citizens are worthy citizens of a world-wide city.  
We believe that London is a city worth locating in; that its business is worth striving for.  
We believe that the development of London is just starting; that this city is today at the beginning of a great industrial expansion.  
We believe that the next year will bring to London development surpassing that of any ten-year period in her history; that it will bring many large industries and a great increase in population.  
We believe, with Theodore Roosevelt, that:  
"Every person who invests in well-selected Real Estate in a growing section of a prosperous community adopts the SUREST and SAFEST method of becoming independent, for REAL ESTATE is the basis of all wealth."  
• • • and lastly, we believe that in the City of London today is the greatest opportunity in Canada for the investor in Real Estate.
